JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Cumulative Author Index for Volumes 401–419

Abaturov, M.A., *see* Pleskov, Yu.V. **413**, 105
Abd El-Rahman, H.A. and Schultze, J.W.
New quaternized aminoquinoline polymer films: electropolymerization and characterization **416**, 67
Abdel-Rehiem, S.S., *see* Hassan, H.H. **407**, 105
Abdel Azzem, M., Yousef, U.S., Limosin, D. and Pierre, G.
Electro-oxidative oligomerization of 1,5-diaminonaphthalene in acetonitrile medium **417**, 163
Abd El Rehim, S.S., Fouad, E.E., Abd El Wahab, S.M. and Hassan, H.H.
The influence of some sulphur-containing anions on the anodic behaviour of zinc in an alkaline medium **401**, 113
Abd El Wahab, S.M., *see* Abd El Rehim, S.S. **401**, 113
Abe, T., Yoshida, T., Tokita, S., Taguchi, F., Imaya, H. and Kaneko, M.
Factors affecting selective electrocatalytic CO_2 reduction with cobalt phthalocyanine incorporated in a polyvinylpyridine membrane coated on a graphite electrode **412**, 125
Åberg, S. and Sharp, M.
A theoretical expression for the effect of *IR* drop on the current response in a potential step experiment **403**, 31
Åberg, S.
Measurement of uncompensated resistance and double layer capacitance during the course of a dynamic measurement: correction for *IR* drop and charging currents in arbitrary voltammetric techniques **419**, 99
Abruña, H.D., *see* Bretz, R.L. **408**, 199
Adžić, R.R., *see* Faguy, P.W. **407**, 209
Adžić, R.R., *see* Štrbac, S. **403**, 169
Aeiyach, S., *see* Camalet, J.L. **416**, 179
Agüí, L., López-Huertas, M.A., Yáñez-Sedeño, P. and Pingarrón, J.M.
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate **414**, 141
Aihara, M., *see* Takehara, K. **404**, 181
Akatsuka, K., *see* Sugawara, K. **414**, 253
Akkermans, R.P., *see* Marken, F. **415**, 55
Albalat, R., *see* Carbó, R. **404**, 163
Aldaz, A., *see* Clavilier, J. **404**, 281
Aldaz, A., *see* Herrero, E. **410**, 125
Aldaz, A., *see* Herrero, E. **412**, 165
Aldaz, A., *see* Quijada, C. **414**, 229
Alden, J.A. and Compton, R.G.
A comparison of finite difference algorithms for the simulation of microband electrode problems with and without convective flow **402**, 1
Alden, J.A. and Compton, R.G.
Hydrodynamic voltammetry with channel microband electrodes: axial diffusion effects **404**, 27
Alden, J.A. and Compton, R.G.
The multigrid method, MGD1: an efficient and stable approach to electrochemical modelling. The simulation of double electrode problems **415**, 1
Alden, J.A., *see* Bidwell, M.J. **414**, 247
Alden, J.A., *see* Bidwell, M.J. **417**, 119
Alpatova, N.M., *see* Semenikhin, O.A. **408**, 67
Alumaa, A., *see* Tamm, J. **414**, 149
Alves Jorge, S.M. and Stradiotto, N.R.
The electrochemical cleavage of the nitrobenzoyl group from butyl nitrobenzoates in N,N-dimethylformamide **415**, 27
Amemiya, T., *see* Kim, J.J. **416**, 113
Anantaraman, A.V. and Gardner, C.L.
Studies on ion-exchange membranes. Part 1. Effect of humidity on the conductivity of Nafion® **414**, 115
Andersen, M.L. and Wayner, D.D.M.
Electrochemistry of electron transfer probes. Competition between ECE and DISP mechanisms in the reduction of α-aryloxyacetophenones **412**, 53
Anderson, M.R., *see* Burbank, P.B. **417**, 1
Ando, S., Suzuki, T. and Itaya, K.
Layer-by-layer anodic dissolution of sulfur-modified Ni(100) electrodes: in situ scanning tunneling microscopy **412**, 139
Andrade, E.M., Molina, F.V., Florit, M.I. and Posadas, D.
IR response of poly(*o*-toluidine): spectral modifications upon redox state change **419**, 15
Andrade, E.M., Molina, F.V., Florit, M.I. and Posadas, D.
IR study of the first redox couple of poly(*o*-toluidine). Anion involvement and potential dependence in strongly acidic solutions **415**, 153
Andreu, R., *see* Calvente, J.J. **401**, 231
Andrieux, C.P., *see* Fraoua, K. **418**, 109
Angulo, M. and Rodríguez Mellado, J.M.
On the electroreduction of the anions of pyridine monocarboxylic acid *N*-oxides on mercury electrodes in basic solutions **403**, 251
Angulo, M., *see* Expósito, E. **402**, 211
Anicet, N., Bourdillon, C., Demaille, C., Moiroux, J. and Savéant, J.-M.
Catalysis of the electrochemical oxidation of glucose by glucose oxidase and a single electron cosubstrate: kinetics in viscous solutions **410**, 199
Anson, F.C., *see* Kang, C. **407**, 233
Anson, F.C., *see* Kang, Chan **413**, 165
Anson, F.C., *see* Kuhn, A. **410**, 243
Anson, F.C., *see* Rong, D. **404**, 173
Anson, F.C., *see* Shi, Minglian **415**, 41
Anson, F.C., *see* Yuanwu Xie, **404**, 209
Antonini, A., *see* Pistoia, G. **410**, 115
Aoki, K., Chen, Jingyuan, Nishihara, H. and Hirao, T.
Interaction over three redox centers at conjugated oligomeric ferrocenes with $N = 2$ to 6 nuclei **416**, 151
Aoki, K.
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation **419**, 33
Aoki, K., *see* Chen, J. **402**, 189
Aoki, K., *see* Tezuka, Y. **402**, 161
Arai, G., Takahashi, S. and Yasumori, I.
Xanthine and hypoxanthine sensors based on xanthine oxidase immobilized in poly(mercapto-p-benzoquinone) film **410**, 173
Aramaki, K., *see* Shimura, T. **403**, 219
Aramata, A., *see* Lu, D.-l. **406**, 101
Ardizzone, S. and Grassi, E.
Sulfate-modified zirconia catalysts: the role of surface electrification on the features of the sulfate adsorption process **417**, 193

Arévalo, M.C., Maran, F., Severin, M.G. and Vianello, E.
A case of the indirect role of traces of water in the electroreduction of organic substrates **418**, 47
Arvia, A.J., *see* Zinola, C.F. **415**, 165
Atta, N.F., Marawi, I., Petticrew, K.L., Zimmer, H., Mark, Jr., H.B. and Galal, A.
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface **408**, 47
Audebert, P., Cerveau, G., Corriu, R.J.P. and Costa, N.
Modified electrodes from organic–inorganic hybrid gels formed by hydrolysis–polycondensation of some trimethoxysilylferrocenes **413**, 89
Audebert, P., Guyard, L., Nguyen Dinh An, M., Hapiot, P., Chahma, M., Combelas, C. and Thiebault, A.
Electrochemical studies of the oxidation of sterically hindered pyrroles and thiophenes **407**, 169
Avaca, L.A., *see* Correia, A.N. **407**, 37
Baars, A., Bijl, F.J.C., Sluyters-Rehbach, M. and Sluyters, J.H.
On the potential dependence of the preceding chemical step in the Cd(II) reduction from aqueous KF solutions: a DMμE study **404**, 151
Bácskai, J., *see* Czirók, E. **405**, 205
Bácskai, J., *see* Wasberg, M. **418**, 195
Badiali, J.P., *see* Stafiej, J. **409**, 73
Baeza, A., *see* Ortiz, J.L. **411**, 103
Bain, C.D., *see* Potterton, E.A. **409**, 109
Baldo, M.A., *see* Daniele, S. **404**, 105
Baldo, M.A., *see* Daniele, S. **407**, 149
Baltruschat, H., *see* Zinola, C.F. **415**, 165
Bandey, H.L., Gonsalves, M., Hillman, A.R., Glidle, A. and Bruckenstein, S.
Dynamic quartz crystal impedance measurements of polyvinylferrocene film deposition **410**, 219
Barbier, J., *see* Lamy-Pitara, E. **416**, 47
Barceló, G., *see* Elkhatabi, F. **419**, 71
Barrera-Niebla, M., *see* González-Morín, M. **411**, 1
Batina, N., Kunitake, M. and Itaya, K.
Highly ordered molecular arrays formed on iodine-modified Au(111) in solution: in situ STM imaging **405**, 245
Becker, J.Y., Shen, M. and West, R.
Electrochemical oxidation of deca-n-propylcyclopentasilane $[(n\text{-}Pr)_2Si]_5$, dodecamethylcyclohexasilane $(Me_2Si)_6$ and tetradecaethylcycloheptasilane $(Et_2Si)_7$ **417**, 77
Becucci, L., Moncelli, M.R. and Guidelli, R.
Surface charge density measurements on mercury electrodes covered by phospholipid monolayers **413**, 187
Beden, B., *see* Beden, L. **405**, 241
Beden, L., Crouigneau, P., Beden, B. and Lamy, C.
A preliminary in situ ESR investigation of the structure of the iron electrode|1 M NaOH electrolyte interface **405**, 241
Bedioui, F., *see* Trévin, S. **408**, 261
Bedja, I., Hotchandani, S. and Kamat, P.V.
Transient absorption spectroscopy of nanostructured semiconductor films at controlled potentials. An in situ spectroelectrochemical investigation of the photosensitization process **401**, 237
Beer, P.D., Kocian, O., Mortimer, R.J., Ridgway, C. and Stradiotto, N.R.
Electrochemical polymerisation studies of aza-15-crown-5 vinyl-2,2′-bipyridine ruthenium(II) complexes **408**, 61
Bélanger, D., *see* Regisser, F. **415**, 47
Belgsir, E.M., *see* Hilmi, A. **410**, 101
Belinskii, V.N., *see* Kublanovsky, V.S. **415**, 161
Bellitto, C., *see* Pistoia, G. **410**, 115
Benahmed-Gasmi, A., Frère, P. and Roncali, J.
Difuryl polyenes as precursors of highly conducting electrogenerated conjugated polymers **406**, 231
Bennett, E.M., *see* Eggins, B.R. **408**, 165
Bensch, W., *see* Engelhard, M. **415**, 79
Bergel, A., *see* Gros, P. **405**, 189
Bernardini, M., *see* Mengoli, G. **403**, 143
Berthier, F., Diard, J.-P. and Montella, C.
Discontinuous impedance near a saddle-node bifurcation **410**, 247
Berthier, F., Diard, J.-P., Montella, C. and Volovik, I.
Bifurcation analysis for the Volmer–Heyrovsky mechanism **402**, 29
Bethell, D., Brust, M., Schiffrin, D.J. and Kiely, C.
From monolayers to nanostructured materials: an organic chemist's view of self-assembly **409**, 137
Betova, I., *see* Bojinov, M. **411**, 37
Bettega, H.C.-Y., Moutet, J.-C., Ulrich, G. and Ziessel, R.
Electrochemical cation recognition by novel 2,2′-bipyridine-grafted calix[4]arenequinones **406**, 247
Bettelheim, A., Hayon, J., Weiss, S., Chernia, Z., Ydgar, R. and Ozer, D.
Reflection-FTIR spectroelectrochemistry using ionically conductive polymer films: electrochemical preparation and spectroscopic characterization of some metal hydrides **405**, 251
Betteridge, J.S., *see* Shoesmith, D.W. **406**, 69
Bhugun, I. and Savéant, J.-M.
Self-inhibition in catalytic processes: cyclic voltammetry **408**, 5
Bi, Shuping and Yu, Jiong
Investigations on cyclic reciprocal derivative chronopotentiometry. Part 1. Theory for a reversible reaction **405**, 51
Bidwell, M.J., Alden, J.A. and Compton, R.G.
Channel microband electrodes: a complete working surface for potential step transients **414**, 247
Bidwell, M.J., Alden, J.A. and Compton, R.G.
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes **417**, 119
Bieniasz, L.K.
A method-oriented approach to the formulation of algorithms for electrochemical kinetic simulations. Part 2. Extension to kinetic problems characterized by the simultaneous presence of bulk and interfacial species **404**, 195
Bieniasz, L.K.
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 1. Problem parameters and initial conditions **406**, 33
Bieniasz, L.K.
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 2. Governing equations in one-dimensional geometry **406**, 45
Bijl, F.J.C., *see* Baars, A. **404**, 151
Bilewicz, R., *see* Bujno, K. **407**, 131
Birkin, P.R. and Silva-Martinez, S.
A study of the effect of ultrasound on mass transport to a microelectrode **416**, 127
Bittner, A.M., *see* Samec, Z. **409**, 165
Bizzotto, D. and Lipkowski, J.
Electrochemical and spectroscopic studies of the mechanism of monolayer and multilayer adsorption of an insoluble surfactant at the Au(111)|electrolyte interface **409**, 33
Blankenborg, S.G.J., Sluyters-Rehbach, M. and Sluyters, J.H.
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 **401**, 3
Blazquez, M., *see* Pineda, T. **403**, 101
Blazquez, M., *see* Roman, A.J. **410**, 15
Blum, L., *see* Legault, M. **409**, 77
Bojinov, M., Betova, I. and Raicheff, R.
Kinetics of formation and properties of a barrier oxide film on molybdenum **411**, 37

Bojinov, M.
A model of the anodic oxidation of metals in concentrated solutions: second-order dynamics at the anodic film|solution interface **405**, 15
Bonazzola, C., Brust, M. and Calvo, E.J.
Electrochemical fluorescence modulation at a redox hydrogel modified electrode **407**, 203
Bond, A.M., *see* Shaw, S.J. **404**, 227
Bond, A.M., *see* Webster, R.D. **404**, 303
Borkowska, Z., Tymosiak, A. and Opallo, M.
Conductivity of stoichiometric $(CH_3)_4NOH$ clathrate hydrates **406**, 109
Bortels, L., Deconinck, J. and Van Den Bossche, B.
The multi-dimensional upwinding method as a new simulation tool for the analysis of multi-ion electrolytes controlled by diffusion, convection and migration. Part 1. Steady state analysis of a parallel plane flow channel **404**, 15
Bortels, L., *see* Van Den Bossche, B. **411**, 129
Bouamrane, F., Tadjeddine, A., Butler, J.E., Tenne, R. and Lévy-Clément, C.
Electrochemical study of diamond thin films in neutral and basic solutions of nitrate **405**, 95
Bourdillon, C., *see* Anicet, N. **410**, 199
Bouwkamp-Wijnoltz, A.L., Palys, B.J., Visscher, W. and Van Veen, J.A.R.
An in-situ Raman study of the effect of the support for adsorbed iridium-chelates in catalysing oxygen reduction **406**, 195
Bowden, E.F., *see* Nahir, T.M. **410**, 9
Bragato, C., *see* Daniele, S. **407**, 149
Bragato, C., *see* Daniele, S. **418**, 29
Bressers, P.M.M.C., Plakman, M. and Kelly, J.J.
Etching and electrochemistry of silicon in acidic bromine solutions **406**, 131
Bretz, R.L. and Abruña, H.D.
Adsorption–desorption processes of redox-active osmium thiol monolayers **408**, 199
Brevet, P.F., *see* Tamburello-Luca, A.A. **409**, 123
Brillas, E., Montilla, M., Carrasco, J. and Otero, T.F.
Electrochemical behaviour of poly(2,5-di-(-2-thienyl)-thiophene): properties of the reduced polymer **418**, 123
Brillas, E., *see* Carrasco, J. **418**, 115
Britz, D.
Brute force digital simulation **406**, 15
Britz, D., *see* Green, T. **412**, 59
Brolo, A.G. and Irish, D.E.
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study **414**, 183
Brossier, P., *see* Limoges, B. **402**, 175
Brown, G.M. and Hope, G.A.
A SERS study of SO_4^{2-} /Cl^- ion adsorption at a copper electrode in-situ **405**, 211
Brown, G.M. and Hope, G.A.
Confirmation of thiourea/chloride ion co-adsorption at a copper electrode by in-situ SERS spectroscopy **413**, 153
Bruce, P.G., *see* Roy, S.C. **415**, 33
Bruckenstein, S., *see* Bandey, H.L. **410**, 219
Brunt, T., *see* Chabala, E.D. **412**, 67
Brust, M., *see* Bethell, D. **409**, 137
Brust, M., *see* Bonazzola, C. **407**, 203
Bryce, M.R., *see* Goldenberg, L.M. **408**, 173
Büchi, F.N. and Scherer, G.G.
In-situ resistance measurements of Nafion® 117 membranes in polymer electrolyte fuel cells **404**, 37
Buckley, D.T., *see* Burke, L.D. **405**, 101
Bujno, K., Bilewicz, R., Siegfried, L. and Kaden, T.
Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 **407**, 131
Bukovec, P., *see* Šurca, A. **408**, 83
Bukovec, P., *see* Švegl, F. **418**, 53
Bukowska, J., Rosłonek, G. and Taraszewska, J.
In-situ surface-enhanced Raman spectroscopic study of gold electrodes modified with nickel tetraazamacrocyclic complexes **403**, 47
Burbank, P.B., Gibson, J.R., Dorn, H.C. and Anderson, M.R.
Electrochemistry of C_{82}: relationship to metallofullerene electrochemistry **417**, 1
Burke, L.D. and Buckley, D.T.
The complex nature of hydrous oxide film behaviour on platinum **405**, 101
Butler, J.E., *see* Bouamrane, F. **405**, 95
Cabrera, C.R., *see* Che, G. **417**, 155
Cachet, H., Froment, M. and Maurin, G.
Layer by layer growth of chemically deposited cadmium selenide **406**, 239
Cachet, H., *see* Székely, M. **401**, 89
Cai, W.B., *see* Ren, B. **415**, 175
Cai, X.W., *see* Mao, B.W. **416**, 145
Caillot, E., *see* Székely, M. **401**, 89
Cairns, E.J., *see* Wen, S.J. **408**, 113
Cairns, E.J., *see* Wen, S.J. **415**, 197
Cairns, J., *see* Chabala, E.D. **412**, 77
Caix, C., Chardon-Noblat, S., Deronzier, A. and Ziessel, R.
Electrochemical formation of cationic iridium(III)–hydrido complexes in solution and in polymeric films: their chemical, electrochemical and electrocatalytic activity in the hydrogen generation process **403**, 189
Calvente, J.J., Kováčová, Z., Andreu, R. and Fawcett, W.R.
The role of the metal in determining electrosorption valency in the case of strong molecular adsorption at the electrode|solution interface **401**, 231
Calvo, E.J., *see* Bonazzola, C. **407**, 203
Camacho, L., *see* Molina, A. **408**, 33

Journal of Electroanalytical Chemistry 419 (1996) 129–181

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Cumulative Subject Index for Volumes 401–419

Acetonitrile + water
Electrochemical activity of poly(*N*-vinylcarbazole) films in acetonitrile solution and in acetonitrile + water mixtures. Correlation between spectroelectrochemical and EPR results (Skompska, Kudelski) **403**, 125
Acetylene-type ligands
Unusual twin adsorption waves in voltammetry of trimetallic clusters of Os and Ru undergoing redox-induced reorientation of the alkyne ligand (Pospíšil et al.) **412**, 147
Acid–base properties
A contribution to the electrode reaction of oximes: a study of the intermediate imine on the electroreduction of pyridine-4-aldoxime (Roman et al.) **410**, 15
Acidified H_2O_2
Chemical and electrochemical interaction of acidic H_2O_2 solutions with (100) InP (Theuwis et al.) **410**, 31
Acid medium
Comparative radiotracer study of the adsorption of Cl^-, HSO_4^- (SO_4^{2-}) and $H_2PO_4^-$ anions on rhodized electrodes (Horányi, Wasberg) **404**, 291
A.c. impedance
Photoelectrochemical reduction of carbon dioxide in aqueous solutions on p-GaP electrodes: an a.c. impedance study with phase-sensitive detection (Flaisher et al.) **402**, 97
Impedance voltammetric analysis of a consecutive E–C–E mechanism with two diffusing intermediates with application to the reduction of nitromethane (Prieto et al.) **405**, 1
A model of the anodic oxidation of metals in concentrated solutions: second-order dynamics at the anodic film | solution interface (Bojinov) **405**, 15
Kinetics of formation and properties of a barrier oxide film on molybdenum (Bojinov et al.) **411**, 37
The effect of pH on the charge transport at redox polymer-modified electrodes: an a.c. impedance study applied to poly(*o*-aminophenol) film electrodes (Rodríguez Nieto, Tucceri) **416**, 1
Supported phospholipid membranes: comparison among different deposition methods for a phospholipid monolayer (Ding et al.) **416**, 105
Charge transport processes in electrochemically deposited poly(pyrrole) and poly(*N*-methylpyrrole) thin films (Kim et al.) **416**, 113
Ac impedance analysis
Lipid bilayer formation in a microporous membrane filter monitored by ac impedance analysis and purple membrane photoresponses (Ikematsu et al.) **403**, 61
A.c. impedance spectroscopy
Synthesis and electrochemical properties of poly[3-{ω-[4-(2,2′-bipyridyl)]alkyl}thiophenes], P{B(*n*)T}, and of poly[Ru(II){B(*n*)T}$_3^{2+}$] (Wang, Keene) **405**, 71
Evaluation of the effect of two-dimensional geometry of Pt single-crystal faces on the kinetics of upd of H using impedance spectroscopy (Morin et al.) **412**, 39
Activation polarization
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 (Blankenborg et al.) **401**, 3
Activity
Fullerene film electrodes in aqueous solutions. Part 2. Effects of doping cations (Szűcs et al.) **402**, 137
Adlayer
Time-resolved in situ and real time study of an electrode process by differential X-ray diffraction: Ag underpotential deposition on Au(111) (Chabala, Rayment) **401**, 257
Study of sulphur adlayers on polyoriented platinum electrodes: influence on the electrocatalysis of the SO_2 oxidation reaction (Quijada et al.) **414**, 229
Adsorbed hydrogen
Electrocatalysis for N_2O reduction on metal electrodes (Kudo, Mine) **408**, 267
Adsorbed nitrate and nitrite
On the adsorption and reduction of NO_3^- ions at Au and Pt electrodes studied by in situ FTIR spectroscopy (Da Cunha et al.) **414**, 163
Adsorbed NO
On the adsorption and reduction of NO_3^- ions at Au and Pt electrodes studied by in situ FTIR spectroscopy (Da Cunha et al.) **414**, 163
Adsorption
Adsorption and oxidation of thiophene-3-methanol on platinum electrodes studied by electrochemical and IR spectroscopic methods (Pohjakallio et al.) **401**, 191
Spectroscopic investigations on the adsorption of trifluoracetate at Pt(100), Pt(110) and Pt(111) (Pastor et al.) **404**, 61
Interaction of thiourea with silver electrodes (Szklarczyk et al.) **405**, 111
The adsorption of nickel dimethylglyoxime complex on mercury (Ramirez et al.) **407**, 219
Adsorption of Cl^- and Br^- ions on the (111) plane of a bismuth single crystal from solutions in 2-propanol (Väärtnõu et al.) **407**, 227
Appropriate and inappropriate statistical mechanical treatments for phase transitions at electrified interfaces (Nikitas) **408**, 1
Adsorption–desorption processes of redox-active osmium thiol monolayers (Bretz, Abruña) **408**, 199
Electrochemical and spectroscopic studies of the mechanism of monolayer and multilayer adsorption of an insoluble surfactant at the Au(111)|electrolyte interface (Bizzotto, Lipkowski) **409**, 33
Surface second harmonic study of anion adsorption at the mercury | electrolyte interface (Tamburello-Luca et al.) **409**, 123
Cyclic voltammetry and spectroelectrochemical studies of cation radical and dication adsorption behavior for 7,7′-diphenyl-7,7′-diapocarotene (Gao et al.) **411**, 51
Adsorption of water at Pt(111) electrode in $HClO_4$ solutions. The potential of zero charge (Iwasita, Xia) **411**, 95
CO adsorption and oxidation on Pt(111) electrodes modified by irreversibly adsorbed selenium and tellurium (Herrero et al.) **412**, 165
Stepped-polarographies of Nernstian systems with potential-dependent reactant adsorption (López-Tenés et al.) **413**, 43
Electrochemical quartz crystal microbalance study of adsorption of iodide on highly ordered Au(111) (Lei et al.) **413**, 131

Study of the equilibrium underpotential deposition of copper and the accompanying anion adsorption on rhodized electrodes in the course of cyclic voltammetric measurements (Horányi, Wasberg) **413**, 161
Adsorption of isomers of butanol on bismuth single crystal plane electrodes (Lust et al.) **413**, 175
Electrocapillary curves of polycrystalline gold in aqueous solutions of pyridine (Efimov, Heusler) **414**, 75
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study (Brolo, Irish) **414**, 183
Sulfate-modified zirconia catalysts: the role of surface electrification on the features of the sulfate adsorption process (Ardizzone, Grassi) **417**, 193
The harmony of EQCM and radiotracer sorption results obtained in the course of voltammetric study of a rhodized electrode (Wasberg et al.) **418**, 195

Adsorption geometry
On the adsorption and reduction of NO_3^- ions at Au and Pt electrodes studied by in situ FTIR spectroscopy (Da Cunha et al.) **414**, 163

Adsorption isotherm
An extended hexagon model for Cu underpotential deposition on Au(111) (Legault et al.) **409**, 77

Adsorption kinetics
Electrochemical studies of the adsorption of aniline on a smooth polycrystalline platinum electrode (Fıçıcıoğlu et al.) **408**, 231

Adsorption of DNA
Modification of glassy carbon and gold electrodes with DNA (Pang et al.) **403**, 183

Ag
In situ and real time study of an electrode process by differential X-ray diffraction. Part 1. Ag underpotential deposition on Au(111) (Chabala et al.) **412**, 67

Aggregate species
UV–vis–NIR and Raman spectroelectrochemical studies on viologen cation radicals: evidence for the presence of various types of aggregate species (Lee et al.) **416**, 139

Ag^+-poly-*o*-aminophenol
Metal–polymer interactions in the Ag^+|poly-*o*-aminophenol system (Zhang et al.) **413**, 143

Alcohol oxidation
Electrocatalytic oxidation of alcohols on glassy carbon electrodes electrochemically modified by conductive polymeric nickel(II) tetrakis(3-methoxy-4-hydroxyphenyl)porphyrin film (Ciszewski, Milczarek) **413**, 137

Alkali-metal
Effect of alkali-metal and some quaternary-ammonium cations on the anodic dissolution of p-Si in fluoride media (Hassan et al.) **407**, 105

Alkali metal cations
Channel mimetic sensing membranes for alkali metal cations based on oriented monolayers of calixarene esters (Yagi et al.) **401**, 65

Alkaline media
Temperature dependence of the transfer coefficient. The reduction of iodate in alkaline media (Kirowa-Eisner et al.) **410**, 189

Alkaline solutions
Kinetic and mechanistic study of methanol oxidation on a Pt(111) surface in alkaline media (Tripković et al.) **418**, 9
Structure, morphology and photoelectrochemical responses of anodic PbO films formed on Pb electrodes in various concentrations of alkaline solution (Montaser et al.) **419**, 47

Alkenes
Electrocatalytic oxygenation of alkenes by a sterically hindered water-soluble iron porphyrin in aqueous solutions (Lee, Su) **414**, 69

Alkenyl halides
Nickel-catalyzed electrochemical homocoupling of alkenyl halides: rates and mechanisms (Cannes et al.) **412**, 85

Alkyl sulphates
The voltammetric study of Au(100) electrode in the presence of alkyl sulphates (Skołuda) **406**, 235

All-solid-state cells
Electrochemistry in UHV: generation of lithium from all-solid-state cells (Roy, Bruce) **415**, 33

All-solid-state potassium-selective electrode
Analysis of the long-term potential stability of an all-solid-state potassium-selective electrode with electroactive polypyrrole film (Momma et al.) **407**, 91

Al_2O_3 films
Transport phenomena inside the pores involved in the kinetics and mechanism of growth of porous anodic Al_2O_3 films on aluminium (Patermarakis) **404**, 69

Alumina
Electrochemistry of alumina pillared clay modified electrodes (Petridis et al.) **410**, 93

AM1
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57

Amalgamation
General analytical solution for a reversible i–t response to a triple potential step at an SMDE in the absence/presence of amalgamation (Molina et al.) **408**, 33

Amalgam electrodes
Electrode kinetics and the nature of the metal electrode. Part 1. Zn^{2+} reduction from aqueous 1 M $NaClO_4$ solution at indium and thallium amalgams of varied composition (Koene et al.) **402**, 57

Amalgam formation
Single and multiple pulse voltammetries at the static mercury drop electrode for reversible reactions with and without amalgam formation (Fatouros et al.) **405**, 197

Amino acids
The direct electrochemistry of cytochrome c in the presence of various amino acids (Huang et al.) **416**, 31

Ammonia
Electrochemical and spectroelectrochemical study of the oxidation of S_4^{2-} and S_6^{2-} ions in liquid ammonia (Levillain et al.) **405**, 85

Ammonium
Electrochemical cation recognition by novel 2,2′-bipyridine-grafted calix[4]arenequinones (Bettega et al.) **406**, 247

Ammonium bath
Electrochemical oxidation of zinc + nickel alloys in ammonium baths (Elkhatabi et al.) **419**, 71

Amperometric amplification
Amperometric amplification of antigen–antibody association at monolayer interfaces: design of immunosensor electrodes (Katz, Willner) **418**, 67

Amperometric dehydrogenase
A new strategy for the construction of amperometric dehydrogenase electrodes based on laponite gel–methylene blue polymer as the host matrix (Cosnier, Le Lous) **406**, 243

Amperometric sensors
Linamarin sensors: amperometric sensing of linamarin using linamarase and glucose oxidase (Tatsuma et al.) **407**, 155
Electrocatalytic oxidation of carbohydrates at a molecular deposition film electrode based on water-soluble cobalt phthalocyanine and its application to flow-through detection (Sun et al.) **411**, 73

Amperometry
Scanning electrochemical microscopy: amperometric probing of diffusional ion fluxes through porous membranes and human dentine (Nugues, Denuault) **408**, 125
Study of the flow dependence of microelectrode and semi-microelectrode voltammetric signals (Kubiak, Strozik) **417**, 95

Analyte
Modified monolayer electrodes for electrochemical and piezoelectric analysis of substrate–receptor interactions: novel immunosensor electrodes (Cohen et al.) **417**, 65
Anatase
Metal/semiconductor electrocomposite photoelectrodes: behavior of Ni/TiO_2 photoanodes and comparison of photoactivity of anatase and rutile modifications (Zhou et al.) **402**, 221
Aniline
Electrochemical copolymerization of aniline and metanilic acid (Lee, Cui) **403**, 109
Electrochemical studies of the adsorption of aniline on a smooth polycrystalline platinum electrode (Fıçıcıoğlu et al.) **408**, 231
Direct evidence of indamine cation radicals in the anodic oxidation of aniline by in situ ESR spectroscopy (Petr, Dunsch) **419**, 55
Anion
Crystallographic habit of gold particles grown on electrodes in acidic solutions at different electrode potentials (Lu et al.) **406**, 101
Anion adsorption
Comparative radiotracer study of the adsorption of Cl^-, HSO_4^- (SO_4^{2-}) and $H_2PO_4^-$ anions on rhodized electrodes (Horányi, Wasberg) **404**, 291
Impedance aspects of anion adsorption on gold single crystal electrodes (Pajkossy et al.) **414**, 209
Impedance studies of reconstructed and non-reconstructed gold single crystal surfaces (Eberhardt et al.) **419**, 23
Anion doping
Electrochemical anion doping of poly[(tetraethyldisilanylene)oligo(2,5-thienylene)] derivatives and their p-type semiconducting properties (Kunugi et al.) **414**, 135
Anion exchange
Membrane potential of bipolar membranes (Ramírez et al.) **404**, 187
Anions
Infrared spectroscopic analysis of anions adsorbed from bisulfate-containing solutions on Pt(111) electrodes (Faguy et al.) **407**, 209
A comparative voltammetric study of the $Ir|H_2SO_4$ and $Ir|HClO_4$ aqueous interfaces (Fonseca et al.) **415**, 89
Anodic behavior
Structure, morphology and photoelectrochemical responses of anodic PbO films formed on Pb electrodes in various concentrations of alkaline solution (Montaser et al.) **419**, 47
Anodic dissolution
The influence of some sulphur-containing anions on the anodic behaviour of zinc in an alkaline medium (Abd El Rehim et al.) **401**, 113
Effect of alkali-metal and some quaternary-ammonium cations on the anodic dissolution of p-Si in fluoride media (Hassan et al.) **407**, 105
Layer-by-layer anodic dissolution of sulfur-modified Ni(100) electrodes: in situ scanning tunneling microscopy (Ando et al.) **412**, 139
Anodic electrocrystallization
Electrosynthesis and electrochemical behaviour of unusual solid thallium-based phases: thallium peroxide, thallium(I)–thallium(III) mixed oxide, thallium cuprate, and thallium oxyfluoride (Tsirlina, Petrii) **401**, 33
Anodic film
Abnormal photocurrent of the anodic film on lead in sulfuric acid solution (Wan et al.) **414**, 159
Anodic oxidation
A model of the anodic oxidation of metals in concentrated solutions: second-order dynamics at the anodic film | solution interface (Bojinov) **405**, 15
Direct evidence of indamine cation radicals in the anodic oxidation of aniline by in situ ESR spectroscopy (Petr, Dunsch) **419**, 55
Anodic polymerization
Electrochemical and spectroscopic characterization of anodically formed nickel salen polymer films on glassy carbon, platinum, and optically transparent tin oxide electrodes in acetonitrile containing tetramethylammonium tetrafluoroborate (Dahm et al.) **410**, 163
Antibody
Impedance analysis of Si/SiO_2 heterostructures grafted with antibodies: approach for immunosensor development (Maupas et al.) **406**, 53
Modified monolayer electrodes for electrochemical and piezoelectric analysis of substrate–receptor interactions: novel immunosensor electrodes (Cohen et al.) **417**, 65
Antigen
Modified monolayer electrodes for electrochemical and piezoelectric analysis of substrate–receptor interactions: novel immunosensor electrodes (Cohen et al.) **417**, 65
Antigen monolayer electrode
Amperometric amplification of antigen–antibody association at monolayer interfaces: design of immunosensor electrodes (Katz, Willner) **418**, 67
Antimetabolites
Electrochemical behaviour and micromolar determination of the antineoplastic agent 5-azacytidine and its mixtures with the nucleoside cytidine (Marín et al.) **407**, 189
Antioxidants
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate (Agüí et al.) **414**, 141
Aqueous electrolyte
Electric potential near a charged metal surface in contact with aqueous electrolyte (Philpott, Glosli) **409**, 65
Influence of the surface structure of cadmium electrodes on the electric double layer parameters in aqueous surface-inactive electrolyte solutions (Lust et al.) **413**, 111
Aqueous medium
Anodic oxidation of thioureido derivatives of biogenic amines at a glassy carbon electrode in an aqueous medium (González Lomba et al.) **410**, 87
Aqueous solution
Fullerene film electrodes in aqueous solutions. Part 2. Effects of doping cations (Szűcs et al.) **402**, 137
Voltammetry of carbon dioxide. Part 2. Voltammetry in aqueous solutions on glassy carbon (Eggins et al.) **408**, 165
The interfacial structure around ferric and ferrous ions in aqueous solution: the nature of the second hydration shell (Degrève, Quintale, Jr.) **409**, 25
Aquo complexes of ruthenium
Electrochemistry of *cis*-diaquo ruthenium(II) complexes with substituted 2,2′-bipyridine ligands in a non-coordinating solvent. Application to the elaboration of corresponding functionalized polypyrrole films (Collomb-Dunand-Sauthier et al.) **410**, 21
Argon
Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 (Bujno et al.) **407**, 131
Arsenic
Electrodeposition of In + As thin film alloys and their conversion to $InAs_xP_{1-x}$ by PH_3 treatment (Dalchiele et al.) **418**, 83
Arylamino moiety
Electrochemical study of intramolecular charge transfer complexes derived from 1,4-naphthoquinone. Part 2. Electro-oxidation of 2-substituted 3-arylamino-1,4-naphthoquinone autocomplexes (Turovska et al.) **414**, 221
Arylmethyl halides
Estimation of bond energy in radical anions of arylmethyl halides as the controlling factor of stepwise versus concerted reductive cleavage (Jaworski) **407**, 237
α-Aryloxyacetophenone
Electrochemistry of electron transfer probes. Competition between ECE and DISP mechanisms in the reduction of α-aryloxyacetophenones (Andersen, Wayner) **412**, 53

Ascorbic acid
Effect of cyclodextrins on the electrochemical behaviour of ascorbic acid on gold electrodes (Manzanares et al.) **407**, 141
Zeolite-modified carbon paste electrode for selective monitoring of dopamine (Wang, Walcarius) **407**, 183
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Association constants
Ion pairing between dissolved poly(*o*-phenylenediamine) and halogenide ions (Yano, Nagaoka) **410**, 213
Asymmetric electrochemical cell
A network approach to the simulation of electrical properties of asymmetric electrochemical cells (Moya et al.) **413**, 9
Atomic force microscopy
Atomic structure of bare *p*-GaAs(100) and electrodeposited Cu on *p*-GaAs(100) surfaces in H_2SO_4 solutions: an AFM study (Koinuma, Uosaki) **409**, 45
Atomic structure
Atomic structure of bare *p*-GaAs(100) and electrodeposited Cu on *p*-GaAs(100) surfaces in H_2SO_4 solutions: an AFM study (Koinuma, Uosaki) **409**, 45
Au(100)
The voltammetric study of Au(100) electrode in the presence of alkyl sulphates (Skołuda) **406**, 235
Au(111)
Underpotential deposition of mercury on Au(111) investigated by in situ scanning tunnelling microscopy (Inukai et al.) **403**, 159
The surface structure of Au(111) in the presence of organic adlayers: a combined electrochemical and surface X-ray scattering study (Wandlowski et al.) **409**, 155
Apparent thermodynamic inconsistencies in surface stress measurements of copper underpotential deposition on Au(111) electrodes (Haiss, Sass) **410**, 119
Electrochemical quartz crystal microbalance study of adsorption of iodide on highly ordered Au(111) (Lei et al.) **413**, 131
The pzc of Au(111) and Pt(111) in a perchloric acid solution: an ex situ approach to the immersion technique (Hamm et al.) **414**, 85
The influence of copper adlayer structure on the electroreduction of nitrobenzene at ordered Au(111) as studied by cyclic voltammetry combined with solution flushing tactics (Chang et al.) **415**, 169
Au and Pt electrodes
Electrochemical behaviour of nitroindoles: oxidative electropolymerization and reduction of the nitro group of polymerized and non-polymerized 4-nitro and 5-nitroindole (Kokkinidis, Kelaidopoulou) **414**, 197
Au(111) electrode
Chloride adsorption at the Au(111) electrode surface (Shi, Lipkowski) **403**, 225
Electrocatalytic reduction of peroxodisulfate anion on Au(111) in acidic aqueous solutions (Samec et al.) **409**, 165
Au(111)|electrolyte interface
Electrochemical and spectroscopic studies of the mechanism of monolayer and multilayer adsorption of an insoluble surfactant at the Au(111)|electrolyte interface (Bizzotto, Lipkowski) **409**, 33
Aza crown ether
Complexing properties of poly[3-(aza crown ether)pyrroles] to cobalt^{2+} and their catalytic properties towards oxygen reduction (Korri Youssoufi et al.) **406**, 187
5-Azacytidine
Electrochemical behaviour and micromolar determination of the antineoplastic agent 5-azacytidine and its mixtures with the nucleoside cytidine (Marín et al.) **407**, 189

Bacteria
Bacterial chemo-attractant properties of metal ions from dissolving electrode surfaces (De Sánchez, Schiffrin) **403**, 39
Electrochemical cation recognition by novel 2,2′-bipyridine-grafted calix[4]arenequinones (Bettega et al.) **406**, 247
Barrier film
Kinetics of formation and properties of a barrier oxide film on molybdenum (Bojinov et al.) **411**, 37
Batteries
Dispersion of the interface of a conducting insulating zone temporarily generated in a polypyrrole film (Tezuka et al.) **402**, 161
Benzolyazulenes
Voltammetric behavior and electronic molecular structures of several azulenylketones (Saitoh et al.) **418**, 139
Benzotriazole
Some experiments regarding the corrosion inhibition of copper by benzotriazole and potassium ethyl xanthate (Souto et al.) **411**, 161
Bifurcation
Bifurcation analysis for the Volmer–Heyrovsky mechanism (Berthier et al.) **402**, 29
Discontinuous impedance near a saddle-node bifurcation (Berthier et al.) **410**, 247
Bilayer
The formation of bilayered nickel–iron, cadmium–iron and cadmium–silver hexacyanoferrates by an electrochemically driven insertion–substitution mechanism (Dostal et al.) **415**, 133
Bioelectrochemical response
The bioelectrochemical response of the polyaniline sarcosine oxidase electrode (Yang, Mu) **415**, 71
Bioelectrochemical sensors
Lipid bilayer formation in a microporous membrane filter monitored by ac impedance analysis and purple membrane photoresponses (Ikematsu et al.) **403**, 61
Biogenic amines
Anodic oxidation of thioureido derivatives of biogenic amines at a glassy carbon electrode in an aqueous medium (González Lomba et al.) **410**, 87
Biosensor
Double electropolymer modified platinum electrode to follow the kinetic process H_2O_2 + ascorbic acid. Influence of the reaction on amperometric biosensor applications (Losito, Zambonin) **410**, 181
Fabrication of a mediated glucose oxidase recessed microelectrode for the amperometric determination of glucose (McRipley, Linsenmeier) **414**, 235
A kinetic model for the electroenzymatic processes involved in polyphenol-oxidase-based amperometric catechol sensors (Desprez, Labbé) **415**, 191
Practical and theoretical evaluation of an alternative geometry enzyme electrode (Gooding, Hall) **417**, 25
A reagentless biosensor highly sensitive to hydrogen peroxide based on new methylene blue N dispersed in Nafion® gel as the electron shuttle (Liu et al.) **417**, 59
A new amperometric biosensor for fructose using a carbon paste electrode modified with silica gel coated with Meldola's Blue and fructose 5-dehydrogenase (Garcia et al.) **418**, 147
Studies on employing tetrathiafulvalene as an electron shuttle incorporated in a montmorillonite-modified immobilization matrix for an enzyme electrode (Lei et al.) **419**, 93
Bipolar membrane
Membrane potential of bipolar membranes (Ramírez et al.) **404**, 187
Bismuth
Adsorption of Cl^- and Br^- ions on the (111) plane of a bismuth single crystal from solutions in 2-propanol (Väärtnõu et al.) **407**, 227
UHV and electrochemical transfer studies on Pt(110)-(1 × 2): the influence of bismuth on hydrogen and oxygen adsorption, and the electro-oxidation of carbon monoxide (Hayden et al.) **409**, 51
Adsorption of isomers of butanol on bismuth single crystal plane electrodes (Lust et al.) **413**, 175
Optical characterization of bismuth reversible electrodeposition (Córdoba de Torresi, Carlos) **414**, 11

Bisulphate
Infrared spectroscopic analysis of anions adsorbed from bisulfate-containing solutions on Pt(111) electrodes (Faguy et al.) **407**, 209
CO_2 reduction on Pt(S)-[n(111) × (111)] single crystal electrodes affected by the adsorption of sulfuric acid anion (Hoshi et al.) **416**, 61
Bond energy
Estimation of bond energy in radical anions of arylmethyl halides as the controlling factor of stepwise versus concerted reductive cleavage (Jaworski) **407**, 237
Boron
Synthetic semiconductor diamond electrodes: elucidation of the equivalent circuit for the case of frequency-dependent impedance (Pleskov et al.) **413**, 105
Bounded motion distance
Determination of charge transfer distance by potential-step chronoamperospectrometry in a Nafion® film containing $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **412**, 159
Bromate reduction
Electrochemical behavior of the molybdotungstate heteropoly complex with neodymium, $K_{10}H_3[Nd(SiMo_7W_4O_{39})_2]\cdot xH_2O$ in aqueous solution (Cheng et al.) **407**, 97
Bromine
Etching and electrochemistry of silicon in acidic bromine solutions (Bressers et al.) **406**, 131
Electrolytic partial fluorination of organic compounds. Part 16. Selective indirect anodic fluorination of dithioacetals using a bromine mediator (Fuchigami, Sano) **414**, 81
1-Bromo-anthraquinone
In situ electrochemical ESR studies of reactive radicals: the reductions of bromo-anthraquinone and methyl viologen (Webster et al.) **402**, 167
Brute force method
Brute force digital simulation (Britz) **406**, 15
Bulk electrolysis
Electroanalytical simulations. Part 16. Simulation of controlled current bulk electrolysis experiments by orthogonal collocation: general model and simple charge transfer mechanisms (Speiser) **413**, 67
Buoyancy
A quantitative study of gravity-induced convection in two-dimensional parallel electrodeposition cells (Chazalviel et al.) **407**, 61
2,3 Butanediol
Effects of chirality during electrochemical oxidation of 2,3 butanediol stereoisomers (Kuhn, Anson) **410**, 243
Butanol
Adsorption of isomers of butanol on bismuth single crystal plane electrodes (Lust et al.) **413**, 175
Butyl nitrobenzoates
The electrochemical cleavage of the nitrobenzoyl group from butyl nitrobenzoates in N,N-dimethylformamide (Alves Jorge, Stradiotto) **415**, 27

C_{60}
Electro-organic chemistry of fullerenes. Part 1. Indirect cathodic reduction of *vic*-dihalides and perfluoroalkyl halides using C_{60} as mediator. Cyclic voltammetric study and preparative-scale electrolysis (Fuchigami et al.) **411**, 115
Photoelectrochemical behaviour of C_{60} films in various oxidation states (Szűcs et al.) **419**, 39
C_{82}
Electrochemistry of C_{82}: relationship to metallofullerene electrochemistry (Burbank et al.) **417**, 1
Cadmium
Steady state voltammetry for reduction of cadmium at a Pt microelectrode in dimethylsulphoxide with and without supporting electrolyte (Daniele et al.) **407**, 149
Comparison between polarographic and potentiometric speciation for cadmium/humic acid systems (Pinheiro et al.) **410**, 61
Influence of the surface structure of cadmium electrodes on the electric double layer parameters in aqueous surface-inactive electrolyte solutions (Lust et al.) **413**, 111
Cadmium–iron
The formation of bilayered nickel–iron, cadmium–iron and cadmium–silver hexacyanoferrates by an electrochemically driven insertion–substitution mechanism (Dostal et al.) **415**, 133
Cadmium selenide
Layer by layer growth of chemically deposited cadmium selenide (Cachet et al.) **406**, 239
Cadmium–silver
The formation of bilayered nickel–iron, cadmium–iron and cadmium–silver hexacyanoferrates by an electrochemically driven insertion–substitution mechanism (Dostal et al.) **415**, 133
Caffeic acid
Oxidation of caffeic acid and related hydroxycinnamic acids (Hapiot et al.) **405**, 169
Calcerous scale
Estimation of the deposition rate of thermal calcareous scaling by the electrochemical impedance technique (Gabrielli et al.) **412**, 189
Calculation method
A new simple voltammetric analysis of the kinetics of homogeneous reactions following the EC mechanism: oxidation of Cu(I) by hydrogen peroxide (Kontturi et al.) **418**, 131
Calixarene esters
Channel mimetic sensing membranes for alkali metal cations based on oriented monolayers of calixarene esters (Yagi et al.) **401**, 65
Calixarenes
Electrochemical cation recognition by novel 2,2′-bipyridine-grafted calix[4]arenequinones (Bettega et al.) **406**, 247
Calorimetry
Isoperibolic calorimetry on modified Fleischmann–Pons cells (Preparata et al.) **411**, 9
Capacitance
Measurement of uncompensated resistance and double layer capacitance during the course of a dynamic measurement: correction for *IR* drop and charging currents in arbitrary voltammetric techniques (Åberg) **419**, 99
Carbohydrates
Electrocatalytic oxidation of carbohydrates at a molecular deposition film electrode based on water-soluble cobalt phthalocyanine and its application to flow-through detection (Sun et al.) **411**, 73
Carbon
Reducibility of the carbon–fluorine bond in the trifluoromethyl group (Combellas et al.) **407**, 195
Mixed methanol oxidation/oxygen reduction currents on a carbon supported Pt catalyst (Kauranen, Skou) **408**, 189
A study of the effect of ultrasound on mass transport to a microelectrode (Birkin, Silva-Martinez) **416**, 127
Carbonate electrolytes
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part I: Effect of temperature and alkali carbonate mixture (Reeve, Tseung) **403**, 69
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part II: Effect of $SrCO_3$, $BaCO_3$ and SnO_2 additives (Reeve, Tseung) **403**, 85
Carbon dioxide
Photoelectrochemical reduction of carbon dioxide in aqueous solutions on p-GaP electrodes: an a.c. impedance study with phase-sensitive detection (Flaisher et al.) **402**, 97
Rotating ring–disk electrode analysis of CO_2 reduction electrocatalyzed by a cobalt tetramethylpyridoporphyrazine on the disk and detected as CO on a platinum ring (Zhang et al.) **403**, 93
Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 (Bujno et al.) **407**, 131

Voltammetry of carbon dioxide. Part 2. Voltammetry in aqueous solutions on glassy carbon (Eggins et al.) **408**, 165
Carbon dioxide reduction
Carbon dioxide reduction on platinum|Nafion®|carbon electrodes (Min Huang, Faguy) **406**, 219
Carbon disk microelectrode
Use of Nafion® coated carbon disk microelectrodes in solution without and with different concentrations of supporting electrolyte (Daniele et al.) **418**, 29
Carbon electrode
Isotope and surface preparation effects on alkaline dioxygen reduction at carbon electrodes (Xu et al.) **410**, 235
Carbon fibre
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate (Agüí et al.) **414**, 141
Carbon fibre microelectrodes
Analysis of the factors determining the sensitivity of a miniaturized glucose biosensor made by codeposition of palladium and glucose oxidase onto an 8 μm carbon fiber (Sakslund et al.) **402**, 149
Carbon films
Metal-dispersed porous carbon films as electrocatalytic sensors (Wang et al.) **404**, 137
Carbon group elements
Electrochemical polymerization of the tetrathienyl derivatives of the carbon group elements (Visy et al.) **401**, 119
Carbon microelectrode
Experimental strategies for continuous measurements of *I–t* transients of a silver single nucleus on carbon microelectrodes (Mao et al.) **416**, 145
Carbon monoxide
Rotating ring–disk electrode analysis of CO_2 reduction electrocatalyzed by a cobalt tetramethylpyridoporphyrazine on the disk and detected as CO on a platinum ring (Zhang et al.) **403**, 93
Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 (Bujno et al.) **407**, 131
Electrocatalytic oxidation of carbon monoxide at lower potentials on platinum-based alloys incorporated in polyaniline (Napporn et al.) **408**, 141
CO adsorption and oxidation on Pt(111) electrodes modified by irreversibly adsorbed selenium and tellurium (Herrero et al.) **412**, 165
Detection of CO desorbing from the Ni electrode surface by DEMS (Zinola et al.) **415**, 165
Carbon monoxide electro-oxidation
UHV and electrochemical transfer studies on Pt(110)-(1 × 2): the influence of bismuth on hydrogen and oxygen adsorption, and the electro-oxidation of carbon monoxide (Hayden et al.) **409**, 51
Carbon paste
Zeolite containing oxidase-based carbon paste biosensors (Wang, Walcarius) **404**, 237
Zeolite-modified carbon paste electrode for selective monitoring of dopamine (Wang, Walcarius) **407**, 183
Carbon paste electrode
Electrochemical assay and properties of plasmin adsorbed onto a carbon paste electrode (Longchamp et al.) **412**, 31
Catalysis of dioxygen reduction to hydrogen peroxide at the surface of carbon paste electrodes modified by 1,4-naphthoquinone and some of its derivatives (Golabi, Raoof) **416**, 75
Carbon support
Influence of carbon surface pre-oxidation on the properties of silver + carbon electrocatalysts (Yang, Zhou) **415**, 143
Carbon-supported particulate electrodes
Kinetics of methanol oxidation on carbon-supported Pt and Pt + Ru catalysts (Kauranen et al.) **404**, 1
Carbonyls
Unusual twin adsorption waves in voltammetry of trimetallic clusters of Os and Ru undergoing redox-induced reorientation of the alkyne ligand (Pospíšil et al.) **412**, 147
Carboxylates
N,N′-dimethyl-2,7-diazapyrenium: a redox-dependent receptor for aromatic carboxylates (Lilienthal et al.) **414**, 107
Carotenoid
Cyclic voltammetry and spectroelectrochemical studies of cation radical and dication adsorption behavior for 7,7′-diphenyl-7,7′-diapocarotene (Gao et al.) **411**, 51
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Catalysis
Direct electrochemistry of *Rhodococcus opacus* hydrogenase for the catalysis of NAD^+ reduction (Gros et al.) **405**, 189
Electrocatalytic reaction, catalytic autoxidation, and supported catalytic autoxidation of sulfur oxoanions by FeTSPP and Mn(4-TMPyP) (Chen) **407**, 123
Self-inhibition in catalytic processes: cyclic voltammetry (Bhugun, Savéant) **408**, 5
Catalysis of the electrochemical oxidation of glucose by glucose oxidase and a single electron cosubstrate: kinetics in viscous solutions (Anicet et al.) **410**, 199
Nickel-catalyzed electrochemical homocoupling of alkenyl halides: rates and mechanisms (Cannes et al.) **412**, 85
Catalytic pathways for the electroreduction of O_2 at graphite electrodes on which a macrocyclic cobalt complex is adsorbed (Kang et al.) **413**, 165
Electrochemical behaviour of nitroindoles: oxidative electropolymerization and reduction of the nitro group of polymerized and non-polymerized 4-nitro and 5-nitroindole (Kokkinidis, Kelaidopoulou) **414**, 197
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21
Catalyst
Efficacy of organometallic-containing screen-printed carbon strips as catalysts for the oxidation of hydrogen peroxide: a voltammetric and X-ray photoelectron spectroscopic investigation (Gilmartin et al.) **401**, 127
The influence of OH^- chemisorption on the catalytic properties of gold single crystal surfaces for oxygen reduction in alkaline solutions (Štrbac, Adžić) **403**, 169
Sulfate-modified zirconia catalysts: the role of surface electrification on the features of the sulfate adsorption process (Ardizzone, Grassi) **417**, 193
Catalyst–substrate complex
Calculation of cyclic voltammetric responses for the catalytic reduction of substrates via intramolecular electron transfer within a catalyst–substrate complex formed on electrode surfaces (Yuanwu Xie, Anson) **404**, 209
Catalytic oxidation
Voltammetric and XPS investigations of polynuclear ruthenium-containing cyanometallate film electrodes (Cataldi et al.) **406**, 91
Catalytic reduction
Catalytic reduction of α,ω-dihaloalkanes with nickel(I) salen as a homogeneous-phase and polymer-bound mediator (Dahm, Peters) **406**, 119
Catalytic reduction of dioxygen
Synthesis and studies on the electrocatalytic reduction of molecular oxygen by non-planar cobalt(II) tetrakis-(*N*-methyl pyridyl)-β-octabromoporphyrin (D'Souza et al.) **411**, 167

Catechol
Electrochemical study of catechol and 4-methylcatechol in methanol. Application to the electro-organic synthesis of 4,5-dimethoxy- and 4-methoxy-5-methyl-o-benzoquinone (Nematollahi, Golabi) **405**, 133
Catechol derivatives
Charge-selectivity of the monolayer modified gold electrode for the electrochemical oxidation of catechol derivatives (Takehara et al.) **404**, 181
Cathode
Cathodic electrodeposition of Se on Ti electrodes (Cattarin et al.) **415**, 123
Cathodic electropolymerization
Cathodic electropolymerization of methacrylonitrile studied in situ by quartz crystal microbalance, cyclic voltammetry, and impedance spectroscopy (Tanguy et al.) **417**, 175
Cathodic stripping
Electrically heated cylindrical microelectrodes. Determination of lead on Pt by cyclic voltammetry and cathodic stripping analysis (Zerihun, Gründler) **415**, 85
Cation
Redox cationic or procationic labeled drugs detected at a perfluorosulfonated ionomer film-coated electrode (Limoges et al.) **402**, 175
Effect of alkali-metal and some quaternary-ammonium cations on the anodic dissolution of p-Si in fluoride media (Hassan et al.) **407**, 105
Cation exchange
Membrane potential of bipolar membranes (Ramírez et al.) **404**, 187
Cation radial
The electrochemical oxidation of dibenzo(c,e)-1,2-diselenine to its cation radical. A voltammetric study in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **401**, 183
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35
Direct evidence of indamine cation radicals in the anodic oxidation of aniline by in situ ESR spectroscopy (Petr, Dunsch) **419**, 55
Cd(II)
On the potential dependence of the preceding chemical step in the Cd(II) reduction from aqueous KF solutions: a DMμE study (Baars et al.) **404**, 151
CdTe
In-situ study of the electrochemical deposition process of CdTe and $Hg_xCd_{1-x}Te$ using laser-scanning photoelectrochemical microscopy (You et al.) **405**, 233
n-type CdTe
Modelling of n-type CdTe photoluminescence variation with polarization: a probe of the shift of semiconductor band edges (Gérard et al.) **401**, 57
Cell construction
A spectroelectrochemical cell for measurements in highly purified solvents (Geskes, Heinze) **418**, 167
Cell geometry
ESR-electrochemical cells: a comparative study (Webster et al.) **404**, 303
CE mechanism
Study of CE mechanisms by square wave voltammetry: Cd(II) + nitrilotriacetic acid and Cd(II) + aspartic acid systems (Correia dos Santos et al.) **413**, 97
Channel electrodes
In situ electrochemical ESR studies of reactive radicals: the reductions of bromo-anthraquinone and methyl viologen (Webster et al.) **402**, 167
Channel flow cell
A channel flow cell with downstream impedance spectroscopy detection: theory and applications (Tam et al.) **407**, 23
Channel microband electrode
Hydrodynamic voltammetry with channel microband electrodes: axial diffusion effects (Alden, Compton) **404**, 27
Channel microband electrodes: a complete working surface for potential step transients (Bidwell et al.) **414**, 247
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes (Bidwell et al.) **417**, 119
Channel mimetic sensing membranes
Channel mimetic sensing membranes for alkali metal cations based on oriented monolayers of calixarene esters (Yagi et al.) **401**, 65
Characterization
Highly conductive free-standing films by electrochemical polymerisation of 3,4-dimethoxypyrrole (Merz, Graf) **412**, 11
New quaternized aminoquinoline polymer films: electropolymerization and characterization (Abd El-Rahman, Schultze) **416**, 67
Charge carriers
Changes in the population of neutral species and charge carriers during electrochemical oxidation of polypyrrole (Fermín et al.) **401**, 207
Charge displacement
Comparison of electrosorption at activated polycrystalline and Pt(531) kinked platinum electrodes: surface voltammetry and charge displacement on potentiostatic CO adsorption (Clavilier et al.) **404**, 281
Charge effects
pH-switched electrochemistry of pyrroloquinoline quinone at Au electrodes modified by functionalized monolayers (Katz et al.) **408**, 107
Charge hopping
Determination of charge transfer distance by potential-step chronoamperospectrometry in a Nafion® film containing $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **412**, 159
Charge transfer
Electrode kinetics and the nature of the metal electrode. Part 1. Zn^{2+} reduction from aqueous 1 M $NaClO_4$ solution at indium and thallium amalgams of varied composition (Koene et al.) **402**, 57
Dispersion of crystallites of the metal substrate during the electropolymerization of 2-hydroxy-3-aminophenazine (HAPh) on Au: effect of Au crystallites on the kinetics and mechanism of charge-transfer reactions between the polymer and redox species in electrolyte (Kelaidopoulou et al.) **404**, 113
A novel approach for studying charge transfer across an interface of two immiscible solutions using the scanning electrochemical microscope (SECM) (Selzer, Mandler) **409**, 15
Charge transfer distance
Determination of charge transfer distance by potential-step chronoamperospectrometry in a Nafion® film containing $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **412**, 159
Charge transfer mechanisms
Electroanalytical simulations. Part 16. Simulation of controlled current bulk electrolysis experiments by orthogonal collocation: general model and simple charge transfer mechanisms (Speiser) **413**, 67
Charge transfer reaction
The hanging meniscus rotating disk (HMRD). Part 3. Application to a charge transfer preceded by a chemical reaction in equilibrium (Villullas, López Teijelo) **418**, 159
Charge transport
Effect of poly(acrylonitrile-co-butadiene) on the charge transfer rate in polypyrrole film (Chae et al.) **412**, 103
The effect of pH on the charge transport at redox polymer-modified electrodes: an a.c. impedance study applied to poly(*o*-aminophenol) film electrodes (Rodríguez Nieto, Tucceri) **416**, 1
Chemical composition
Chemical and phase compositions of zinc + nickel alloys determined by stripping techniques (Elkhatabi et al.) **404**, 45

Randomly oriented graphite electrode. Part 1. Effect of electrochemical pretreatment on the electrochemical behavior and chemical composition of the electrode (Regisser et al.) **415**, 47

Chemically modified Au electrode
Electrocatalytic oxidation of carbohydrates at a molecular deposition film electrode based on water-soluble cobalt phthalocyanine and its application to flow-through detection (Sun et al.) **411**, 73

Chemically modified carbon powder electrode
ESR-electrochemistry in-situ studies on chemically modified electrodes (He et al.) **405**, 217

Chemically modified electrode
Catalytic reduction of α,ω-dihaloalkanes with nickel(I) salen as a homogeneous-phase and polymer-bound mediator (Dahm, Peters) **406**, 119

Chemically prepared films
Electrochemical, electrochromic and photoelectrochemical behavior of a highly soluble polyaniline derivative: poly(*o*-methoxyaniline) doped with functionalized organic acids (Gazotti, Jr. et al.) **415**, 107

Chemical sensing
Channel mimetic sensing membranes for alkali metal cations based on oriented monolayers of calixarene esters (Yagi et al.) **401**, 65

Chemical synthesis
Electrochemical and chemical synthesis of polyaniline on the surface of vacuum deposited polyaniline films (Nekrasov et al.) **412**, 133

Chemisorption
The influence of OH^- chemisorption on the catalytic properties of gold single crystal surfaces for oxygen reduction in alkaline solutions (Štrbac, Adžić) **403**, 169

Chemo-attractants
Bacterial chemo-attractant properties of metal ions from dissolving electrode surfaces (De Sánchez, Schiffrin) **403**, 39

Chirality
Effects of chirality during electrochemical oxidation of 2,3 butanediol stereoisomers (Kuhn, Anson) **410**, 243

Chloride
Chloride adsorption at the Au(111) electrode surface (Shi, Lipkowski) **403**, 225

Chromate anion
Determination of rate constants of electrode reactions by methods of semi-integral electrochemistry applied to chronoamperometric and chronocoulometric curves (González-Morín et al.) **411**, 1

Chromium
The electrochemical dissolution of iron(III) and chromium(III) oxides and ferrites under conditions of abrasive stripping voltammetry (Grygar) **405**, 117

Chronoamperometry
Chronoamperometry of uncharged species in the presence of a very low concentration of supporting electrolyte. A simulation (Jaworski et al.) **407**, 75
Charge transport in frozen tetraalkylammonium fluoride hydrates containing a 1:1 mixture of $K_3Fe(CN)_6$ and $K_4Fe(CN)_6$ (Opallo) **411**, 145
Migrational chronoamperometry of uncharged substrates. Influence of electron transfer rate (Hyk et al.) **415**, 13

Chronoamperometry/chronocoulometry
Supported phospholipid membranes: comparison among different deposition methods for a phospholipid monolayer (Ding et al.) **416**, 105

Chronocoulometry
Electrochemical studies of a hexaarylbiimidazole (Oliver et al.) **403**, 153

Chronopotentiometry
The chronopotentiometric reduction of proteins adsorbed on mercury (Honeychurch, Ridd) **418**, 185

Clathrate hydrates
Conductivity of stoichiometric $(CH_3)_4NOH$ clathrate hydrates (Borkowska et al.) **406**, 109

Clay
Redox switching of interlayer spacing in montmorillonite clay (Ravichandran et al.) **406**, 227

Clay modified electrode
Organosilasesquioxane–laponite clay sols: a versatile approach for electrode surface modification (Coche-Guérente et al.) **401**, 253
Catalysis of the electroreduction of hydrogen peroxide by nontronite clay coatings on glassy carbon electrodes (Zen et al.) **408**, 157

Cl^- ions
A novel approach to platinized platinum electrodes: specific adsorption as a partition between the solution phase and the electrodeposited platinum black layer (Horányi) **417**, 185

CN^-
Vibrational properties of CN^- adsorbed on platinum and silver: ab initio MCSCF calculations compared with SFG experiments (Tadjeddine et al.) **408**, 237

CO_2
Electrochemical reduction of CO_2 with high current density in a CO_2 + methanol medium at various metal electrodes (Saeki et al.) **404**, 299

C=O
The reduction mechanism of the C=O group. Part 2. The electrochemical reduction of *p*-diacetylbenzene in aqueous medium (Meunier-Prest et al.) **410**, 145

Co-adsorption
Confirmation of thiourea/chloride ion co-adsorption at a copper electrode by in-situ SERS spectroscopy (Brown, Hope) **413**, 153

Coagulation
Quartz crystal microbalance study of the growth of indium hexacyanoferrate films during electrodeposition and coagulation (Czirók et al.) **405**, 205

Co(Al)-oxide
Spectroelectrochemical and structural properties of electrochromic Co(Al)-oxide and Co(Al,Si)-oxide films prepared by the sol–gel route (Švegl et al.) **418**, 53

Co(Al,Si)-oxide
Spectroelectrochemical and structural properties of electrochromic Co(Al)-oxide and Co(Al,Si)-oxide films prepared by the sol–gel route (Švegl et al.) **418**, 53

Coatings
Severe inhibition of the diffusion and electroactivity of $Cu(bpy)_2^{2+}$ complexes incorporated in Nafion® coatings on electrodes (Rong, Anson) **404**, 173

Coaxial probe method
Studies on ion-exchange membranes. Part 1. Effect of humidity on the conductivity of Nafion® (Anantaraman, Gardner) **414**, 115

Cobalt
Control of the electro-oxidation of macrocyclic complexes of Co(II) by axial coordination (Kang, Anson) **407**, 233
Electrochemical behavior of cysteine at a Nafion®|cobalt(II) modified electrode (Sugawara et al.) **414**, 253

Cobalt phthalocyanine
Factors affecting selective electrocatalytic CO_2 reduction with cobalt phthalocyanine incorporated in a polyvinylpyridine membrane coated on a graphite electrode (Abe et al.) **412**, 125

Cobalt porphyrazine
Rotating ring–disk electrode analysis of CO_2 reduction electrocatalyzed by a cobalt tetramethylpyridoporphyrazine on the disk and detected as CO on a platinum ring (Zhang et al.) **403**, 93

Cobalt tetrakis-(*N*-methyl pyridyl)-β-octabromoporphyrin
Synthesis and studies on the electrocatalytic reduction of molecular oxygen by non-planar cobalt(II) tetrakis-(*N*-methyl pyridyl)-β-octabromoporphyrin (D'Souza et al.) **411**, 167

Colloidal gold
From monolayers to nanostructured materials: an organic chemist's view of self-assembly (Bethell et al.) **409**, 137

Colloidal systems
Ionic surface diffusion coefficients using an electrostatic patchy charge model (Cohen, Radke) **405**, 23
Complexing properties
Complexing properties of poly[3-(aza crown ether)pyrroles] to cobalt^{2+} and their catalytic properties towards oxygen reduction (Korri Youssoufi et al.) **406**, 187
Composite
Influence of synthesis conditions on polypyrrole–poly(styrenesulphonate) composite electroactivity (Otero, Sansiñena) **412**, 109
Composite conductive film
Effect of poly(acrylonitrile-co-butadiene) on the charge transfer rate in polypyrrole film (Chae et al.) **412**, 103
Composite material
Cyclic voltammetry of polyethylene stabilized hydrogen molybdenum bronzes (Endres, Schwitzgebel) **415**, 23
Computerized measurement
Experimental strategies for continuous measurements of *I–t* transients of a silver single nucleus on carbon microelectrodes (Mao et al.) **416**, 145
Computer program
Preliminary studies on fitting experimental differential capacitance to theoretical curves (Karolczak) **402**, 37
Computer simulation
Simulation and interpretation of electrochemical impedances using the network method (Horno et al.) **402**, 73
Concentration profile
Voltammetry of labile heterogeneous complexes with low diffusion coefficients (Pinheiro et al.) **402**, 47
Conducting carbon ink
Excimer laser-induced electrochemical activity in carbon ink films (Osborne et al.) **417**, 5
Conducting polymer
Anodic oxidation of 9,9-dimethyl-2-phenylfluorene: towards sequential poly(fluorene-phenylene). Comparison with polymers obtained in mixtures of oligophenylene and 9,9-dimethylfluorene (Rault-Berthelot et al.) **402**, 203
Difuryl polyenes as precursors of highly conducting electrogenerated conjugated polymers (Benahmed-Gasmi et al.) **406**, 231
Dynamic impedance measurements on a thin-film poly-3-methylthiophene electrode: memory effects and space charge formation (Semenikhin et al.) **408**, 67
Highly conductive free-standing films by electrochemical polymerisation of 3,4-dimethoxypyrrole (Merz, Graf) **412**, 11
IR study of the first redox couple of poly(*o*-toluidine). Anion involvement and potential dependence in strongly acidic solutions (Andrade et al.) **415**, 153
In situ FTIR-ATR spectroscopic investigations on the polymerization process and the redox behavior of poly(thienylpyrrole) thin film electrodes in aqueous and non-aqueous solutions. Part 1. Characterization of the polymerization process in acetonitrile containing different supporting salts (Ping, Nauer) **416**, 157
Conducting polymer films
Synthesis and electrochemical properties of poly[3-{ω-[4-(2,2′-bipyridyl)]alkyl}thiophenes], P{B(*n*)T}, and of poly[Ru(II){B(*n*)T}$_3^{2+}$] (Wang, Keene) **405**, 71
Conducting species
Dispersion of the interface of a conducting insulating zone temporarily generated in a polypyrrole film (Tezuka et al.) **402**, 161
Conduction mechanism
Electrochemical activity of poly(*N*-vinylcarbazole) films in acetonitrile solution and in acetonitrile + water mixtures. Correlation between spectroelectrochemical and EPR results (Skompska, Kudelski) **403**, 125
Conductive polymers
Ion pairing between dissolved poly(*o*-phenylenediamine) and halogenide ions (Yano, Nagaoka) **410**, 213
Conductivity
Conductivity of stoichiometric $(CH_3)_4NOH$ clathrate hydrates (Borkowska et al.) **406**, 109
Studies on ion-exchange membranes. Part 1. Effect of humidity on the conductivity of Nafion® (Anantaraman, Gardner) **414**, 115
Conformational relaxation
Thermally enhanced conformational relaxation during electrochemical oxidation of polypyrrole (Otero, Grande) **414**, 171
Conjugated dienes
Nickel-catalyzed electrochemical homocoupling of alkenyl halides: rates and mechanisms (Cannes et al.) **412**, 85
π-Conjugated polynuclear complexes
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation (Aoki) **419**, 33
Controlled current
Electroanalytical simulations. Part 16. Simulation of controlled current bulk electrolysis experiments by orthogonal collocation: general model and simple charge transfer mechanisms (Speiser) **413**, 67
Convection
A quantitative study of gravity-induced convection in two-dimensional parallel electrodeposition cells (Chazalviel et al.) **407**, 61
Co_3O_4
Enhancement of surface areas of Co_3O_4 and $NiCo_2O_4$ electrocatalysts prepared by spray pyrolysis (Nkeng et al.) **402**, 81
Copolymerization
Electrochemical copolymerization of aniline and metanilic acid (Lee, Cui) **403**, 109
Copper
Upd mechanisms of copper and thallium on a Pt(111) electrode studied by in-situ IRAS and EC-STM (Oda et al.) **409**, 95
Some experiments regarding the corrosion inhibition of copper by benzotriazole and potassium ethyl xanthate (Souto et al.) **411**, 161
Study of the equilibrium underpotential deposition of copper and the accompanying anion adsorption on rhodized electrodes in the course of cyclic voltammetric measurements (Horányi, Wasberg) **413**, 161
The influence of copper adlayer structure on the electroreduction of nitrobenzene at ordered Au(111) as studied by cyclic voltammetry combined with solution flushing tactics (Chang et al.) **415**, 169
Copper addition
Optical characterization of bismuth reversible electrodeposition (Córdoba de Torresi, Carlos) **414**, 11
Copper–ammonia complexes
The role of pH and Cu(II) concentration in the electrodeposition of Cu(II) in NH_4Cl solutions (Nila, González) **401**, 171
Copper–chloride complexes
The role of pH and Cu(II) concentration in the electrodeposition of Cu(II) in NH_4Cl solutions (Nila, González) **401**, 171
Copper electrode
A SERS study of SO_4^{2-}/Cl^- ion adsorption at a copper electrode in-situ (Brown, Hope) **405**, 211
Copper electrodeposition
The role of pH and Cu(II) concentration in the electrodeposition of Cu(II) in NH_4Cl solutions (Nila, González) **401**, 171
Copper(I)
A new simple voltammetric analysis of the kinetics of homogeneous reactions following the EC mechanism: oxidation of Cu(I) by hydrogen peroxide (Kontturi et al.) **418**, 131
Copper oxides
Photoelectrochemical kinetics on a copper electrode (Kublanovsky et al.) **415**, 161

Copper selenide
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21
Copper sulphide
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21
Copper underpotential
An extended hexagon model for Cu underpotential deposition on Au(111) (Legault et al.) **409**, 77
Apparent thermodynamic inconsistencies in surface stress measurements of copper underpotential deposition on Au(111) electrodes (Haiss, Sass) **410**, 119
C1 organic molecules
Electro-oxidation of C1 molecules at Pt-based catalysts highly dispersed into a polymer matrix: effect of the method of preparation (Napporn et al.) **404**, 155
Corrosion
A preliminary in situ ESR investigation of the structure of the iron electrode|1 M NaOH electrolyte interface (Beden et al.) **405**, 241
Electrodeposition of protective polyaniline films on mild steel (Camalet et al.) **416**, 179
Corrosion inhibition
Some experiments regarding the corrosion inhibition of copper by benzotriazole and potassium ethyl xanthate (Souto et al.) **411**, 161
Corrosion inhibitor
The polarographic behavior of the corrosion inhibitor dibenzylsulfoxide (Mutombo et al.) **405**, 223
4-Coumaric acid
Oxidation of caffeic acid and related hydroxycinnamic acids (Hapiot et al.) **405**, 169
Counter-ion influence
Polyaniline as an electrocatalytic material (Mandić, Duić) **403**, 133
Coupled electrochemical and radiotracer technique
Comparative radiotracer study of the adsorption of Cl^-, HSO_4^- (SO_4^{2-}) and $H_2PO_4^-$ anions on rhodized electrodes (Horányi, Wasberg) **404**, 291
Critical micelle concentration
Electrochemical investigations of a novel ferrocene surfactant (Jacob et al.) **416**, 83
Croconic acid
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part 3. Croconic acid oxidation on Pt(111) surfaces in acid medium (Carbó et al.) **404**, 163
Crown ether
A barium selective ferrocene ionophore exhibiting remarkable electrochemical recognition behaviour (Moutet et al.) **415**, 187
Crystal growth
Electrodeposition study on ultramicroelectrodes. Part 2. Different growth modes in Ag crystallization (Duo et al.) **404**, 99
Crystalline silicon
Etching and electrochemistry of silicon in acidic bromine solutions (Bressers et al.) **406**, 131
Electrochemistry of porous and crystalline silicon electrodes in methylviologen solutions (Kooij et al.) **406**, 139
Crystallization
Multiphase electrocrystallization in the thallium oxide system: simultaneous nucleation on sites of different nature (Tsirlina et al.) **414**, 41
Crystal structure
Lattice contractions and expansions accompanying the electrochemical conversions of Prussian blue and the reversible and irreversible insertion of rubidium and thallium ions (Dostal et al.) **406**, 155
Cu
In situ and real time study of an electrode process by differential X-ray diffraction. Part 2. Cu underpotential deposition on Au(111) (Chabala et al.) **412**, 77
Cu(II) complexes
Electrochemical behaviour of certain biomimetic copper(II) complexes in aqueous and aqueous micellar solutions (Sivagnanam, Palaniandavar) **410**, 43
Current density distributions
Numerical steady state analysis of current density distributions in axisymmetrical systems for multi-ion electrolytes: application to the rotating disc electrode (Van Den Bossche et al.) **411**, 129
Current distribution
The multi-dimensional upwinding method as a new simulation tool for the analysis of multi-ion electrolytes controlled by diffusion, convection and migration. Part 1. Steady state analysis of a parallel plane flow channel (Bortels et al.) **404**, 15
Current elimination
Theory of current elimination in linear scan voltammetry (Dračka) **402**, 19
Elimination voltammetry. Experimental verification and extension of theoretical results (Trnková, Dračka) **413**, 123
Current–potential characteristics
Electrochemistry of porous and crystalline silicon electrodes in methylviologen solutions (Kooij et al.) **406**, 139
Current–potential curves
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation (Aoki) **419**, 33
Current response
A theoretical expression for the effect of *IR* drop on the current response in a potential step experiment (Åberg, Sharp) **403**, 31
Current–rotation rate equations
The hanging meniscus rotating disk (HMRD). Part 3. Application to a charge transfer preceded by a chemical reaction in equilibrium (Villullas, López Teijelo) **418**, 159
Current–voltage waveshapes
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes (Bidwell et al.) **417**, 119
Curve fitting
Preliminary studies on fitting experimental differential capacitance to theoretical curves (Karolczak) **402**, 37
Cyanation
Post-polymerization electrochemical functionalization of a conducting polymer: anodic cyanation of poly(*p*-dimethoxybenzene) (Fabre, Simonet) **416**, 187
Cyanometallate films
Voltammetric and XPS investigations of polynuclear ruthenium-containing cyanometallate film electrodes (Cataldi et al.) **406**, 91
Cyclic reciprocal derivative chronopotentiometry
Investigations on cyclic reciprocal derivative chronopotentiometry. Part 1. Theory for a reversible reaction (Bi, Yu) **405**, 51
Cyclic voltammetry
Quantitative analysis of a mixture with reversible electrode processes by cyclic voltammetry and linear sweep voltammetry (Zhao et al.) **402**, 11
Differentiation, semidifferentiation and semi-integration of a digital signals based on Fourier transformations (Yu, Zhang) **403**, 1
Electrochemical studies of a hexaarylbiimidazole (Oliver et al.) **403**, 153
Solid state electrochemical studies of mixed nickel–iron hexacyanoferrates with the help of abrasive stripping voltammetry (Jayarama Reddy et al.) **403**, 209
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part 3. Croconic acid oxidation on Pt(111) surfaces in acid medium (Carbó et al.) **404**, 163
Electrically heated cylindrical microelectrodes. The reduction of dissolved oxygen on Pt (Zerihun, Gründler) **404**, 243
The complex nature of hydrous oxide film behaviour on platinum (Burke, Buckley) **405**, 101

Quartz crystal microbalance study of the growth of indium hexacyanoferrate films during electrodeposition and coagulation (Czirók et al.) **405**, 205
Cyclic voltammetry at gold single-crystal surfaces. Part 1. Behaviour at low-index faces (Hamelin) **407**, 1
Cyclic voltammetry at gold single-crystal surfaces. Part 2. Behaviour of high-index faces (Hamelin, Martins) **407**, 13
Self-inhibition in catalytic processes: cyclic voltammetry (Bhugun, Savéant) **408**, 5
Theory and application of cyclic voltammetry at a hemispherical microelectrode for a quasi-reversible reaction (Diao, Zhang) **410**, 155
Electrochemical and spectroscopic characterization of anodically formed nickel salen polymer films on glassy carbon, platinum, and optically transparent tin oxide electrodes in acetonitrile containing tetramethylammonium tetrafluoroborate (Dahm et al.) **410**, 163
Cyclic voltammetry and spectroelectrochemical studies of cation radical and dication adsorption behavior for 7,7′-diphenyl-7,7′-diapocarotene (Gao et al.) **411**, 51
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Electro-organic chemistry of fullerenes. Part 1. Indirect cathodic reduction of *vic*-dihalides and perfluoroalkyl halides using C_{60} as mediator. Cyclic voltammetric study and preparative-scale electrolysis (Fuchigami et al.) **411**, 115
Elimination voltammetry. Experimental verification and extension of theoretical results (Trnková, Dračka) **413**, 123
In situ spectroelectrochemistry of 2,5-diphenyl-1,3,4-oxadiazole (Kress et al.) **414**, 31
Cyclic voltammetry of polyethylene stabilized hydrogen molybdenum bronzes (Endres, Schwitzgebel) **415**, 23
Electrically heated cylindrical microelectrodes. Determination of lead on Pt by cyclic voltammetry and cathodic stripping analysis (Zerihun, Gründler) **415**, 85
The influence of copper adlayer structure on the electroreduction of nitrobenzene at ordered Au(111) as studied by cyclic voltammetry combined with solution flushing tactics (Chang et al.) **415**, 169
The direct electrochemistry of cytochrome c in the presence of various amino acids (Huang et al.) **416**, 31
Supported phospholipid membranes: comparison among different deposition methods for a phospholipid monolayer (Ding et al.) **416**, 105
Electrochemistry of cast films of ferredoxin and lipid bilayers on electrodes (Nassar et al.) **416**, 183
Cathodic electropolymerization of methacrylonitrile studied in situ by quartz crystal microbalance, cyclic voltammetry, and impedance spectroscopy (Tanguy et al.) **417**, 175
Voltammetric behavior and electronic molecular structures of several azulenylketones (Saitoh et al.) **418**, 139

Cycloalkanes
Catalytic reduction of α,ω-dihaloalkanes with nickel(I) salen as a homogeneous-phase and polymer-bound mediator (Dahm, Peters) **406**, 119

α-Cyclodextrin
Spectroelectrochemical study on monomer/dimer equilibria of methylalkylviologen cation radicals with and without α-cyclodextrin (Lee et al.) **407**, 161

β-Cyclodextrin
Electrochemistry and photoelectrochemistry of phenothiazine dye–β-cyclodextrin inclusion complexes (Retna Raj, Ramaraj) **405**, 141

Cyclodextrins
Effect of cyclodextrins on the electrochemical behaviour of ascorbic acid on gold electrodes (Manzanares et al.) **407**, 141

Cysteine
Electrocatalytic oxidation of cysteine by molybdenum(V) phthalocyanine complexes (Mafatle, Nyokong) **408**, 213
Electrochemical behavior of cysteine at a Nafion®|cobalt(II) modified electrode (Sugawara et al.) **414**, 253

Cytochrome c_3
Determination of the electrode kinetic parameters of a species immobilized on electrodes using the electroreflectance (ER) voltammogram (Feng et al.) **408**, 15
The distribution of standard rate constants for electron transfer between thiol-modified gold electrodes and adsorbed cytochrome *c* (Nahir, Bowden) **410**, 9
The direct electrochemistry of cytochrome c in the presence of various amino acids (Huang et al.) **416**, 31
Non-resonant SERS study of the adsorption of cytochrome c on a silver electrode (Niaura et al.) **416**, 167

Cytochrome c_{552}
Macroscopically rapid electron transfer of cytochrome c_{522} with high thermostability at bare and surface-modified gold electrodes (Ueyama et al.) **401**, 227

Cytochrome *c* oxidase
Direct electron transfer to cytochrome c oxidase in self-assembled monolayers on gold electrodes (Li et al.) **416**, 97

Decahedron
Crystallographic habit of gold particles grown on electrodes in acidic solutions at different electrode potentials (Lu et al.) **406**, 101

Deca-n-propylcyclopentasilane
Electrochemical oxidation of deca-n-propylcyclopentasilane $[(n\text{-}Pr)_2Si]_5$, dodecamethylcyclohexasilane $(Me_2Si)_6$ and tetradecaethylcycloheptasilane $(Et_2Si)_7$ (Becker et al.) **417**, 77

Defect site
Molecular recognition based on (3-mercaptopropyl) trimethoxysilane modified gold electrodes (Che, Cabrera) **417**, 155

Demodulation voltammetry
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 (Blankenborg et al.) **401**, 3

DEMS
Detection of CO desorbing from the Ni electrode surface by DEMS (Zinola et al.) **415**, 165

Dentine
Scanning electrochemical microscopy: amperometric probing of diffusional ion fluxes through porous membranes and human dentine (Nugues, Denuault) **408**, 125

Deposition
Layer by layer growth of chemically deposited cadmium selenide (Cachet et al.) **406**, 239

Deposition rate
Estimation of the deposition rate of thermal calcareous scaling by the electrochemical impedance technique (Gabrielli et al.) **412**, 189

Deprotonation
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Examination of reactivity of protonated and deprotonated 2,5-dimercapto-1,3,4-thiadiazole and its derivatives by electrochemical experiment and semiempirical MO calculation (Shouji et al.) **417**, 17

Desorption
Adsorption–desorption processes of redox-active osmium thiol monolayers (Bretz, Abruña) **408**, 199

Deuterium evolution
Kinetics of the deuterium and hydrogen evolution reactions at palladium in alkaline solution (Green, Britz) **412**, 59

Deuterium extraction
The insertion/extraction of deuterium (hydrogen) at Pd sheet electrodes in $D_2O(H_2O)$ + LiOD(LiOH) electrolyte (Mengoli et al.) **403**, 143

Deuterium insertion
The insertion/extraction of deuterium (hydrogen) at Pd sheet electrodes in $D_2O(H_2O)$ + LiOD(LiOH) electrolyte (Mengoli et al.) **403**, 143
Deuterons
The collective mobility of protons and deuterons in mixtures of light and heavy water (Sluyters, van Duijneveldt) **413**, 37
p-Diacetylbenzene
The reduction mechanism of the C=O group. Part 2. The electrochemical reduction of *p*-diacetylbenzene in aqueous medium (Meunier-Prest et al.) **410**, 145
Diaminonaphthalene
Electro-oxidative oligomerization of 1,5-diaminonaphthalene in acetonitrile medium (Abdel Azzem et al.) **417**, 163
Electro-oxidation of 1,5 and 1,8 diaminonaphthalene: an RDE study (Jackowska et al.) **418**, 35
Diamond
Electrochemical study of diamond thin films in neutral and basic solutions of nitrate (Bouamrane et al.) **405**, 95
Synthetic semiconductor diamond electrodes: elucidation of the equivalent circuit for the case of frequency-dependent impedance (Pleskov et al.) **413**, 105
Di-1-azulenylketones
Voltammetric behavior and electronic molecular structures of several azulenylketones (Saitoh et al.) **418**, 139
Dibenzo(c,e)-1,2-diselenine
The electrochemical oxidation of dibenzo(c,e)-1,2-diselenine to its cation radical. A voltammetric study in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **401**, 183
Dibenzo(c,e)-1,2-dithiin
The electrochemical oxidation of dibenzo(c,e)-1,2-diselenine to its cation radical. A voltammetric study in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **401**, 183
2,3,11,12-Dibenzo-5,9-diaza-4,9(10)-cis-diimino-1,13-dioxacyclopentadecane
Electrochemical behavior of a macrocyclic diimine crown ether: 2,3,11,12-dibenzo-5,9-diaza-4,9(10)-cis-diimino-1,13-dioxacyclopentadecane (Solak et al.) **408**, 119
Dibenzylsulphoxide
The polarographic behavior of the corrosion inhibitor dibenzylsulfoxide (Mutombo et al.) **405**, 223
Dication
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Dicyanomethylene derivatives
Dicyanomethylene derivatives of squaric acid: electrochemical behaviour and ESR investigation (Farnia et al.) **404**, 261
Differential–algebraic equations
A method-oriented approach to the formulation of algorithms for electrochemical kinetic simulations. Part 2. Extension to kinetic problems characterized by the simultaneous presence of bulk and interfacial species (Bieniasz) **404**, 195
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 2. Governing equations in one-dimensional geometry (Bieniasz) **406**, 45
Differential capacitance
Preliminary studies on fitting experimental differential capacitance to theoretical curves (Karolczak) **402**, 37
Differential capacity
Diffuse layer near the zero charge point in the case of non-ideal electrolyte solutions (Grafov, Damaskin) **416**, 25
Differential electrochemical mass spectroscopy
Electro-oxidation of propene on gold in acid solution studied by DEMS and FTIRS (Schmidt, Pastor) **401**, 155
Differential pulse polarography
Electrochemical behaviour and micromolar determination of the antineoplastic agent 5-azacytidine and its mixtures with the nucleoside cytidine (Marín et al.) **407**, 189
Differential pulse voltammetry
Complex electrochemistry of flavodoxin at carbon-based electrodes: results from a combination of direct electron transfer, flavin-mediated electron transfer and comproportionation (Heering, Hagen) **404**, 249
Diffusing species
Electrochemical impedance of multistep mechanisms: mechanisms with diffusing species (Harrington) **403**, 11
Diffusion
A study of the dependence of ferrocene diffusion on electrolyte concentration and size in a polymer medium using non-steady-state chronoamperometry (Dong, Zhou) **403**, 117
Hydrodynamic voltammetry with channel microband electrodes: axial diffusion effects (Alden, Compton) **404**, 27
Severe inhibition of the diffusion and electroactivity of $Cu(bpy)_2^{2+}$ complexes incorporated in Nafion® coatings on electrodes (Rong, Anson) **404**, 173
The three-dimensional simulation of short-time diffusion-controlled voltammetry at the walls of a hollow cube (Myland, Oldham) **405**, 39
Hydrogen insertion reaction with restricted diffusion. Part 1. Potential step–EIS theory and review for the direct insertion mechanism (Chen et al.) **406**, 1
Scanning electrochemical microscopy: amperometric probing of diffusional ion fluxes through porous membranes and human dentine (Nugues, Denuault) **408**, 125
Application of the finite analytic numerical method. Part 1. Diffusion problems on coplanar and elevated interdigitated microarray band electrodes (Jin et al.) **411**, 29
A study of the dependence of ferrocene diffusion on chain length in polymer electrolytes (Zhou, Dong) **414**, 121
Diffusion coefficient
Determination of mixed-valence redox centers and dynamics of charge propagation in a bulk redox-conducting solid: phospho-12-tungstic acid single crystal (Kulesza, Karwowska) **401**, 201
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Intercalation of monovalent cations in a quasi one-dimensional metal chalcogenide: a voltammetric study on $Tl_xV_6S_8$ single-crystal electrodes (Engelhard et al.) **415**, 79
Charge transport processes in electrochemically deposited poly(pyrrole) and poly(*N*-methylpyrrole) thin films (Kim et al.) **416**, 113
Diffusion coefficients and electrode kinetic parameters of different Fe(III)–sulfate complexes (Gil et al.) **417**, 129
Electro-oxidation of 1,5 and 1,8 diaminonaphthalene: an RDE study (Jackowska et al.) **418**, 35
Diffusion current
Diffusion current at the tubular band electrode by the integral equation method (Engblom et al.) **406**, 23
Diffusion–kinetics
A stability criterion for accurate simulation of electrochemical diffusion–kinetic phenomena at the rotating disk electrode and implications for simulation of diffusion–migration and other problems (Feldberg et al.) **413**, 25
Diffusion layer
Voltammetry of labile heterogeneous complexes with low diffusion coefficients (Pinheiro et al.) **402**, 47
Diffusion–migration
A stability criterion for accurate simulation of electrochemical diffusion–kinetic phenomena at the rotating disk electrode and implica-

tions for simulation of diffusion–migration and other problems (Feldberg et al.) **413**, 25

DigiSim®
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57

Digital simulation
Quantitative analysis of a mixture with reversible electrode processes by cyclic voltammetry and linear sweep voltammetry (Zhao et al.) **402**, 11
A method-oriented approach to the formulation of algorithms for electrochemical kinetic simulations. Part 2. Extension to kinetic problems characterized by the simultaneous presence of bulk and interfacial species (Bieniasz) **404**, 195
Complex electrochemistry of flavodoxin at carbon-based electrodes: results from a combination of direct electron transfer, flavin-mediated electron transfer and comproportionation (Heering, Hagen) **404**, 249
Brute force digital simulation (Britz) **406**, 15
Catalytic pathways for the electroreduction of O_2 at graphite electrodes on which a macrocyclic cobalt complex is adsorbed (Kang et al.) **413**, 165
Application of a finite analytic numerical method. Part 2. Digital simulation of charge transfer to an oblate hemispheroid microelectrode and experiment verification (Qian et al.) **414**, 1
Migrational chronoamperometry of uncharged substrates. Influence of electron transfer rate (Hyk et al.) **415**, 13
Application of the finite analytical numerical method. Part 3. Digital simulation of charge transfer to a micro-ring electrode interface (Jin et al.) **417**, 45

vic-Dihalides
Electro-organic chemistry of fullerenes. Part 1. Indirect cathodic reduction of *vic*-dihalides and perfluoroalkyl halides using C_{60} as mediator. Cyclic voltammetric study and preparative-scale electrolysis (Fuchigami et al.) **411**, 115

Dihaloalkanes
Catalytic reduction of α,ω-dihaloalkanes with nickel(I) salen as a homogeneous-phase and polymer-bound mediator (Dahm, Peters) **406**, 119

Diimine crown ether
Electrochemical behavior of a macrocyclic diimine crown ether: 2,3,11,12-dibenzo-5,9-diaza-4,9(10)-cis-diimino-1,13-dioxacyclopentadecane (Solak et al.) **408**, 119

2,5-Dimercapto-1,3,4-thiadiazole
Electrochemical study of 2,5-dimercapto-1,3,4-thiadiazole in acetonitrile (Picart, Geniès) **408**, 53

Dimerization
Molecular dynamics of the dimerization of $NaB\phi_4$ in 1,2-dimethoxyethane and tetrahydrofuran (Xu et al.) **401**, 45

1,2-Dimethoxyethane
Molecular dynamics of the dimerization of $NaB\phi_4$ in 1,2-dimethoxyethane and tetrahydrofuran (Xu et al.) **401**, 45

4,5-Dimethoxy-o-benzoquinone
Electrochemical study of catechol and 4-methylcatechol in methanol. Application to the electro-organic synthesis of 4,5-dimethoxy- and 4-methoxy-5-methyl-o-benzoquinone (Nematollahi, Golabi) **405**, 133

N,N′-Dimethyl-2,7-diazapyrenium
N,N′-dimethyl-2,7-diazapyrenium: a redox-dependent receptor for aromatic carboxylates (Lilienthal et al.) **414**, 107

Dimethylformamide
Electrochemical reduction of tetraalkylammonium tetrafluoroborates at carbon cathodes in dimethylformamide (Dahm, Peters) **402**, 91

9,9-Dimethyl-2-phenylfluorene
Anodic oxidation of 9,9-dimethyl-2-phenylfluorene: towards sequential poly(fluorene-phenylene). Comparison with polymers obtained in mixtures of oligophenylene and 9,9-dimethylfluorene (Rault-Berthelot et al.) **402**, 203

Dimethylsulphoxide
Steady state voltammetry for reduction of cadmium at a Pt microelectrode in dimethylsulphoxide with and without supporting electrolyte (Daniele et al.) **407**, 149

Dinitrophenyl antibody
Amperometric amplification of antigen–antibody association at monolayer interfaces: design of immunosensor electrodes (Katz, Willner) **418**, 67

Diols
Electrocatalytic oxidation of aliphatic diols on platinum. Part 4. A kinetic study by means of chromatographic analyses during prolonged electrolyses (Hilmi et al.) **410**, 101

Dioxygen
Isotope and surface preparation effects on alkaline dioxygen reduction at carbon electrodes (Xu et al.) **410**, 235
Catalysis of dioxygen reduction to hydrogen peroxide at the surface of carbon paste electrodes modified by 1,4-naphthoquinone and some of its derivatives (Golabi, Raoof) **416**, 75

1,5-Diphenylcarbazide
Electrochemical study of 1,5-diphenylcarbazide and 1,5-diphenylcarbazone in 0.3 M $HClO_4$ (Ramírez et al.) **410**, 203

1,5-Diphenylcarbazone
Electrochemical study of 1,5-diphenylcarbazide and 1,5-diphenylcarbazone in 0.3 M $HClO_4$ (Ramírez et al.) **410**, 203

2,5-Diphenyl-1,3,4-oxadiazole
In situ spectroelectrochemistry of 2,5-diphenyl-1,3,4-oxadiazole (Kress et al.) **414**, 31

Diquat
Square wave voltammetric determination of paraquat and diquat in aqueous solution (Walcarius, Lamberts) **406**, 59

Direct electron transfer
Direct electron transfer to cytochrome c oxidase in self-assembled monolayers on gold electrodes (Li et al.) **416**, 97

Dispersion
Dispersion of the interface of a conducting insulating zone temporarily generated in a polypyrrole film (Tezuka et al.) **402**, 161

Disproportionation
Control of the electrochemical reduction of horminone by pH imposition in acetonitrile (Ortiz et al.) **411**, 103

Dissolution
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part I: Effect of temperature and alkali carbonate mixture (Reeve, Tseung) **403**, 69
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part II: Effect of $SrCO_3$, $BaCO_3$ and SnO_2 additives (Reeve, Tseung) **403**, 85

Disulphide reduction
The chronopotentiometric reduction of proteins adsorbed on mercury (Honeychurch, Ridd) **418**, 185

Disulphides
Examination of the cleavage and formation of the disulfide bond in poly[dithio-2,5-(1,3,4-thiadiazole)] by redox reaction (Shouji, Oyama) **410**, 229

Disulphide–thiolate redox couple
Electrochemical study of 2,5-dimercapto-1,3,4-thiadiazole in acetonitrile (Picart, Geniès) **408**, 53

2,5-Di-(-2-thienyl)-thiophene
Electrogeneration and solubilities of oxidized poly(2,5-di-(-2-thienyl)-thiophene) (Carrasco et al.) **418**, 115

Dithioacetals
Electrolytic partial fluorination of organic compounds. Part 16. Selective indirect anodic fluorination of dithioacetals using a bromine mediator (Fuchigami, Sano) **414**, 81

DNA-modified electrode
Modification of glassy carbon and gold electrodes with DNA (Pang et al.) **403**, 183

D_2O
The insertion/extraction of deuterium (hydrogen) at Pd sheet electrodes in $D_2O(H_2O)$ + LiOD(LiOH) electrolyte (Mengoli et al.) **403**, 143
Dodecamethylcyclohexasilane
Electrochemical oxidation of deca-n-propylcyclopentasilane $[(n\text{-}Pr)_2Si]_5$, dodecamethylcyclohexasilane $(Me_2Si)_6$ and tetradecaethylcycloheptasilane $(Et_2Si)_7$ (Becker et al.) **417**, 77
Dopa
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
Dopamine
Zeolite-modified carbon paste electrode for selective monitoring of dopamine (Wang, Walcarius) **407**, 183
Catalytic oxidation of dopamine at a microdisk platinum electrode modified by electrodeposition of nickel hexacyanoferrate and Nafion® (Zhou et al.) **408**, 219
Doping
Fullerene film electrodes in aqueous solutions. Part 2. Effects of doping cations (Szűcs et al.) **402**, 137
Electrochemical doping and dedoping of vacuum deposited poly(p-phenylene) thin films as studied by in situ spectrocyclic voltammetry (Miyashita, Kaneko) **403**, 53
Reversible chemical doping of self-assembled poly(3-octylthiophene) monolayers on gold electrodes (Gao, Siow) **412**, 179
Double electrode
The multigrid method, MGD1: an efficient and stable approach to electrochemical modelling. The simulation of double electrode problems (Alden, Compton) **415**, 1
Double-film modified electrode
Catalytic oxidation of dopamine at a microdisk platinum electrode modified by electrodeposition of nickel hexacyanoferrate and Nafion® (Zhou et al.) **408**, 219
Double layer
Sulfate-modified zirconia catalysts: the role of surface electrification on the features of the sulfate adsorption process (Ardizzone, Grassi) **417**, 193
Double potential step chronoamperometry
Double potential step chronoamperometry at spherical electrodes (HMDE and DME) for long pulse durations (Galvez) **413**, 15
Double potential step techniques
Theory of the EC′ electrode process in double potential step techniques (Galvez) **401**, 21
Dropping liquid electrodes
Electrode kinetics and the nature of the metal electrode. Part 2. The Zn(II)/Zn electrode reaction studied at dropping gallium and mercury (micro)electrodes (Van Venrooij et al.) **419**, 61
Dropping mercury microelectrode
On the potential dependence of the preceding chemical step in the Cd(II) reduction from aqueous KF solutions: a DMμE study (Baars et al.) **404**, 151
Dual-disk microelectrode
Fabrication of a platinum dual-disk microelectrode and investigation of its properties (Zhang, Zhou) **415**, 65
Dynamic impedance spectroscopy
Dynamic impedance measurements on a thin-film poly-3-methylthiophene electrode: memory effects and space charge formation (Semenikhin et al.) **408**, 67
Dynamic measurements
Measurement of uncompensated resistance and double layer capacitance during the course of a dynamic measurement: correction for *IR* drop and charging currents in arbitrary voltammetric techniques (Åberg) **419**, 99
Ebselen
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
EC′ electrode process
Theory of the EC′ electrode process in double potential step techniques (Galvez) **401**, 21
ECE reaction
Electrochemical synthesis and redox properties of a polyruthenocene electrode film (Shimura et al.) **403**, 219
EC mechanism
A new simple voltammetric analysis of the kinetics of homogeneous reactions following the EC mechanism: oxidation of Cu(I) by hydrogen peroxide (Kontturi et al.) **418**, 131
Electrical properties
A network approach to simulation of electrical properties of symmetric electrochemical cells (Moya et al.) **413**, 1
Electric double layer structure
Infrared spectroscopic study of electric double layers on Pt(111) under electrode reactions in a sulfuric acid solution (Shingaya et al.) **409**, 103
Influence of the surface structure of cadmium electrodes on the electric double layer parameters in aqueous surface-inactive electrolyte solutions (Lust et al.) **413**, 111
Electric potential
Electric potential near a charged metal surface in contact with aqueous electrolyte (Philpott, Glosli) **409**, 65
Electrified interface
Appropriate and inappropriate statistical mechanical treatments for phase transitions at electrified interfaces (Nikitas) **408**, 1
On a new theoretical approach to electrified interfaces (Stafiej, Badiali) **409**, 73
Electro-activated glassy carbon electrode
Electrochemical immobilization of horseradish peroxidase on an electro-activated glassy carbon electrode (Zhang et al.) **419**, 85
Electroactivity
The influence of defects in polyaniline structure on its electroactivity: optimization of 'self-doped' polyaniline synthesis (Karyakin et al.) **402**, 217
Severe inhibition of the diffusion and electroactivity of $Cu(bpy)_2^{2+}$ complexes incorporated in Nafion® coatings on electrodes (Rong, Anson) **404**, 173
Electroadsorption
CO adsorption and oxidation on a Pt(111) electrode modified by ruthenium deposition: an IR spectroscopic study (Friedrich et al.) **402**, 123
Chloride adsorption at the Au(111) electrode surface (Shi, Lipkowski) **403**, 225
Structure and stability of cytosine adlayers on Au(111): an in-situ STM study (Wandlowski et al.) **404**, 215
Electrocapillary
A new method for rapid determination of the potential of zero charge for gold|solution interfaces (Chen et al.) **414**, 53
Electrocapillary curves
Electrocapillary curves of polycrystalline gold in aqueous solutions of pyridine (Efimov, Heusler) **414**, 75
Electrocatalysis
Electrocatalytic reduction of halothane (Langmaier, Samec) **402**, 107
Polyaniline as an electrocatalytic material (Mandić, Duić) **403**, 133
Electrocatalytic deposition of poly(3-bromothiophene) (Zhao, Pickup) **404**, 55
Metal-dispersed porous carbon films as electrocatalytic sensors (Wang et al.) **404**, 137

Electrocatalytic activity of N,N′,N″,N‴-tetramethyl-tetra-3,4-pyridoporphyrazinocobalt(II) adsorbed on a graphite electrode towards the oxidation of hydrazine and hydroxylamine (Jiujun Zhang et al.) **406**, 203
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Electrochemical and electrocatalytic properties of polypyrrole film doped with heteropolyanions (Wang, Li) **408**, 77
pH-switched electrochemistry of pyrroloquinoline quinone at Au electrodes modified by functionalized monolayers (Katz et al.) **408**, 107
Electrocatalysis for N_2O reduction on metal electrodes (Kudo, Mine) **408**, 267
Electrocatalytic reduction of peroxodisulfate anion on Au(111) in acidic aqueous solutions (Samec et al.) **409**, 165
Electrochemistry of *cis*-diaquo ruthenium(II) complexes with substituted 2,2′-bipyridine ligands in a non-coordinating solvent. Application to the elaboration of corresponding functionalized polypyrrole films (Collomb-Dunand-Sauthier et al.) **410**, 21
Electrocatalytic oxidation of aliphatic diols on platinum. Part 4. A kinetic study by means of chromatographic analyses during prolonged electrolyses (Hilmi et al.) **410**, 101
Electrocatalytic oxidation of alcohols on glassy carbon electrodes electrochemically modified by conductive polymeric nickel(II) tetrakis(3-methoxy-4-hydroxyphenyl)porphyrin film (Ciszewski, Milczarek) **413**, 137
Voltammetry in the presence of ultrasound: surface and solution processes in the sonovoltammetric reduction of nitrobenzene at glassy carbon and gold electrodes (Marken et al.) **414**, 95
Study of sulphur adlayers on polyoriented platinum electrodes: influence on the electrocatalysis of the SO_2 oxidation reaction (Quijada et al.) **414**, 229
The electrocatalytic reactions of oxidation and evolution of hydrogen on iridium electrodes modified by sulphur adsorption (Lamy-Pitara, Barbier) **416**, 47
Catalysis of dioxygen reduction to hydrogen peroxide at the surface of carbon paste electrodes modified by 1,4-naphthoquinone and some of its derivatives (Golabi, Raoof) **416**, 75
Electrocatalytic reduction of organic peroxides in organic solvents by microperoxidase-11 immobilized as a monolayer on a gold electrode (Moore et al.) **417**, 189

Electrocatalyst
Enhancement of surface areas of Co_3O_4 and $NiCo_2O_4$ electrocatalysts prepared by spray pyrolysis (Nkeng et al.) **402**, 81
Electrocatalytic oxidation of ethylene glycol in 0.5 M H_2SO_4 and 0.5 M NaOH solutions at a bimetallic deposited electrode (Ureta-Zañartu et al.) **405**, 159
Influence of carbon surface pre-oxidation on the properties of silver + carbon electrocatalysts (Yang, Zhou) **415**, 143

Electrocatalytic activity
Electrochemical formation of cationic iridium(III)–hydrido complexes in solution and in polymeric films: their chemical, electrochemical and electrocatalytic activity in the hydrogen generation process (Caix et al.) **403**, 189

Electrocatalytic CO_2 reduction
Factors affecting selective electrocatalytic CO_2 reduction with cobalt phthalocyanine incorporated in a polyvinylpyridine membrane coated on a graphite electrode (Abe et al.) **412**, 125

Electrocatalytic oxidation
Electrocatalytic oxidation of cysteine by molybdenum(V) phthalocyanine complexes (Mafatle, Nyokong) **408**, 213

Electrocatalytic reduction
Electrocatalytic reduction of nitrite by copper complexes of 1,10-phenanthroline and 2,2′ : 6′,2″-terpyridine (Fung, Wong) **401**, 263
Synthesis and studies on the electrocatalytic reduction of molecular oxygen by non-planar cobalt(II) tetrakis-(*N*-methyl pyridyl)-β-octabromoporphyrin (D'Souza et al.) **411**, 167

Electrochemical assay
Electrochemical assay and properties of plasmin adsorbed onto a carbon paste electrode (Longchamp et al.) **412**, 31

Electrochemical behaviour
The complex nature of hydrous oxide film behaviour on platinum (Burke, Buckley) **405**, 101
Electrochemical behavior of the molybdotungstate heteropoly complex with neodymium, $K_{10}H_3[Nd(SiMo_7W_4O_{39})_2]\cdot xH_2O$ in aqueous solution (Cheng et al.) **407**, 97
Electrochemical behaviour of spin-coated films of vanadium pentoxide xerogel in aqueous electrolyte. Electron transfer between vanadium centres in the gel layers and intercalated tris (2,2′-bipyridyl) metal cations (Whalen, Villemure) **411**, 43

Electrochemical cells
Simulation and interpretation of electrochemical impedances using the network method (Horno et al.) **402**, 73

Electrochemical characterization
Electrochemical investigations of a novel ferrocene surfactant (Jacob et al.) **416**, 83

Electrochemical cleavage
The electrochemical cleavage of the nitrobenzoyl group from butyl nitrobenzoates in N,N-dimethylformamide (Alves Jorge, Stradiotto) **415**, 27

Electrochemical deposition
In situ optical second harmonic generation studies of electrochemical deposition of tellurium on polycrystalline gold electrodes (Yagi et al.) **401**, 95

Electrochemical diffusion–reaction
Brute force digital simulation (Britz) **406**, 15

Electrochemical DNA biosensor
Modification of glassy carbon and gold electrodes with DNA (Pang et al.) **403**, 183

Electrochemical impedance
Electrochemical impedance of multistep mechanisms: mechanisms with diffusing species (Harrington) **403**, 11

Electrochemical impedance spectroscopy
Hydrogen insertion reaction with restricted diffusion. Part 1. Potential step–EIS theory and review for the direct insertion mechanism (Chen et al.) **406**, 1
An investigation of the hydrogen absorption reaction into, and the hydrogen evolution reaction from, a Pd foil electrode (Yang, Pyun) **414**, 127
Impedance of the interface: electrode|frozen electrolyte containing redox active ions (Opallo) **418**, 91

Electrochemical interface
Simultaneous STM and Raman measurements on electrochemical interfaces (Tian et al.) **401**, 247
In situ and real time study of an electrode process by differential X-ray diffraction. Part 1. Ag underpotential deposition on Au(111) (Chabala et al.) **412**, 67

Electrochemical kinetics
A method-oriented approach to the formulation of algorithms for electrochemical kinetic simulations. Part 2. Extension to kinetic problems characterized by the simultaneous presence of bulk and interfacial species (Bieniasz) **404**, 195
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 1. Problem parameters and initial conditions (Bieniasz) **406**, 33
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of

arbitrary complexity. Part 2. Governing equations in one-dimensional geometry (Bieniasz) **406**, 45
pH-switched electrochemistry of pyrroloquinoline quinone at Au electrodes modified by functionalized monolayers (Katz et al.) **408**, 107
Electrochemical mass spectrometry
The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215
Electrochemical oscillators
Stability study and categorization of electrochemical oscillators by impedance spectroscopy (Koper) **409**, 175
Electrochemical oxidation
The electrochemical oxidation of dibenzo(c,e)-1,2-diselenine to its cation radical. A voltammetric study in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **401**, 183
Changes in the population of neutral species and charge carriers during electrochemical oxidation of polypyrrole (Fermín et al.) **401**, 207
Anodic oxidation of 9,9-dimethyl-2-phenylfluorene: towards sequential poly(fluorene-phenylene). Comparison with polymers obtained in mixtures of oligophenylene and 9,9-dimethylfluorene (Rault-Berthelot et al.) **402**, 203
Dicyanomethylene derivatives of squaric acid: electrochemical behaviour and ESR investigation (Farnia et al.) **404**, 261
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
Catalysis of the electrochemical oxidation of glucose by glucose oxidase and a single electron cosubstrate: kinetics in viscous solutions (Anicet et al.) **410**, 199
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35
Studies on electrochemical oxidation of non-aqueous electrolyte on the $LiCoO_2$ thin film electrode (Kanamura et al.) **419**, 77
Electrochemical polymerization
Electrochemical polymerization of the tetrathienyl derivatives of the carbon group elements (Visy et al.) **401**, 119
In situ FTIR-ATR spectroscopic investigations on the polymerization process and the redox behavior of poly(thienylpyrrole) thin film electrodes in aqueous and non-aqueous solutions. Part 1. Characterization of the polymerization process in acetonitrile containing different supporting salts (Ping, Nauer) **416**, 157
Electrochemical properties
Electrochemical properties of poly[3-(ω-4-pyridylalkyl)thiophenes] (Wang, Keene) **405**, 59
The electrochemical properties of an oligomeric viologen film (Lieder, Schläpfer) **411**, 87
Electrochemical quartz crystal microbalance
A carbon single crystal electrode for an electrochemical quartz crystal microbalance study (Wang et al.) **419**, 1
Electrochemical recognition
A barium selective ferrocene ionophore exhibiting remarkable electrochemical recognition behaviour (Moutet et al.) **415**, 187
Electrochemical studies of *N*-phenylaza-15-crown-5 (Mortimer, Weightman) **418**, 1
Electrochemical reduction
Electrochemical reduction of tetraalkylammonium tetrafluoroborates at carbon cathodes in dimethylformamide (Dahm, Peters) **402**, 91
Electrochemical reduction of the final product of vitamin B-6 catabolism: a spectroscopic characterization of the reduced products of 4-pyridoxic acid (Pineda et al.) **403**, 101
Electrochemical reduction of CO_2 with high current density in a CO_2 + methanol medium at various metal electrodes (Saeki et al.) **404**, 299
The electrochemical dissolution of iron(III) and chromium(III) oxides and ferrites under conditions of abrasive stripping voltammetry (Grygar) **405**, 117
Electrocatalysis for N_2O reduction on metal electrodes (Kudo, Mine) **408**, 267
Control of the electrochemical reduction of horminone by pH imposition in acetonitrile (Ortiz et al.) **411**, 103
Electrochemical relaxation model
Thermally enhanced conformational relaxation during electrochemical oxidation of polypyrrole (Otero, Grande) **414**, 171
Electrochemical sensors
Electropolymerization of ferrocene bis-amide derivatives: a possible route to an electrochemical sensory device (Moutet et al.) **410**, 79
Electrochemical studies
Electrochemical study of catechol and 4-methylcatechol in methanol. Application to the electro-organic synthesis of 4,5-dimethoxy- and 4-methoxy-5-methyl-o-benzoquinone (Nematollahi, Golabi) **405**, 133
Electrochemical and spectroscopic studies of the mechanism of monolayer and multilayer adsorption of an insoluble surfactant at the Au(111)|electrolyte interface (Bizzotto, Lipkowski) **409**, 33
Electrochemical synthesis
Electrochemical and chemical synthesis of polyaniline on the surface of vacuum deposited polyaniline films (Nekrasov et al.) **412**, 133
Electrochemical thermocurrents
Thermally enhanced conformational relaxation during electrochemical oxidation of polypyrrole (Otero, Grande) **414**, 171
Electrochemiluminescence
Micellar halide and energy transfer effects in electrochemiluminescence (Rypka, Lasovský) **416**, 41
Electrochemistry
Adsorption and oxidation of thiophene-3-methanol on platinum electrodes studied by electrochemical and IR spectroscopic methods (Pohjakallio et al.) **401**, 191
Time-resolved in situ and real time study of an electrode process by differential X-ray diffraction: Ag underpotential deposition on Au(111) (Chabala, Rayment) **401**, 257
Electrochemical doping and dedoping of vacuum deposited poly(p-phenylene) thin films as studied by in situ spectrocyclic voltammetry (Miyashita, Kaneko) **403**, 53
Charge-selectivity of the monolayer modified gold electrode for the electrochemical oxidation of catechol derivatives (Takehara et al.) **404**, 181
Electrochemical and spectroelectrochemical study of the oxidation of S_4^{2-} and S_6^{2-} ions in liquid ammonia (Levillain et al.) **405**, 85
Electrochemical study of diamond thin films in neutral and basic solutions of nitrate (Bouamrane et al.) **405**, 95
Electrochemistry and photoelectrochemistry of phenothiazine dye–β-cyclodextrin inclusion complexes (Retna Raj, Ramaraj) **405**, 141
Analysis of the long-term potential stability of an all-solid-state potassium-selective electrode with electroactive polypyrrole film (Momma et al.) **407**, 91
Electrochemical behaviour and micromolar determination of the antineoplastic agent 5-azacytidine and its mixtures with the nucleoside cytidine (Marín et al.) **407**, 189
Electrochemical behavior of a macrocyclic diimine crown ether: 2,3,11,12-dibenzo-5,9-diaza-4,9(10)-cis-diimino-1,13-dioxacyclopentadecane (Solak et al.) **408**, 119
Electrochemical oxidation of thiourea studied by use of in situ FTIR spectroscopy (Yan et al.) **408**, 225
Vibrational spectroscopy of the electrochemical interface by visible infrared sum frequency generation (Tadjeddine, Peremans) **409**, 115

Electrochemistry of alumina pillared clay modified electrodes (Petridis et al.) **410**, 93
Investigation on the electrochemistry and etching at the (100)GaAs|HIO_3 interface (Verpoort et al.) **411**, 67
Electrochemical anion doping of poly[(tetraethyldisilanylene)oligo (2,5-thienylene)] derivatives and their p-type semiconducting properties (Kunugi et al.) **414**, 135
Determination of heterogeneous rate constants for the electrochemical reduction of fullerene C_{60} by the method of cyclic voltammetry on a hemispherical ultramicroelectrode (Diao, Zhang) **414**, 177
Electrochemistry in UHV: generation of lithium from all-solid-state cells (Roy, Bruce) **415**, 33
Randomly oriented graphite electrode. Part 1. Effect of electrochemical pretreatment on the electrochemical behavior and chemical composition of the electrode (Regisser et al.) **415**, 47
The electrochemical properties of oligomeric viologen films immobilised by polyacids (Lieder, Schläpfer) **416**, 89
Electrochemistry of C_{82}: relationship to metallofullerene electrochemistry (Burbank et al.) **417**, 1
Behaviour of nickel species in molten $Li_2CO_3 + Na_2CO_3 + K_2CO_3$. Part 2. Electrochemical characterization under $P(CO_2) = 0.1$ atm + $P(O_2) = 0.9$ atm, $P(Ar) = 1$ atm and $P(O_2) = 1$ atm (Malinowska et al.) **417**, 135
Electrochemical behaviour of poly(2,5-di-(-2-thienyl)-thiophene): properties of the reduced polymer (Brillas et al.) **418**, 123

Electrochemistry of Pb|RVC
Electrochemical behavior of lead deposited on reticulated vitreous carbon (Czerwiński, Żelazowska) **410**, 55

Electrochromic films
Optical, spectroelectrochemical and structural properties of sol–gel derived Ni-oxide electrochromic film (Šurca et al.) **408**, 83
Optical characterization of bismuth reversible electrodeposition (Córdoba de Torresi, Carlos) **414**, 11

Electrochromic properties
Electrochemical, electrochromic and photoelectrochemical behavior of a highly soluble polyaniline derivative: poly(*o*-methoxyaniline) doped with functionalized organic acids (Gazotti, Jr. et al.) **415**, 107

Electrochromism
Electrochromic behavior of electrodeposited tungsten oxide thin films (Yao et al.) **406**, 223

Electrocomposite photoelectrodes
Metal/semiconductor electrocomposite photoelectrodes: behavior of Ni/TiO_2 photoanodes and comparison of photoactivity of anatase and rutile modifications (Zhou et al.) **402**, 221

Electrocrystallization model
Electrochemical nucleation on disc-shaped ultramicroelectrodes: theoretical aspects (Correia et al.) **407**, 37

Electrode
Investigations on cyclic reciprocal derivative chronopotentiometry. Part 1. Theory for a reversible reaction (Bi, Yu) **405**, 51
Electrocatalytic oxidation of ethylene glycol in 0.5 M H_2SO_4 and 0.5 M NaOH solutions at a bimetallic deposited electrode (Ureta-Zañartu et al.) **405**, 159
Electrochemical oxidation of dihydronicotinadmide adenine dinucleotide (NADH) on single crystal gold electrodes (Xing et al.) **406**, 83
Electrochemistry of alumina pillared clay modified electrodes (Petridis et al.) **410**, 93

Electrode activation
Excimer laser-induced electrochemical activity in carbon ink films (Osborne et al.) **417**, 5

Electrode kinetic parameters
Diffusion coefficients and electrode kinetic parameters of different Fe(III)–sulfate complexes (Gil et al.) **417**, 129

Electrode kinetics
Electrode kinetics and the nature of the metal electrode. Part 1. Zn^{2+} reduction from aqueous 1 M $NaClO_4$ solution at indium and thallium amalgams of varied composition (Koene et al.) **402**, 57
Electroreduction of thionicotinamide on mercury electrodes in aqueous solutions (Expósito et al.) **402**, 211
On the electroreduction of the anions of pyridine monocarboxylic acid *N*-oxides on mercury electrodes in basic solutions (Angulo, Rodríguez Mellado) **403**, 251
Determination of rate constants of electrode reactions by methods of semi-integral electrochemistry applied to chronoamperometric and chronocoulometric curves (González-Morín et al.) **411**, 1
A contribution to the elucidation of the reduction mechanism of thioisonicotinamide on mercury electrodes (Ruiz Montoya, Rodríguez Mellado) **417**, 113
Electrode kinetics and the nature of the metal electrode. Part 2. The Zn(II)/Zn electrode reaction studied at dropping gallium and mercury (micro)electrodes (Van Venrooij et al.) **419**, 61

Electrode modification
pH-switched electrochemistry of pyrroloquinoline quinone at Au electrodes modified by functionalized monolayers (Katz et al.) **408**, 107

Electrodeoxidation
A study by impedance spectroscopy of the reactivity of freshly polished galena electrodes: oxidation and interaction with ethylxanthate (Pauporté, Schuhmann) **404**, 123

Electrode poisoning
CO adsorption and oxidation on a Pt(111) electrode modified by ruthenium deposition: an IR spectroscopic study (Friedrich et al.) **402**, 123

Electrodeposited film
Electrochromic behavior of electrodeposited tungsten oxide thin films (Yao et al.) **406**, 223

Electrodeposition
Electrochemical copolymerization of aniline and metanilic acid (Lee, Cui) **403**, 109
Electrocatalytic deposition of poly(3-bromothiophene) (Zhao, Pickup) **404**, 55
Electrodeposition study on ultramicroelectrodes. Part 2. Different growth modes in Ag crystallization (Duo et al.) **404**, 99
Mechanism of lead dioxide electrodeposition (Velichenko et al.) **405**, 127
Quartz crystal microbalance study of the growth of indium hexacyanoferrate films during electrodeposition and coagulation (Czirók et al.) **405**, 205
In-situ study of the electrochemical deposition process of CdTe and $Hg_xCd_{1-x}Te$ using laser-scanning photoelectrochemical microscopy (You et al.) **405**, 233
Difuryl polyenes as precursors of highly conducting electrogenerated conjugated polymers (Benahmed-Gasmi et al.) **406**, 231
A quantitative study of gravity-induced convection in two-dimensional parallel electrodeposition cells (Chazalviel et al.) **407**, 61
Formation in situ of electrodeposited fulleride film on a microelectrode (Cheng et al.) **408**, 101
Electrodeposition of indium selenide In_2Se_3 (Massaccesi et al.) **412**, 95
Cathodic electrodeposition of Se on Ti electrodes (Cattarin et al.) **415**, 123
Experimental strategies for continuous measurements of *I–t* transients of a silver single nucleus on carbon microelectrodes (Mao et al.) **416**, 145
Electrodeposition of In + As thin film alloys and their conversion to $InAs_xP_{1-x}$ by PH_3 treatment (Dalchiele et al.) **418**, 83

Electrode potential
Crystallographic habit of gold particles grown on electrodes in acidic solutions at different electrode potentials (Lu et al.) **406**, 101

Electrode process distinction
Elimination voltammetry. Experimental verification and extension of theoretical results (Trnková, Dračka) **413**, 123
Electrode reactions
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 (Blankenborg et al.) **401**, 3
Impedance of the interface: electrode|frozen electrolyte containing redox active ions (Opallo) **418**, 91
Electrodes
Severe inhibition of the diffusion and electroactivity of $Cu(bpy)_2^{2+}$ complexes incorporated in Nafion® coatings on electrodes (Rong, Anson) **404**, 173
Electroenzymatic amplification
A kinetic model for the electroenzymatic processes involved in polyphenol-oxidase-based amperometric catechol sensors (Desprez, Labbé) **415**, 191
Electrogeneration
Electrogeneration and solubilities of oxidized poly(2,5-di-(-2-thienyl)-thiophene) (Carrasco et al.) **418**, 115
Electroluminescence
Electrochemistry of porous and crystalline silicon electrodes in methylviologen solutions (Kooij et al.) **406**, 139
Electrolysis
Electrolytic partial fluorination of organic compounds. Part 16. Selective indirect anodic fluorination of dithioacetals using a bromine mediator (Fuchigami, Sano) **414**, 81
Electrolyte
Anomalies of staircase voltammetric peaks obtained for the reduction of metal ions in the absence of supporting electrolyte (Donten, Stojek) **405**, 183
Electrolyte effects
A study of the dependence of ferrocene diffusion on electrolyte concentration and size in a polymer medium using non-steady-state chronoamperometry (Dong, Zhou) **403**, 117
Electrolyte electroreflectance
The scanning microscope for semiconductor characterization (SMSC): study of the influence of surface morphology on the photoelectrochemical behavior of an n-$MoSe_2$ single crystal electrode by photocurrent and electrolyte electroreflectance imaging (Martínez Chaparro et al.) **418**, 175
Electron donor/acceptor property
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Electronically conducting polymers
Charge transport processes in electrochemically deposited poly(pyrrole) and poly(*N*-methylpyrrole) thin films (Kim et al.) **416**, 113
Electronic conducting polymer
Post-polymerization electrochemical functionalization of a conducting polymer: anodic cyanation of poly(*p*-dimethoxybenzene) (Fabre, Simonet) **416**, 187
Electronic conductivity
Charge transport processes in electrochemically deposited poly(pyrrole) and poly(*N*-methylpyrrole) thin films (Kim et al.) **416**, 113
Electronic structure
Spectroelectrochemical studies of poly-*o*-phenylenediamine. Part 1. In situ resonance Raman spectroscopy (Wu et al.) **417**, 53
Voltammetric behavior and electronic molecular structures of several azulenylketones (Saitoh et al.) **418**, 139
Electron transfer
Macroscopically rapid electron transfer of cytochrome c_{522} with high thermostability at bare and surface-modified gold electrodes (Ueyama et al.) **401**, 227
The distribution of standard rate constants for electron transfer between thiol-modified gold electrodes and adsorbed cytochrome *c* (Nahir, Bowden) **410**, 9
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21
Electron transfer rate
Determination of the electrode kinetic parameters of a species immobilized on electrodes using the electroreflectance (ER) voltammogram (Feng et al.) **408**, 15
Migrational chronoamperometry of uncharged substrates. Influence of electron transfer rate (Hyk et al.) **415**, 13
Electron work function
The role of the metal in determining electrosorption valency in the case of strong molecular adsorption at the electrode|solution interface (Calvente et al.) **401**, 231
Electro-organic synthesis
Electrochemical study of catechol and 4-methylcatechol in methanol. Application to the electro-organic synthesis of 4,5-dimethoxy- and 4-methoxy-5-methyl-o-benzoquinone (Nematollahi, Golabi) **405**, 133
Electro-oxidation
Electro-oxidation of propene on gold in acid solution studied by DEMS and FTIRS (Schmidt, Pastor) **401**, 155
The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215
CO adsorption and oxidation on a Pt(111) electrode modified by ruthenium deposition: an IR spectroscopic study (Friedrich et al.) **402**, 123
Electro-oxidation of C1 molecules at Pt-based catalysts highly dispersed into a polymer matrix: effect of the method of preparation (Napporn et al.) **404**, 155
Oxidation of caffeic acid and related hydroxycinnamic acids (Hapiot et al.) **405**, 169
Electrochemical studies of the oxidation of sterically hindered pyrroles and thiophenes (Audebert et al.) **407**, 169
Control of the electro-oxidation of macrocyclic complexes of Co(II) by axial coordination (Kang, Anson) **407**, 233
Electrocatalytic oxidation of carbon monoxide at lower potentials on platinum-based alloys incorporated in polyaniline (Napporn et al.) **408**, 141
Electrochemical study of intramolecular charge transfer complexes derived from 1,4-naphthoquinone. Part 2. Electro-oxidation of 2-substituted 3-arylamino-1,4-naphthoquinone autocomplexes (Turovska et al.) **414**, 221
Electro-oxidation of 1,5 and 1,8 diaminonaphthalene: an RDE study (Jackowska et al.) **418**, 35
Electro-oxidative oligomerization
Electro-oxidative oligomerization of 1,5-diaminonaphthalene in acetonitrile medium (Abdel Azzem et al.) **417**, 163
Electropolymer
Double electropolymer modified platinum electrode to follow the kinetic process H_2O_2 + ascorbic acid. Influence of the reaction on amperometric biosensor applications (Losito, Zambonin) **410**, 181
Electropolymerization
Electropolymerization of iron phenanthrolines and voltammetric response for pH and application on electrocatalytic sulfite oxidation (Chen) **401**, 147
The influence of defects in polyaniline structure on its electroactivity: optimization of 'self-doped' polyaniline synthesis (Karyakin et al.) **402**, 217
Preparation and characterization of a novel redox polymer based on salicyl-*N*-phenylene-1,4-diamine (Davis et al.) **403**, 213

Electrochemical synthesis and redox properties of a polyruthenocene electrode film (Shimura et al.) **403**, 219
Synthesis and electrochemical properties of poly[3-{ω-[4-(2,2′-bipyridyl)]alkyl}thiophenes], P{B(*n*)T}, and of poly[Ru(II){B(*n*)T}$_3^{2+}$] (Wang, Keene) **405**, 71
Analysis of the long-term potential stability of an all-solid-state potassium-selective electrode with electroactive polypyrrole film (Momma et al.) **407**, 91
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Electrochemical polymerisation studies of aza-15-crown-5 vinyl-2,2′-bipyridine ruthenium(II) complexes (Beer et al.) **408**, 61
Electrochemical and electrocatalytic properties of polypyrrole film doped with heteropolyanions (Wang, Li) **408**, 77
New electropolymerized nickel porphyrin films. Application to the detection of nitric oxide in aqueous solution (Trévin et al.) **408**, 261
Electropolymerization of ferrocene bis-amide derivatives: a possible route to an electrochemical sensory device (Moutet et al.) **410**, 79
On the mechanism of oxidative electropolymerization and film formation for phenanthroline-containing complexes of ruthenium (Zhang et al.) **414**, 23
Electrochemical oxidative coupling of cyano-substituted oligothiophenes (Demanze et al.) **414**, 61
New quaternized aminoquinoline polymer films: electropolymerization and characterization (Abd El-Rahman, Schultze) **416**, 67
Electrodeposition of protective polyaniline films on mild steel (Camalet et al.) **416**, 179
Electrochemical immobilization of horseradish peroxidase on an electro-activated glassy carbon electrode (Zhang et al.) **419**, 85

Electroreduction
Electrocatalytic reduction of halothane (Langmaier, Samec) **402**, 107
Electrochemical studies of a hexaarylbiimidazole (Oliver et al.) **403**, 153
On the potential dependence of the preceding chemical step in the Cd(II) reduction from aqueous KF solutions: a DMμE study (Baars et al.) **404**, 151
A contribution to the electrode reaction of oximes: a study of the intermediate imine on the electroreduction of pyridine-4-aldoxime (Roman et al.) **410**, 15
Voltammetry under high mass transport conditions. The application of the high speed channel electrode to the reduction of pentafluoronitrobenzene (Coles et al.) **411**, 121
The influence of copper adlayer structure on the electroreduction of nitrobenzene at ordered Au(111) as studied by cyclic voltammetry combined with solution flushing tactics (Chang et al.) **415**, 169
A case of the indirect role of traces of water in the electroreduction of organic substrates (Arévalo et al.) **418**, 47

Electroreflectance (ER) voltammogram
Determination of the electrode kinetic parameters of a species immobilized on electrodes using the electroreflectance (ER) voltammogram (Feng et al.) **408**, 15

Electrosorption
Comparison of electrosorption at activated polycrystalline and Pt(531) kinked platinum electrodes: surface voltammetry and charge displacement on potentiostatic CO adsorption (Clavilier et al.) **404**, 281
Discontinuous impedance near a saddle-node bifurcation (Berthier et al.) **410**, 247

Electrostatic models
Ionic surface diffusion coefficients using an electrostatic patchy charge model (Cohen, Radke) **405**, 23

Electrosynthesis
Electrosynthesis and electrochemical behaviour of unusual solid thallium-based phases: thallium peroxide, thallium(I)–thallium(III) mixed oxide, thallium cuprate, and thallium oxyfluoride (Tsirlina, Petrii) **401**, 33

E-C-E mechanism
Impedance voltammetric analysis of a consecutive E–C–E mechanism with two diffusing intermediates with application to the reduction of nitromethane (Prieto et al.) **405**, 1

Energy transfer
Micellar halide and energy transfer effects in electrochemiluminescence (Rypka, Lasovský) **416**, 41

Enhancement theories
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study (Brolo, Irish) **414**, 183

Enzyme electrode
Practical and theoretical evaluation of an alternative geometry enzyme electrode (Gooding, Hall) **417**, 25
Electrochemical immobilization of horseradish peroxidase on an electro-activated glassy carbon electrode (Zhang et al.) **419**, 85

Enzyme-modified electrodes
Linamarin sensors: amperometric sensing of linamarin using linamarase and glucose oxidase (Tatsuma et al.) **407**, 155

Epinephrine
Analysis of parameters relative to weak adsorption from voltammetric data (Wu et al.) **407**, 45

EQCM
Electrochemical quartz crystal microbalance study of adsorption of iodide on highly ordered Au(111) (Lei et al.) **413**, 131
The harmony of EQCM and radiotracer sorption results obtained in the course of voltammetric study of a rhodized electrode (Wasberg et al.) **418**, 195

Equilibria
Spectroelectrochemical study on monomer/dimer equilibria of methylalkylviologen cation radicals with and without α-cyclodextrin (Lee et al.) **407**, 161

Equivalent circuits
Synthetic semiconductor diamond electrodes: elucidation of the equivalent circuit for the case of frequency-dependent impedance (Pleskov et al.) **413**, 105

ESR
In situ electrochemical ESR studies of reactive radicals: the reductions of bromo-anthraquinone and methyl viologen (Webster et al.) **402**, 167
ESR-electrochemistry in-situ studies on chemically modified electrodes (He et al.) **405**, 217

ESR-electrochemical cells
ESR-electrochemical cells: a comparative study (Webster et al.) **404**, 303

ESR spectroscopy
A preliminary in situ ESR investigation of the structure of the iron electrode|1 M NaOH electrolyte interface (Beden et al.) **405**, 241
In situ UV–vis ESR spectroelectrochemistry (Petr et al.) **412**, 153
Direct evidence of indamine cation radicals in the anodic oxidation of aniline by in situ ESR spectroscopy (Petr, Dunsch) **419**, 55

Etching
Chemical and electrochemical interaction of acidic H_2O_2 solutions with (100) InP (Theuwis et al.) **410**, 31
Investigation on the electrochemistry and etching at the (100)GaAs|HIO_3 interface (Verpoort et al.) **411**, 67
Photoelectrochemical imaging of the etching and passivation of silicon in aqueous KOH (Hutton et al.) **418**, 153

Ethylene glycol
Electrocatalytic oxidation of ethylene glycol in 0.5 M H_2SO_4 and 0.5 M NaOH solutions at a bimetallic deposited electrode (Ureta-Zañartu et al.) **405**, 159

Excess charge density
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57

Exchange current density
The polarisation resistance, exchange current density and stoichiometric number for the hydrogen evolution reaction: theoretical aspects (Gennero de Chialvo, Chialvo) **415**, 97
632.8 nm Excitation
Non-resonant SERS study of the adsorption of cytochrome c on a silver electrode (Niaura et al.) **416**, 167
Expanded clay
Organosilasesquioxane–laponite clay sols: a versatile approach for electrode surface modification (Coche-Guérente et al.) **401**, 253
External pressure balanced reference electrode
Estimation of the thermal liquid junction potential of an external pressure balanced reference electrode (Lvov, Macdonald) **403**, 25

Fabrication
Fabrication of a mediated glucose oxidase recessed microelectrode for the amperometric determination of glucose (McRipley, Linsenmeier) **414**, 235
Fabrication of a platinum dual-disk microelectrode and investigation of its properties (Zhang, Zhou) **415**, 65
FA method
Finite analytic numerical method — a new numerical simulation method for electrochemical problems (Jin et al.) **411**, 19
Ferredoxin
Electrochemistry of cast films of ferredoxin and lipid bilayers on electrodes (Nassar et al.) **416**, 183
Ferric
The interfacial structure around ferric and ferrous ions in aqueous solution: the nature of the second hydration shell (Degrève, Quintale, Jr.) **409**, 25
Diffusion coefficients and electrode kinetic parameters of different Fe(III)–sulfate complexes (Gil et al.) **417**, 129
Ferrites
The electrochemical dissolution of iron(III) and chromium(III) oxides and ferrites under conditions of abrasive stripping voltammetry (Grygar) **405**, 117
Ferrocene
A study of the dependence of ferrocene diffusion on electrolyte concentration and size in a polymer medium using non-steady-state chronoamperometry (Dong, Zhou) **403**, 117
A new approach to one-way electron transfer using multiredox centres organised in Langmuir–Blodgett films (Goldenberg et al.) **408**, 173
A study of the dependence of ferrocene diffusion on chain length in polymer electrolytes (Zhou, Dong) **414**, 121
Electrochemical investigations of a novel ferrocene surfactant (Jacob et al.) **416**, 83
Interaction over three redox centers at conjugated oligomeric ferrocenes with $N = 2$ to 6 nuclei (Aoki et al.) **416**, 151
SPE composite microdisk electrodes used in organic electrosynthesis (Jiang et al.) **417**, 89
Ferrocene bis-amide
Electropolymerization of ferrocene bis-amide derivatives: a possible route to an electrochemical sensory device (Moutet et al.) **410**, 79
Ferrocyanide anions
Limiting current increase of oxidation of ferrocyanide anions in water and electrolyte solutions during freezing (Tanaka, Hasebe) **401**, 163
Ferrous
The interfacial structure around ferric and ferrous ions in aqueous solution: the nature of the second hydration shell (Degrève, Quintale, Jr.) **409**, 25
Ferulic acid
Oxidation of caffeic acid and related hydroxycinnamic acids (Hapiot et al.) **405**, 169

Field theoretical approach
On a new theoretical approach to electrified interfaces (Stafiej, Badiali) **409**, 73
Film
Formation in situ of electrodeposited fulleride film on a microelectrode (Cheng et al.) **408**, 101
Polypyrrole + polyacrylate composites: electrogeneration (Otero, González-Tejera) **410**, 69
Electrochemical behaviour of spin-coated films of vanadium pentoxide xerogel in aqueous electrolyte. Electron transfer between vanadium centres in the gel layers and intercalated tris (2,2′-bipyridyl) metal cations (Whalen, Villemure) **411**, 43
On the mechanism of oxidative electropolymerization and film formation for phenanthroline-containing complexes of ruthenium (Zhang et al.) **414**, 23
The electrochemical properties of oligomeric viologen films immobilised by polyacids (Lieder, Schläpfer) **416**, 89
Spectroelectrochemical and structural properties of electrochromic Co(Al)-oxide and Co(Al,Si)-oxide films prepared by the sol–gel route (Švegl et al.) **418**, 53
Photoelectrochemical behaviour of C_{60} films in various oxidation states (Szűcs et al.) **419**, 39
Film electrode
The effect of pH on the charge transport at redox polymer-modified electrodes: an a.c. impedance study applied to poly(*o*-aminophenol) film electrodes (Rodríguez Nieto, Tucceri) **416**, 1
XPS study and electrochemical behaviour of the nickel hexacyanoferrate film electrode upon treatment in alkaline solutions (Cataldi et al.) **417**, 89
Film growth
Quartz crystal microbalance study of the growth of indium hexacyanoferrate films during electrodeposition and coagulation (Czirók et al.) **405**, 205
Film photocatalyst
A film-type photocatalyst incorporating highly active TiO_2 powder and fluororesin binder: photocatalytic activity and long-term stability (Sopyan et al.) **415**, 183
Film | solution interface
A model of the anodic oxidation of metals in concentrated solutions: second-order dynamics at the anodic film | solution interface (Bojinov) **405**, 15
Finite analytic numeric method
Application of the finite analytic numerical method. Part 1. Diffusion problems on coplanar and elevated interdigitated microarray band electrodes (Jin et al.) **411**, 29
Application of a finite analytic numerical method. Part 2. Digital simulation of charge transfer to an oblate hemispheroid microelectrode and experiment verification (Qian et al.) **414**, 1
Application of the finite analytical numerical method. Part 3. Digital simulation of charge transfer to a micro-ring electrode interface (Jin et al.) **417**, 45
Finite difference methods
A comparison of finite difference algorithms for the simulation of microband electrode problems with and without convective flow (Alden, Compton) **402**, 1
First redox couple
IR study of the first redox couple of poly(*o*-toluidine). Anion involvement and potential dependence in strongly acidic solutions (Andrade et al.) **415**, 153
Flavine adenine dinucleotide
A carbon single crystal electrode for an electrochemical quartz crystal microbalance study (Wang et al.) **419**, 1
Flavin-modified electrodes
Electrochemical fluorescence modulation at a redox hydrogel modified electrode (Bonazzola et al.) **407**, 203

Flavodoxin
Complex electrochemistry of flavodoxin at carbon-based electrodes: results from a combination of direct electron transfer, flavin-mediated electron transfer and comproportionation (Heering, Hagen) **404**, 249
Fleischmann–Pons cells
Isoperibolic calorimetry on modified Fleischmann–Pons cells (Preparata et al.) **411**, 9
Flow injection analysis
Electrocatalytic oxidation of carbohydrates at a molecular deposition film electrode based on water-soluble cobalt phthalocyanine and its application to flow-through detection (Sun et al.) **411**, 73
Flow rate
Study of the flow dependence of microelectrode and semi-microelectrode voltammetric signals (Kubiak, Strozik) **417**, 95
Fluorescence spectroscopy
Electrochemical fluorescence modulation at a redox hydrogel modified electrode (Bonazzola et al.) **407**, 203
Fluoride
Effect of alkali-metal and some quaternary-ammonium cations on the anodic dissolution of p-Si in fluoride media (Hassan et al.) **407**, 105
Fluorination
Electrolytic partial fluorination of organic compounds. Part 16. Selective indirect anodic fluorination of dithioacetals using a bromine mediator (Fuchigami, Sano) **414**, 81
Fluorine
Reducibility of the carbon–fluorine bond in the trifluoromethyl group (Combellas et al.) **407**, 195
Fluorine-doped tin oxide
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Fluororesin binder
A film-type photocatalyst incorporating highly active TiO_2 powder and fluororesin binder: photocatalytic activity and long-term stability (Sopyan et al.) **415**, 183
Formic acid
On-line mass spectrometric studies on the interaction between organic adlayers on platinum. Part 1. Consecutive adsorption of formic acid and propargyl alcohol (Pastor et al.) **404**, 77
Four-electron process
A contribution to the electrode reaction of oximes: a study of the intermediate imine on the electroreduction of pyridine-4-aldoxime (Roman et al.) **410**, 15
Fourier transforms
Electro-oxidation of propene on gold in acid solution studied by DEMS and FTIRS (Schmidt, Pastor) **401**, 155
The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215
Freezing
Limiting current increase of oxidation of ferrocyanide anions in water and electrolyte solutions during freezing (Tanaka, Hasebe) **401**, 163
Frequency analysis
Synthetic semiconductor diamond electrodes: elucidation of the equivalent circuit for the case of frequency-dependent impedance (Pleskov et al.) **413**, 105
Frozen electrolyte
Conductivity of stoichiometric $(CH_3)_4NOH$ clathrate hydrates (Borkowska et al.) **406**, 109
Charge transport in frozen tetraalkylammonium fluoride hydrates containing a 1:1 mixture of $K_3Fe(CN)_6$ and $K_4Fe(CN)_6$ (Opallo) **411**, 145
Impedance of the interface: electrode|frozen electrolyte containing redox active ions (Opallo) **418**, 91
Fructose
A new amperometric biosensor for fructose using a carbon paste electrode modified with silica gel coated with Meldola's Blue and fructose 5-dehydrogenase (Garcia et al.) **418**, 147
Fructose 5-dehydrogenase
A new amperometric biosensor for fructose using a carbon paste electrode modified with silica gel coated with Meldola's Blue and fructose 5-dehydrogenase (Garcia et al.) **418**, 147
FTIR
Spectroscopic investigations on the adsorption of trifluoracetate at Pt(100), Pt(110) and Pt(111) (Pastor et al.) **404**, 61
Reflection-FTIR spectroelectrochemistry using ionically conductive polymer films: electrochemical preparation and spectroscopic characterization of some metal hydrides (Bettelheim et al.) **405**, 251
In situ FTIR studies on the redox properties of poly(thiophene-3-methanol) in PF_6^- and ClO_4^- electrolytes (Pohjakallio et al.) **406**, 165
FTIR characterization of PEO + $LiN(CF_3SO_2)_2$ electrolytes (Wen et al.) **408**, 113
Electrochemical oxidation of thiourea studied by use of in situ FTIR spectroscopy (Yan et al.) **408**, 225
Adsorption of water at Pt(111) electrode in $HClO_4$ solutions. The potential of zero charge (Iwasita, Xia) **411**, 95
Fuel cells
The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215
In-situ resistance measurements of Nafion® 117 membranes in polymer electrolyte fuel cells (Büchi, Scherer) **404**, 37
Fullerenes
Fullerene film electrodes in aqueous solutions. Part 2. Effects of doping cations (Szűcs et al.) **402**, 137
Electro-organic chemistry of fullerenes. Part 1. Indirect cathodic reduction of *vic*-dihalides and perfluoroalkyl halides using C_{60} as mediator. Cyclic voltammetric study and preparative-scale electrolysis (Fuchigami et al.) **411**, 115
Determination of heterogeneous rate constants for the electrochemical reduction of fullerene C_{60} by the method of cyclic voltammetry on a hemispherical ultramicroelectrode (Diao, Zhang) **414**, 177
Photoelectrochemical behaviour of C_{60} films in various oxidation states (Szűcs et al.) **419**, 39
Fulleride
Formation in situ of electrodeposited fulleride film on a microelectrode (Cheng et al.) **408**, 101

p-GaAs
Atomic structure of bare *p*-GaAs(100) and electrodeposited Cu on *p*-GaAs(100) surfaces in H_2SO_4 solutions: an AFM study (Koinuma, Uosaki) **409**, 45
(100)GaAs|HIO_3 interface
Investigation on the electrochemistry and etching at the (100)GaAs|HIO_3 interface (Verpoort et al.) **411**, 67
Galena
A study by impedance spectroscopy of the reactivity of freshly polished galena electrodes: oxidation and interaction with ethylxanthate (Pauporté, Schuhmann) **404**, 123
Gallium
Electrode kinetics and the nature of the metal electrode. Part 2. The Zn(II)/Zn electrode reaction studied at dropping gallium and mercury (micro)electrodes (Van Venrooij et al.) **419**, 61
Galvanostatic
Extension of fast transient techniques to the non-linear region (Kaplevatsky et al.) **407**, 51

Gamma irradiation
Polymer-modified electrodes with pendant $[Rh^{III}(C_5Me_5)(L)Cl]^+$-complexes formed by γ-irradiation cross-linking (Höfer et al.) **402**, 115
p-GaP electrodes
Photoelectrochemical reduction of carbon dioxide in aqueous solutions on p-GaP electrodes: an a.c. impedance study with phase-sensitive detection (Flaisher et al.) **402**, 97
Gas diffusion electrode
An advanced gas diffusion electrode for high performance phosphoric acid fuel cells (Hara et al.) **413**, 81
GC modified electrode
Electrocatalytic oxidation of alcohols on glassy carbon electrodes electrochemically modified by conductive polymeric nickel(II) tetrakis(3-methoxy-4-hydroxyphenyl)porphyrin film (Ciszewski, Milczarek) **413**, 137
Gene detection
Modification of glassy carbon and gold electrodes with DNA (Pang et al.) **403**, 183
Generation-collection properties
Fabrication of a platinum dual-disk microelectrode and investigation of its properties (Zhang, Zhou) **415**, 65
Geometry
Practical and theoretical evaluation of an alternative geometry enzyme electrode (Gooding, Hall) **417**, 25
Gibbs energy
Quantum chemical approach to the Gibbs energy of ion transfer between two immiscible liquids (Osakai, Ebina) **412**, 1
Glassy carbon cathodes
Electrochemical reduction of tetraalkylammonium tetrafluoroborates at carbon cathodes in dimethylformamide (Dahm, Peters) **402**, 91
Glassy carbon electrode
Voltammetry of carbon dioxide. Part 2. Voltammetry in aqueous solutions on glassy carbon (Eggins et al.) **408**, 165
Electrochemical behaviour of certain biomimetic copper(II) complexes in aqueous and aqueous micellar solutions (Sivagnanam, Palaniandavar) **410**, 43
Anodic oxidation of thioureido derivatives of biogenic amines at a glassy carbon electrode in an aqueous medium (González Lomba et al.) **410**, 87
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21
Glucose
Catalysis of the electrochemical oxidation of glucose by glucose oxidase and a single electron cosubstrate: kinetics in viscous solutions (Anicet et al.) **410**, 199
Studies on employing tetrathiafulvalene as an electron shuttle incorporated in a montmorillonite-modified immobilization matrix for an enzyme electrode (Lei et al.) **419**, 93
Glucose biosensor
Analysis of the factors determining the sensitivity of a miniaturized glucose biosensor made by codeposition of palladium and glucose oxidase onto an 8 μm carbon fiber (Sakslund et al.) **402**, 149
Glucose determination
Fabrication of a mediated glucose oxidase recessed microelectrode for the amperometric determination of glucose (McRipley, Linsenmeier) **414**, 235
Glucose oxidase
Analysis of the factors determining the sensitivity of a miniaturized glucose biosensor made by codeposition of palladium and glucose oxidase onto an 8 μm carbon fiber (Sakslund et al.) **402**, 149
Zeolite containing oxidase-based carbon paste biosensors (Wang, Walcarius) **404**, 237
Catalysis of the electrochemical oxidation of glucose by glucose oxidase and a single electron cosubstrate: kinetics in viscous solutions (Anicet et al.) **410**, 199
Studies on employing tetrathiafulvalene as an electron shuttle incorporated in a montmorillonite-modified immobilization matrix for an enzyme electrode (Lei et al.) **419**, 93
Gold
The influence of OH^- chemisorption on the catalytic properties of gold single crystal surfaces for oxygen reduction in alkaline solutions (Štrbac, Adžić) **403**, 169
Electrochemical oxidation of dihydronicotinadmide adenine dinucleotide (NADH) on single crystal gold electrodes (Xing et al.) **406**, 83
Infrared–infrared sum-frequency generation from adsorbates on metal surfaces (Potterton, Bain) **409**, 109
A new method for rapid determination of the potential of zero charge for gold|solution interfaces (Chen et al.) **414**, 53
Electrocapillary curves of polycrystalline gold in aqueous solutions of pyridine (Efimov, Heusler) **414**, 75
A study of the effect of ultrasound on mass transport to a microelectrode (Birkin, Silva-Martinez) **416**, 127
Impedance studies of reconstructed and non-reconstructed gold single crystal surfaces (Eberhardt et al.) **419**, 23
Gold|aqueous solution interfaces
Cyclic voltammetry at gold single-crystal surfaces. Part 1. Behaviour at low-index faces (Hamelin) **407**, 1
Cyclic voltammetry at gold single-crystal surfaces. Part 2. Behaviour of high-index faces (Hamelin, Martins) **407**, 13
Gold electrode
Electro-oxidation of propene on gold in acid solution studied by DEMS and FTIRS (Schmidt, Pastor) **401**, 155
Macroscopically rapid electron transfer of cytochrome c_{522} with high thermostability at bare and surface-modified gold electrodes (Ueyama et al.) **401**, 227
Effect of cyclodextrins on the electrochemical behaviour of ascorbic acid on gold electrodes (Manzanares et al.) **407**, 141
Electrochemical properties of the 2-mercaptohydroquinone monolayer on a gold electrode. Effect of solution pH, adsorption time and concentration of the modifying solution (Sato et al.) **409**, 145
Reversible chemical doping of self-assembled poly(3-octylthiophene) monolayers on gold electrodes (Gao, Siow) **412**, 179
Impedance aspects of anion adsorption on gold single crystal electrodes (Pajkossy et al.) **414**, 209
Direct electron transfer to cytochrome c oxidase in self-assembled monolayers on gold electrodes (Li et al.) **416**, 97
Electrocatalytic reduction of organic peroxides in organic solvents by microperoxidase-11 immobilized as a monolayer on a gold electrode (Moore et al.) **417**, 189
Gold microelectrode
The reduction of styrene at microelectrodes in toluene + *N*,*N*-dimethylformamide mixtures (Geraldo et al.) **418**, 41
Gold particle
Crystallographic habit of gold particles grown on electrodes in acidic solutions at different electrode potentials (Lu et al.) **406**, 101
Gold single-crystal faces
Cyclic voltammetry at gold single-crystal surfaces. Part 1. Behaviour at low-index faces (Hamelin) **407**, 1
Cyclic voltammetry at gold single-crystal surfaces. Part 2. Behaviour of high-index faces (Hamelin, Martins) **407**, 13
Governing equations
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 2. Governing equations in one-dimensional geometry (Bieniasz) **406**, 45

Graphite
Water structure at the graphite(0001) surface by STM measurements (Nagy) **409**, 19
Graphite electrode
Electrocatalytic activity of N,N′,N″,N‴-tetramethyl-tetra-3,4-pyridoporphyrazinocobalt(II) adsorbed on a graphite electrode towards the oxidation of hydrazine and hydroxylamine (Jiujun Zhang et al.) **406**, 203
Catalytic pathways for the electroreduction of O_2 at graphite electrodes on which a macrocyclic cobalt complex is adsorbed (Kang et al.) **413**, 165
Graphite oxide film
Voltammetric studies of electrochemical pretreatment of rotating-disc glassy carbon electrodes in phosphate buffer (Dai, Shiu) **419**, 7
Green function
The Green function method for calculating characteristics of a small strip-shaped shear stress probe (Geshev) **410**, 1
Guest cations
Electrochemical cation recognition by novel 2,2′-bipyridine-grafted calix[4]arenequinones (Bettega et al.) **406**, 247

Halide
Infrared spectroscopic observation of water at a polycrystalline gold electrode|aqueous halide solution interface (Kitamura et al.) **412**, 183
Micellar halide and energy transfer effects in electrochemiluminescence (Rypka, Lasovský) **416**, 41
Halide anions
Surface second harmonic study of anion adsorption at the mercury|electrolyte interface (Tamburello-Luca et al.) **409**, 123
Halogenides
Ion pairing between dissolved poly(*o*-phenylenediamine) and halogenide ions (Yano, Nagaoka) **410**, 213
Halothane
Electrocatalytic reduction of halothane (Langmaier, Samec) **402**, 107
Hanging meniscus contact
Influence of the geometry of the hanging meniscus contact on the hydrogen oxidation reaction on a Pt(111) electrode in sulphuric acid (Herrero et al.) **410**, 125
Hanging meniscus rotating disk
The hanging meniscus rotating disk (HMRD). Part 3. Application to a charge transfer preceded by a chemical reaction in equilibrium (Villullas, López Teijelo) **418**, 159
Hanging mercury drop electrode
Surface charge density measurements on mercury electrodes covered by phospholipid monolayers (Becucci et al.) **413**, 187
The chronopotentiometric reduction of proteins adsorbed on mercury (Honeychurch, Ridd) **418**, 185
Hemispherical microelectrode
Theory and application of cyclic voltammetry at a hemispherical microelectrode for a quasi-reversible reaction (Diao, Zhang) **410**, 155
2-Heptanone
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 1. Simple ion transfers (Cheng, Schiffrin) **409**, 9
Heterogeneous electron transfer rate constants
The electrochemical oxidation of dibenzo(c,e)-1,2-diselenine to its cation radical. A voltammetric study in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **401**, 183
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
Heterogeneous kinetic constant
Theory and application of cyclic voltammetry at a hemispherical microelectrode for a quasi-reversible reaction (Diao, Zhang) **410**, 155
Heterogeneous rate constants
Electro-oxidation of 1,5 and 1,8 diaminonaphthalene: an RDE study (Jackowska et al.) **418**, 35
Heteropolyanion
Oxidation kinetics of NADH by heteropolyanions (Keita et al.) **404**, 271
Electrochemical and electrocatalytic properties of polypyrrole film doped with heteropolyanions (Wang, Li) **408**, 77
Hexaarylbiimdazoles
Electrochemical studies of a hexaarylbiimidazole (Oliver et al.) **403**, 153
Hexacyanoferrates
The formation of bilayered nickel–iron, cadmium–iron and cadmium–silver hexacyanoferrates by an electrochemically driven insertion–substitution mechanism (Dostal et al.) **415**, 133
$Hg_xCd_{1-x}Te$
In-situ study of the electrochemical deposition process of CdTe and $Hg_xCd_{1-x}Te$ using laser-scanning photoelectrochemical microscopy (You et al.) **405**, 233
High-index gold faces
Cyclic voltammetry at gold single-crystal surfaces. Part 2. Behaviour of high-index faces (Hamelin, Martins) **407**, 13
Highly active TiO_2 powder
A film-type photocatalyst incorporating highly active TiO_2 powder and fluororesin binder: photocatalytic activity and long-term stability (Sopyan et al.) **415**, 183
Highly oriented pyrolytic graphite
A carbon single crystal electrode for an electrochemical quartz crystal microbalance study (Wang et al.) **419**, 1
High speed channel electrode
Voltammetry under high mass transport conditions. The application of the high speed channel electrode to the reduction of pentafluoronitrobenzene (Coles et al.) **411**, 121
High-temperature high-pressure aqueous solutions
Estimation of the thermal liquid junction potential of an external pressure balanced reference electrode (Lvov, Macdonald) **403**, 25
H_2O_2
H_2O_2 from an oxidase enzyme can be detected cathodically using metal microparticles dispersed in a polymeric film electrode (Somasundrum et al.) **407**, 247
Hollow cube
The three-dimensional simulation of short-time diffusion-controlled voltammetry at the walls of a hollow cube (Myland, Oldham) **405**, 39
H_2O_2 oxidation
Efficacy of organometallic-containing screen-printed carbon strips as catalysts for the oxidation of hydrogen peroxide: a voltammetric and X-ray photoelectron spectroscopic investigation (Gilmartin et al.) **401**, 127
Horminone
Control of the electrochemical reduction of horminone by pH imposition in acetonitrile (Ortiz et al.) **411**, 103
Horseradish peroxidase
A reagentless biosensor highly sensitive to hydrogen peroxide based on new methylene blue N dispersed in Nafion® gel as the electron shuttle (Liu et al.) **417**, 59
Electrochemical immobilization of horseradish peroxidase on an electro-activated glassy carbon electrode (Zhang et al.) **419**, 85
H_2SO_4
Cyclic voltammetry of polyethylene stabilized hydrogen molybdenum bronzes (Endres, Schwitzgebel) **415**, 23
Humic acid
Comparison between polarographic and potentiometric speciation for cadmium/humic acid systems (Pinheiro et al.) **410**, 61
Humidity
Studies on ion-exchange membranes. Part 1. Effect of humidity on the conductivity of Nafion® (Anantaraman, Gardner) **414**, 115

Hydrated films
Real-time polarization modulation infrared spectroscopy applied to the study of water and hydroxide ions at electrode surfaces (Faguy, Richmond) **410**, 109
Hydration
Infrared spectroscopic observation of water at a polycrystalline gold electrode|aqueous halide solution interface (Kitamura et al.) **412**, 183
Hydration numbers
Evaluation of the hydration numbers of lanthanide ions in electrodeposited cobalt and manganese oxide films using the quartz crystal microbalance (Matsumoto et al.) **403**, 203
Hydrazine
Electrocatalytic activity of N,N′,N″,N‴-tetramethyl-tetra-3,4-pyridoporphyrazinocobalt(II) adsorbed on a graphite electrode towards the oxidation of hydrazine and hydroxylamine (Jiujun Zhang et al.) **406**, 203
Hydrido complexes
Electrochemical formation of cationic iridium(III)–hydrido complexes in solution and in polymeric films: their chemical, electrochemical and electrocatalytic activity in the hydrogen generation process (Caix et al.) **403**, 189
Hydrocaffeic acid
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
Hydrodynamic conditions
Voltammetric cell with additional internal circulation of electrolyte (Tur'yan et al.) **412**, 175
Hydrodynamics
Hydrodynamic voltammetry with channel microband electrodes: axial diffusion effects (Alden, Compton) **404**, 27
Hydrodynamic voltammetry
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes (Bidwell et al.) **417**, 119
Hydrogen
Hydrogen insertion reaction with restricted diffusion. Part 1. Potential step–EIS theory and review for the direct insertion mechanism (Chen et al.) **406**, 1
Vibrational spectroscopy of the electrochemical interface by visible infrared sum frequency generation (Tadjeddine, Peremans) **409**, 115
Influence of the geometry of the hanging meniscus contact on the hydrogen oxidation reaction on a Pt(111) electrode in sulphuric acid (Herrero et al.) **410**, 125
Evaluation of the effect of two-dimensional geometry of Pt single-crystal faces on the kinetics of upd of H using impedance spectroscopy (Morin et al.) **412**, 39
Hydrogen absorption reaction
An investigation of the hydrogen absorption reaction into, and the hydrogen evolution reaction from, a Pd foil electrode (Yang, Pyun) **414**, 127
Hydrogen adsorption
Surface Raman spectra of pyridine and hydrogen on bare platinum and nickel electrodes (Ren et al.) **415**, 175
Hydrogen adsorption–desorption
Scanning electrochemical microscopy (SECM): study of the adsorption and desorption of hydrogen on platinum electrodes in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **418**, 99
Hydrogen and oxygen adsorption
UHV and electrochemical transfer studies on Pt(110)-(1 × 2): the influence of bismuth on hydrogen and oxygen adsorption, and the electro-oxidation of carbon monoxide (Hayden et al.) **409**, 51
Hydrogen evolution
Steady state voltammetry at microelectrodes for the hydrogen evolution from strong and weak acids under pseudo-first and second order kinetic conditions (Daniele et al.) **404**, 105
Kinetics of the deuterium and hydrogen evolution reactions at palladium in alkaline solution (Green, Britz) **412**, 59
The electrocatalytic reactions of oxidation and evolution of hydrogen on iridium electrodes modified by sulphur adsorption (Lamy-Pitara, Barbier) **416**, 47
Hydrogen evolution reaction
An investigation of the hydrogen absorption reaction into, and the hydrogen evolution reaction from, a Pd foil electrode (Yang, Pyun) **414**, 127
The polarisation resistance, exchange current density and stoichiometric number for the hydrogen evolution reaction: theoretical aspects (Gennero de Chialvo, Chialvo) **415**, 97
Hydrogen molybdenum bronzes
Cyclic voltammetry of polyethylene stabilized hydrogen molybdenum bronzes (Endres, Schwitzgebel) **415**, 23
Hydrogen oxidation
Hydrogen oxidation on partially immersed Nafion®-coated electrodes (Inaba et al.) **417**, 105
Hydrogen peroxide
Catalysis of the electroreduction of hydrogen peroxide by nontronite clay coatings on glassy carbon electrodes (Zen et al.) **408**, 157
A reagentless biosensor highly sensitive to hydrogen peroxide based on new methylene blue N dispersed in Nafion® gel as the electron shuttle (Liu et al.) **417**, 59
Hydrolysis
Modified electrodes from organic–inorganic hybrid gels formed by hydrolysis–polycondensation of some trimethoxysilylferrocenes (Audebert et al.) **413**, 89
Hydrophobic ligands
Effects of hydration on the resistances and electrochemical responses of Nafion® coatings on electrodes (Shi, Anson) **415**, 41
Hydroquinonesulphonate mediator
Fabrication of a mediated glucose oxidase recessed microelectrode for the amperometric determination of glucose (McRipley, Linsenmeier) **414**, 235
Hydrous oxide thick films
The complex nature of hydrous oxide film behaviour on platinum (Burke, Buckley) **405**, 101
2-Hydroxy-3-aminophenazine
Dispersion of crystallites of the metal substrate during the electropolymerization of 2-hydroxy-3-aminophenazine (HAPh) on Au: effect of Au crystallites on the kinetics and mechanism of charge-transfer reactions between the polymer and redox species in electrolyte (Kelaidopoulou et al.) **404**, 113
6-Hydroxydopa
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
6-Hydroxyhydrocaffeic acid
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
Hydroxylamine
Electrocatalytic activity of N,N′,N″,N‴-tetramethyl-tetra-3,4-pyridoporphyrazinocobalt(II) adsorbed on a graphite electrode towards the oxidation of hydrazine and hydroxylamine (Jiujun Zhang et al.) **406**, 203
Hypoxanthine
Xanthine and hypoxanthine sensors based on xanthine oxidase immobilized in poly(mercapto-p-benzoquinone) film (Arai et al.) **410**, 173

Icosahedron
Crystallographic habit of gold particles grown on electrodes in acidic solutions at different electrode potentials (Lu et al.) **406**, 101

Immersion technique
The pzc of Au(111) and Pt(111) in a perchloric acid solution: an ex situ approach to the immersion technique (Hamm et al.) **414**, 85
Immiscible liquids
Quantum chemical approach to the Gibbs energy of ion transfer between two immiscible liquids (Osakai, Ebina) **412**, 1
Immiscible solutions
A novel approach for studying charge transfer across an interface of two immiscible solutions using the scanning electrochemical microscope (SECM) (Selzer, Mandler) **409**, 15
Immobilization
The bioelectrochemical response of the polyaniline sarcosine oxidase electrode (Yang, Mu) **415**, 71
Immobilization of DNA
Modification of glassy carbon and gold electrodes with DNA (Pang et al.) **403**, 183
Immunosensor
Impedance analysis of Si/SiO_2 heterostructures grafted with antibodies: approach for immunosensor development (Maupas et al.) **406**, 53
Modified monolayer electrodes for electrochemical and piezoelectric analysis of substrate–receptor interactions: novel immunosensor electrodes (Cohen et al.) **417**, 65
Amperometric amplification of antigen–antibody association at monolayer interfaces: design of immunosensor electrodes (Katz, Willner) **418**, 67
Impedance
Effect of temperature changes in the range 293 to 208 K on the in situ impedance of poly-*o*-toluidine (Florit) **408**, 257
Discontinuous impedance near a saddle-node bifurcation (Berthier et al.) **410**, 247
Impedance aspects of anion adsorption on gold single crystal electrodes (Pajkossy et al.) **414**, 209
Impedance analysis
Impedance analysis of Si/SiO_2 heterostructures grafted with antibodies: approach for immunosensor development (Maupas et al.) **406**, 53
Impedance response
Simulation and interpretation of electrochemical impedances using the network method (Horno et al.) **402**, 73
Impedance spectroscopy
A study by impedance spectroscopy of the reactivity of freshly polished galena electrodes: oxidation and interaction with ethylxanthate (Pauporté, Schuhmann) **404**, 123
Conductivity of stoichiometric $(CH_3)_4NOH$ clathrate hydrates (Borkowska et al.) **406**, 109
A channel flow cell with downstream impedance spectroscopy detection: theory and applications (Tam et al.) **407**, 23
Stability study and categorization of electrochemical oscillators by impedance spectroscopy (Koper) **409**, 175
Estimation of the deposition rate of thermal calcareous scaling by the electrochemical impedance technique (Gabrielli et al.) **412**, 189
Cathodic electropolymerization of methacrylonitrile studied in situ by quartz crystal microbalance, cyclic voltammetry, and impedance spectroscopy (Tanguy et al.) **417**, 175
Impedance studies of reconstructed and non-reconstructed gold single crystal surfaces (Eberhardt et al.) **419**, 23
Impedance voltammetry
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 (Blankenborg et al.) **401**, 3
Impermeable boundary conditions
An investigation of the hydrogen absorption reaction into, and the hydrogen evolution reaction from, a Pd foil electrode (Yang, Pyun) **414**, 127
Imunoassay
Redox cationic or procationic labeled drugs detected at a perfluorosulfonated ionomer film-coated electrode (Limoges et al.) **402**, 175
In + As alloys
Electrodeposition of In + As thin film alloys and their conversion to $InAs_xP_{1-x}$ by PH_3 treatment (Dalchiele et al.) **418**, 83
Inclusion complex
Effect of cyclodextrins on the electrochemical behaviour of ascorbic acid on gold electrodes (Manzanares et al.) **407**, 141
Inclusion complexes
Electrochemistry and photoelectrochemistry of phenothiazine dye–β-cyclodextrin inclusion complexes (Retna Raj, Ramaraj) **405**, 141
Indamine
Direct evidence of indamine cation radicals in the anodic oxidation of aniline by in situ ESR spectroscopy (Petr, Dunsch) **419**, 55
Indium
Electrodeposition of indium selenide In_2Se_3 (Massaccesi et al.) **412**, 95
Electrodeposition of In + As thin film alloys and their conversion to $InAs_xP_{1-x}$ by PH_3 treatment (Dalchiele et al.) **418**, 83
Indium-chelates
An in-situ Raman study of the effect of the support for adsorbed iridium-chelates in catalysing oxygen reduction (Bouwkamp-Wijnoltz et al.) **406**, 195
Indium hexacyanoferrate
Quartz crystal microbalance study of the growth of indium hexacyanoferrate films during electrodeposition and coagulation (Czirók et al.) **405**, 205
Indium selenide
Electrodeposition of indium selenide In_2Se_3 (Massaccesi et al.) **412**, 95
Infrared pump beam
Infrared–infrared sum-frequency generation from adsorbates on metal surfaces (Potterton, Bain) **409**, 109
Infrared spectroelectrochemistry
Real-time polarization modulation infrared spectroscopy applied to the study of water and hydroxide ions at electrode surfaces (Faguy, Richmond) **410**, 109
Inhibition
Electrodeposition of protective polyaniline films on mild steel (Camalet et al.) **416**, 179
InP
Chemical and electrochemical interaction of acidic H_2O_2 solutions with (100) InP (Theuwis et al.) **410**, 31
Insertion
Hydrogen insertion reaction with restricted diffusion. Part 1. Potential step–EIS theory and review for the direct insertion mechanism (Chen et al.) **406**, 1
Insertion–substitution mechanism
The formation of bilayered nickel–iron, cadmium–iron and cadmium–silver hexacyanoferrates by an electrochemically driven insertion–substitution mechanism (Dostal et al.) **415**, 133
In situ AFM
Experimental strategies for continuous measurements of *I–t* transients of a silver single nucleus on carbon microelectrodes (Mao et al.) **416**, 145
In situ FTIR
Infrared spectroscopic observation of water at a polycrystalline gold electrode|aqueous halide solution interface (Kitamura et al.) **412**, 183
Studies on electrochemical oxidation of non-aqueous electrolyte on the $LiCoO_2$ thin film electrode (Kanamura et al.) **419**, 77
In situ FTIR-ATR spectroscopy
In situ FTIR-ATR spectroscopic investigations on the polymerization process and the redox behavior of poly(thienylpyrrole) thin film electrodes in aqueous and non-aqueous solutions. Part 1. Characteriza-

tion of the polymerization process in acetonitrile containing different supporting salts (Ping, Nauer) **416**, 157

In-situ monitoring
In-situ study of the electrochemical deposition process of CdTe and $Hg_xCd_{1-x}Te$ using laser-scanning photoelectrochemical microscopy (You et al.) **405**, 233

In situ resonance Raman spectroscopy
Spectroelectrochemical studies of poly-*o*-phenylenediamine. Part 1. In situ resonance Raman spectroscopy (Wu et al.) **417**, 53

In situ study
In situ and real time study of an electrode process by differential X-ray diffraction. Part 1. Ag underpotential deposition on Au(111) (Chabala et al.) **412**, 67
In situ and real time study of an electrode process by differential X-ray diffraction. Part 2. Cu underpotential deposition on Au(111) (Chabala et al.) **412**, 77

In situ techniques
In situ UV–vis ESR spectroelectrochemistry (Petr et al.) **412**, 153

Insoluble surfactant
Electrochemical and spectroscopic studies of the mechanism of monolayer and multilayer adsorption of an insoluble surfactant at the Au(111)|electrolyte interface (Bizzotto, Lipkowski) **409**, 33

Insulating species
Dispersion of the interface of a conducting insulating zone temporarily generated in a polypyrrole film (Tezuka et al.) **402**, 161

Integral equation method
Diffusion current at the tubular band electrode by the integral equation method (Engblom et al.) **406**, 23

Interaction energies
Redox interaction in mixed-valence trinuclear ring complexes by means of quantum chemical approach (Chen, Aoki) **402**, 189

Intercalation
Intercalation of monovalent cations in a quasi one-dimensional metal chalcogenide: a voltammetric study on $Tl_xV_6S_8$ single-crystal electrodes (Engelhard et al.) **415**, 79

Interdigitated microarray electrode
Application of the finite analytic numerical method. Part 1. Diffusion problems on coplanar and elevated interdigitated microarray band electrodes (Jin et al.) **411**, 29

Interface
Time-resolved in situ and real time study of an electrode process by differential X-ray diffraction: Ag underpotential deposition on Au(111) (Chabala, Rayment) **401**, 257
A novel approach for studying charge transfer across an interface of two immiscible solutions using the scanning electrochemical microscope (SECM) (Selzer, Mandler) **409**, 15
Vibrational spectroscopy of the electrochemical interface by visible infrared sum frequency generation (Tadjeddine, Peremans) **409**, 115

Interface structure
The role of the metal in determining electrosorption valency in the case of strong molecular adsorption at the electrode|solution interface (Calvente et al.) **401**, 231

Interfacial kinetics
A network approach to the simulation of electrical properties of asymmetric electrochemical cells (Moya et al.) **413**, 9

Interfacial properties
Dispersion of the interface of a conducting insulating zone temporarily generated in a polypyrrole film (Tezuka et al.) **402**, 161

Interfacial structure
The interfacial structure around ferric and ferrous ions in aqueous solution: the nature of the second hydration shell (Degrève, Quintale, Jr.) **409**, 25

Interfacial tension
A new method for rapid determination of the potential of zero charge for gold|solution interfaces (Chen et al.) **414**, 53

Interlayer spacing
Redox switching of interlayer spacing in montmorillonite clay (Ravichandran et al.) **406**, 227

Internal structure model
Effects of hydration on the resistances and electrochemical responses of Nafion® coatings on electrodes (Shi, Anson) **415**, 41

Intramolecular charge transfer complexes
Electrochemical study of intramolecular charge transfer complexes derived from 1,4-naphthoquinone. Part 2. Electro-oxidation of 2-substituted 3-arylamino-1,4-naphthoquinone autocomplexes (Turovska et al.) **414**, 221

Intramolecular redox interactions
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation (Aoki) **419**, 33

Iodate
Temperature dependence of the transfer coefficient. The reduction of iodate in alkaline media (Kirowa-Eisner et al.) **410**, 189

Iodide
Electrochemical quartz crystal microbalance study of adsorption of iodide on highly ordered Au(111) (Lei et al.) **413**, 131

Ion adsorption
A SERS study of SO_4^{2-}/Cl^- ion adsorption at a copper electrode in-situ (Brown, Hope) **405**, 211

Ion exchange
Ion-exchange voltammetry of tris(2,2′-bipyridyl) ruthenium(II), iron(II), osmium(II) and tris(2,2′-bipyrazyl) ruthenium(II) in acetonitrile solutions at poly(ester-sulphonate) coated electrodes (Hanzlik et al.) **404**, 89
Probe beam deflection study of cupric hexacyanoferrate colloid doped polypyrrole film modified electrode in different electrolytes (Liu et al.) **407**, 243

Ion flux
Scanning electrochemical microscopy: amperometric probing of diffusional ion fluxes through porous membranes and human dentine (Nugues, Denuault) **408**, 125

Ionically conductive polymers
Reflection-FTIR spectroelectrochemistry using ionically conductive polymer films: electrochemical preparation and spectroscopic characterization of some metal hydrides (Bettelheim et al.) **405**, 251

Ionic conductivity
Charge transport in frozen tetraalkylammonium fluoride hydrates containing a 1:1 mixture of $K_3Fe(CN)_6$ and $K_4Fe(CN)_6$ (Opallo) **411**, 145
Charge transport processes in electrochemically deposited poly(pyrrole) and poly(*N*-methylpyrrole) thin films (Kim et al.) **416**, 113

Ion pair formation
Solvent effect on the ion pair formation between 2,3,5,6-tetrachloro-1,4-benzoquinone anion radical and Mg^{2+} measured using a pulse electrolysis stopped flow method (Oyama et al.) **401**, 243

Ion pairing
Ion pairing between dissolved poly(*o*-phenylenediamine) and halogenide ions (Yano, Nagaoka) **410**, 213

Ions
Adsorption of Cl^- and Br^- ions on the (111) plane of a bismuth single crystal from solutions in 2-propanol (Väärtnõu et al.) **407**, 227

Ion sensitivity
Nature of ion sensitivity of polypyrrole electrodes (Tamm et al.) **414**, 149

Ion sorption
Comparative study of anion-involvement in redox transformations of poly(*o*-phenylene-diamine) (PPD) films by a coupled electrochemical and radiometric technique (Martinusz et al.) **404**, 145

Ion transfer
The temperature dependence of the transfer of an iodide ion (Pecina et al.) **405**, 239

A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 1. Simple ion transfers (Cheng, Schiffrin) **409**, 9

Quantum chemical approach to the Gibbs energy of ion transfer between two immiscible liquids (Osakai, Ebina) **412**, 1

Iridium

Electrochemical formation of cationic iridium(III)–hydrido complexes in solution and in polymeric films: their chemical, electrochemical and electrocatalytic activity in the hydrogen generation process (Caix et al.) **403**, 189

Iridium electrodes

The electrocatalytic reactions of oxidation and evolution of hydrogen on iridium electrodes modified by sulphur adsorption (Lamy-Pitara, Barbier) **416**, 47

Iron

The electrochemical dissolution of iron(III) and chromium(III) oxides and ferrites under conditions of abrasive stripping voltammetry (Grygar) **405**, 117

Iron electrode

A preliminary in situ ESR investigation of the structure of the iron electrode|1 M NaOH electrolyte interface (Beden et al.) **405**, 241

Iron group metals

Ion-exchange voltammetry of tris(2,2′-bipyridyl) ruthenium(II), iron(II), osmium(II) and tris(2,2′-bipyrazyl) ruthenium(II) in acetonitrile solutions at poly(ester-sulphonate) coated electrodes (Hanzlik et al.) **404**, 89

Iron phenanthrolines

Electropolymerization of iron phenanthrolines and voltammetric response for pH and application on electrocatalytic sulfite oxidation (Chen) **401**, 147

Iron porphyrin

Electrocatalytic oxygenation of alkenes by a sterically hindered water-soluble iron porphyrin in aqueous solutions (Lee, Su) **414**, 69

Iron sulphate

Diffusion coefficients and electrode kinetic parameters of different Fe(III)–sulfate complexes (Gil et al.) **417**, 129

IR spectra

IR response of poly(*o*-toluidine): spectral modifications upon redox state change (Andrade et al.) **419**, 15

IR spectroscopy

Electro-oxidation of propene on gold in acid solution studied by DEMS and FTIRS (Schmidt, Pastor) **401**, 155

Adsorption and oxidation of thiophene-3-methanol on platinum electrodes studied by electrochemical and IR spectroscopic methods (Pohjakallio et al.) **401**, 191

The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215

CO adsorption and oxidation on a Pt(111) electrode modified by ruthenium deposition: an IR spectroscopic study (Friedrich et al.) **402**, 123

Infrared spectroscopic analysis of anions adsorbed from bisulfate-containing solutions on Pt(111) electrodes (Faguy et al.) **407**, 209

Infrared spectroscopic study of electric double layers on Pt(111) under electrode reactions in a sulfuric acid solution (Shingaya et al.) **409**, 103

IR study

IR study of the first redox couple of poly(*o*-toluidine). Anion involvement and potential dependence in strongly acidic solutions (Andrade et al.) **415**, 153

Isomers

Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 (Bujno et al.) **407**, 131

Isotope exchange reaction

Surface hydrogen processes studied by isotope exchange reactions on a Pd membrane cathode (Yoshitake et al.) **401**, 81

Isotopes

Isotope and surface preparation effects on alkaline dioxygen reduction at carbon electrodes (Xu et al.) **410**, 235

I–t and *Q–t* transients

Determination of rate constants of electrode reactions by methods of semi-integral electrochemistry applied to chronoamperometric and chronocoulometric curves (González-Morín et al.) **411**, 1

Kinetic constant

Electrochemical synthesis and redox properties of a polyruthenocene electrode film (Shimura et al.) **403**, 219

Determination of heterogeneous rate constants for the electrochemical reduction of fullerene C_{60} by the method of cyclic voltammetry on a hemispherical ultramicroelectrode (Diao, Zhang) **414**, 177

Kinetic diagrams

Theory of two $1e^-$ successive electrochemical surface reactions (E_{rev} E_{rev} or E_{rev} E_{irr}) associated with surface chemical reactions in polarography and cyclic voltammetry (Meunier-Prest, Laviron) **410**, 133

Kinetic measurements

Neutron reflection studies of poly(phenol) films (Roser et al.) **411**, 153

Kinetic model

A model of the anodic oxidation of metals in concentrated solutions: second-order dynamics at the anodic film|solution interface (Bojinov) **405**, 15

A kinetic model for the electroenzymatic processes involved in polyphenol-oxidase-based amperometric catechol sensors (Desprez, Labbé) **415**, 191

Kinetics

Transport phenomena inside the pores involved in the kinetics and mechanism of growth of porous anodic Al_2O_3 films on aluminium (Patermarakis) **404**, 69

Dispersion of crystallites of the metal substrate during the electropolymerization of 2-hydroxy-3-aminophenazine (HAPh) on Au: effect of Au crystallites on the kinetics and mechanism of charge-transfer reactions between the polymer and redox species in electrolyte (Kelaidopoulou et al.) **404**, 113

Electrochemical study of 2,5-dimercapto-1,3,4-thiadiazole in acetonitrile (Picart, Geniès) **408**, 53

Electrocatalytic oxidation of aliphatic diols on platinum. Part 4. A kinetic study by means of chromatographic analyses during prolonged electrolyses (Hilmi et al.) **410**, 101

Double electropolymer modified platinum electrode to follow the kinetic process H_2O_2 + ascorbic acid. Influence of the reaction on amperometric biosensor applications (Losito, Zambonin) **410**, 181

Kinetics of the hydrogen evolution reaction in stoichiometric and non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries (Iwakura et al.) **411**, 109

Voltammetry under high mass transport conditions. The application of the high speed channel electrode to the reduction of pentafluoronitrobenzene (Coles et al.) **411**, 121

Electrochemistry of electron transfer probes. Competition between ECE and DISP mechanisms in the reduction of α-aryloxyacetophenones (Andersen, Wayner) **412**, 53

Nickel-catalyzed electrochemical homocoupling of alkenyl halides: rates and mechanisms (Cannes et al.) **412**, 85

The hanging meniscus rotating disk (HMRD). Part 3. Application to a charge transfer preceded by a chemical reaction in equilibrium (Villullas, López Teijelo) **418**, 159

Labelled drugs
Redox cationic or procationic labeled drugs detected at a perfluorosulfonated ionomer film-coated electrode (Limoges et al.) **402**, 175
Labile heterogeneous complexes
Voltammetry of labile heterogeneous complexes with low diffusion coefficients (Pinheiro et al.) **402**, 47
Lability
Voltammetric metal titration of particle dispersions (Wonders, Van Leeuwen) **401**, 103
Lactones
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
Ladder scheme
Surface redox reactions of organomercury compounds: evidence for an interconnected one-electron ladder scheme in the reduction of mercurated uridine-5′-triphosphate (Wagner, Chambers) **408**, 243
Langmuir–Blodgett
Supported phospholipid membranes: comparison among different deposition methods for a phospholipid monolayer (Ding et al.) **416**, 105
Langmuir-Blodgett deposition
Channel mimetic sensing membranes for alkali metal cations based on oriented monolayers of calixarene esters (Yagi et al.) **401**, 65
Langmuir–Blodgett films
A new approach to one-way electron transfer using multiredox centres organised in Langmuir–Blodgett films (Goldenberg et al.) **408**, 173
Lanthanide ions
Evaluation of the hydration numbers of lanthanide ions in electrodeposited cobalt and manganese oxide films using the quartz crystal microbalance (Matsumoto et al.) **403**, 203
Laponite
Organosilasesquioxane–laponite clay sols: a versatile approach for electrode surface modification (Coche-Guérente et al.) **401**, 253
Lead
Electrically heated cylindrical microelectrodes. Determination of lead on Pt by cyclic voltammetry and cathodic stripping analysis (Zerihun, Gründler) **415**, 85
Lead–acid battery
Electrochemical behavior of lead deposited on reticulated vitreous carbon (Czerwiński, Żelazowska) **410**, 55
Lead cryptate
Non-ideality effect for self-diffusion coefficient of lead cryptate by normal pulse polarography (Lehmani et al.) **416**, 121
Lead dioxide
Mechanism of lead dioxide electrodeposition (Velichenko et al.) **405**, 127
Lead electrode
Structure, morphology and photoelectrochemical responses of anodic PbO films formed on Pb electrodes in various concentrations of alkaline solution (Montaser et al.) **419**, 47
$LiCoO_2$ cathode
Studies on electrochemical oxidation of non-aqueous electrolyte on the $LiCoO_2$ thin film electrode (Kanamura et al.) **419**, 77
Light and heavy water
The collective mobility of protons and deuterons in mixtures of light and heavy water (Sluyters, van Duijneveldt) **413**, 37
Limiting current
Limiting current increase of oxidation of ferrocyanide anions in water and electrolyte solutions during freezing (Tanaka, Hasebe) **401**, 163
Linamarin
Linamarin sensors: amperometric sensing of linamarin using linamarase and glucose oxidase (Tatsuma et al.) **407**, 155
Linear scan voltammetry
Theory of current elimination in linear scan voltammetry (Dračka) **402**, 19
Elimination voltammetry. Experimental verification and extension of theoretical results (Trnková, Dračka) **413**, 123
Linear sweep voltammetry
Quantitative analysis of a mixture with reversible electrode processes by cyclic voltammetry and linear sweep voltammetry (Zhao et al.) **402**, 11
LiOD
The insertion/extraction of deuterium (hydrogen) at Pd sheet electrodes in $D_2O(H_2O)$ + LiOD(LiOH) electrolyte (Mengoli et al.) **403**, 143
Li (or Li-ion) batteries
Effect of partial Ga^{3+} substitution for Mn^{3+} in $LiMn_2O_4$ on its behaviour as a cathode for Li cells (Pistoia et al.) **410**, 115
Lipid bilayer
Lipid bilayer formation in a microporous membrane filter monitored by ac impedance analysis and purple membrane photoresponses (Ikematsu et al.) **403**, 61
Lipid film
Electrochemistry of cast films of ferredoxin and lipid bilayers on electrodes (Nassar et al.) **416**, 183
Lippman equation
Apparent thermodynamic inconsistencies in surface stress measurements of copper underpotential deposition on Au(111) electrodes (Haiss, Sass) **410**, 119
Liquid|liquid interfaces
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 1. Simple ion transfers (Cheng, Schiffrin) **409**, 9
Liquid mercury
A model for the surface structure of liquid mercury (Leiva, Schmickler) **404**, 309
Liquid SO_2
A spectroelectrochemical cell for measurements in highly purified solvents (Geskes, Heinze) **418**, 167
Lithiation
Behaviour of nickel species in molten $Li_2CO_3 + Na_2CO_3 + K_2CO_3$. Part 2. Electrochemical characterization under $P(CO_2) = 0.1$ atm + $P(O_2) = 0.9$ atm, $P(Ar) = 1$ atm and $P(O_2) = 1$ atm (Malinowska et al.) **417**, 135
Lithium
Electropolymerization of ferrocene bis-amide derivatives: a possible route to an electrochemical sensory device (Moutet et al.) **410**, 79
Electrochemistry in UHV: generation of lithium from all-solid-state cells (Roy, Bruce) **415**, 33
Lithium doping
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Lithium hydroxide coating
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Lithium perchlorate electrolyte
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Lithium-sodium-potassium carbonate eutectic
Behaviour of nickel species in molten $Li_2CO_3 + Na_2CO_3 + K_2CO_3$. Part 2. Electrochemical characterization under $P(CO_2) = 0.1$ atm + $P(O_2) = 0.9$ atm, $P(Ar) = 1$ atm and $P(O_2) = 1$ atm (Malinowska et al.) **417**, 135
Lithium trifluoromethanesulfonimide
FTIR characterization of PEO + $LiN(CF_3SO_2)_2$ electrolytes (Wen et al.) **408**, 113
Lithium underpotential
Simultaneous microgravimetric and optical reflectivity studies of lithium underpotential deposition on Au(111) from propylene carbonate electrolytes (Mo et al.) **409**, 87

Loading
The effect of ultrasound on the electrochemical loading of hydrogen in palladium (Wark et al.) **418**, 199
Local pH
Study of pH effect on the relaxation phenomenon of polyaniline by electrochemistry and XPS (Fraoua et al.) **418**, 109
Location of reaction
Polyaniline as an electrocatalytic material (Mandić, Duić) **403**, 133
Long distance interaction
Interaction over three redox centers at conjugated oligomeric ferrocenes with $N = 2$ to 6 nuclei (Aoki et al.) **416**, 151
Long-pulse chronoamperometry
Determination of mixed-valence redox centers and dynamics of charge propagation in a bulk redox-conducting solid: phospho-12-tungstic acid single crystal (Kulesza, Karwowska) **401**, 201
Low-index gold faces
Cyclic voltammetry at gold single-crystal surfaces. Part 1. Behaviour at low-index faces (Hamelin) **407**, 1
Low temperature
Determination of heterogeneous rate constants for the electrochemical reduction of fullerene C_{60} by the method of cyclic voltammetry on a hemispherical ultramicroelectrode (Diao, Zhang) **414**, 177
Luminescence
Photoelectrochemistry at transparent SnO_2 electrodes: supersensitization in Nafion® films by mono- and dinuclear ruthenium(II) complexes with hydroquinone (Tan-Sien-Hee, Mesmaeker) **406**, 147
Luminol
Micellar halide and energy transfer effects in electrochemiluminescence (Rypka, Lasovský) **416**, 41

Macrocycle
Electrochemical behavior of a macrocyclic diimine crown ether: 2,3,11,12-dibenzo-5,9-diaza-4,9(10)-cis-diimino-1,13-dioxacyclopentadecane (Solak et al.) **408**, 119
Macrocyclic cobalt complex
Catalytic pathways for the electroreduction of O_2 at graphite electrodes on which a macrocyclic cobalt complex is adsorbed (Kang et al.) **413**, 165
Macrocyclic complexes
Control of the electro-oxidation of macrocyclic complexes of Co(II) by axial coordination (Kang, Anson) **407**, 233
Macrocyclic diamides
Polarographic study of mercury complexes with some recently synthesized benzo-substituted macrocyclic diamides in binary acetonitrile + water mixtures (Ganjali et al.) **405**, 177
Mass spectrometry
On-line mass spectrometric studies on the interaction between organic adlayers on platinum. Part 1. Consecutive adsorption of formic acid and propargyl alcohol (Pastor et al.) **404**, 77
Mass transport
A study of the effect of ultrasound on mass transport to a microelectrode (Birkin, Silva-Martinez) **416**, 127
Hydrogen oxidation on partially immersed Nafion®-coated electrodes (Inaba et al.) **417**, 105
Mathematical models
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 (Blankenborg et al.) **401**, 3
Mean field
An extended hexagon model for Cu underpotential deposition on Au(111) (Legault et al.) **409**, 77
Mechanism
Electrochemistry of electron transfer probes. Competition between ECE and DISP mechanisms in the reduction of α-aryloxyacetophenones (Andersen, Wayner) **412**, 53
Nickel-catalyzed electrochemical homocoupling of alkenyl halides: rates and mechanisms (Cannes et al.) **412**, 85
On the mechanism of oxidative electropolymerization and film formation for phenanthroline-containing complexes of ruthenium (Zhang et al.) **414**, 23
Application of time-resolved EQCM to the study of the mechanism of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) **416**, 53
Meldola's Blue mediator
A new amperometric biosensor for fructose using a carbon paste electrode modified with silica gel coated with Meldola's Blue and fructose 5-dehydrogenase (Garcia et al.) **418**, 147
Membrane-covered electrode
Numerical simulation of the time-dependent current to membrane-covered oxygen sensors. Part IV. Experimental verification that the switch-on transient is non-Cottrellian for microdisc electrodes (Sutton et al.) **408**, 21
Membrane potential
Membrane potential of bipolar membranes (Ramírez et al.) **404**, 187
Memory effect
Dynamic impedance measurements on a thin-film poly-3-methylthiophene electrode: memory effects and space charge formation (Semenikhin et al.) **408**, 67
2-Mercaptoethanol
Photoelectrochemical oxidation of 2-mercaptoethanol at the surface of octacyanophthalocyanine thin film electrodes (Karmann et al.) **405**, 149
Mercaptohydroquinone monolayer
Electrochemical properties of the 2-mercaptohydroquinone monolayer on a gold electrode. Effect of solution pH, adsorption time and concentration of the modifying solution (Sato et al.) **409**, 145
Mercapto thiadiazoles
Examination of reactivity of protonated and deprotonated 2,5-dimercapto-1,3,4-thiadiazole and its derivatives by electrochemical experiment and semiempirical MO calculation (Shouji et al.) **417**, 17
Mercury
Polarographic study of mercury complexes with some recently synthesized benzo-substituted macrocyclic diamides in binary acetonitrile + water mixtures (Ganjali et al.) **405**, 177
Anomalies of staircase voltammetric peaks obtained for the reduction of metal ions in the absence of supporting electrolyte (Donten, Stojek) **405**, 183
The adsorption of nickel dimethylglyoxime complex on mercury (Ramirez et al.) **407**, 219
Self-assembled monolayers on mercury surfaces (Muskal et al.) **409**, 131
Electrode kinetics and the nature of the metal electrode. Part 2. The Zn(II)/Zn electrode reaction studied at dropping gallium and mercury (micro)electrodes (Van Venrooij et al.) **419**, 61
Mercury | aqueous interface
Surface second harmonic study of anion adsorption at the mercury | electrolyte interface (Tamburello-Luca et al.) **409**, 123
Metal
The role of the metal in determining electrosorption valency in the case of strong molecular adsorption at the electrode | solution interface (Calvente et al.) **401**, 231
Metal complexes
A barium selective ferrocene ionophore exhibiting remarkable electrochemical recognition behaviour (Moutet et al.) **415**, 187
Metal doping
Metal-dispersed porous carbon films as electrocatalytic sensors (Wang et al.) **404**, 137
Metal electrodes
Electrocatalytic reduction of halothane (Langmaier, Samec) **402**, 107
Electrochemical reduction of CO_2 with high current density in a CO_2 + methanol medium at various metal electrodes (Saeki et al.) **404**, 299

Electrocatalysis for N_2O reduction on metal electrodes (Kudo, Mine) **408**, 267
Metal hexacyanoferrate film
Electrocatalytic oxidation of thiosulfate by metal hexacyanoferrate film modified electrodes (Chen) **417**, 145
Metal hydrides
Reflection-FTIR spectroelectrochemistry using ionically conductive polymer films: electrochemical preparation and spectroscopic characterization of some metal hydrides (Bettelheim et al.) **405**, 251
Metal ions
Bacterial chemo-attractant properties of metal ions from dissolving electrode surfaces (De Sánchez, Schiffrin) **403**, 39
Anomalies of staircase voltammetric peaks obtained for the reduction of metal ions in the absence of supporting electrolyte (Donten, Stojek) **405**, 183
Metallized carbon
Zeolite containing oxidase-based carbon paste biosensors (Wang, Walcarius) **404**, 237
Metallofullerenes
Electrochemistry of C_{82}: relationship to metallofullerene electrochemistry (Burbank et al.) **417**, 1
Metal–polymer interactions
Metal–polymer interactions in the Ag^+|poly-*o*-aminophenol system (Zhang et al.) **413**, 143
Metal speciation
Voltammetry of labile heterogeneous complexes with low diffusion coefficients (Pinheiro et al.) **402**, 47
Metanilic acid
Electrochemical copolymerization of aniline and metanilic acid (Lee, Cui) **403**, 109
Methacrylonitrile
Cathodic electropolymerization of methacrylonitrile studied in situ by quartz crystal microbalance, cyclic voltammetry, and impedance spectroscopy (Tanguy et al.) **417**, 175
Methanol
The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215
Mixed methanol oxidation/oxygen reduction currents on a carbon supported Pt catalyst (Kauranen, Skou) **408**, 189
Methanol oxidation
Kinetic and mechanistic study of methanol oxidation on a Pt(111) surface in alkaline media (Tripković et al.) **418**, 9
4-Methoxy-5-methyl-o-benzoquinone
Electrochemical study of catechol and 4-methylcatechol in methanol. Application to the electro-organic synthesis of 4,5-dimethoxy- and 4-methoxy-5-methyl-o-benzoquinone (Nematollahi, Golabi) **405**, 133
Methylalkylviologen
Spectroelectrochemical study on monomer/dimer equilibria of methylalkylviologen cation radicals with and without α-cyclodextrin (Lee et al.) **407**, 161
4-Methylcatechol
Electrochemical study of catechol and 4-methylcatechol in methanol. Application to the electro-organic synthesis of 4,5-dimethoxy- and 4-methoxy-5-methyl-o-benzoquinone (Nematollahi, Golabi) **405**, 133
Methylene blue
Self-assembly of methylene blue at single-crystal platinum electrodes modified by sulphur adlayer (Clavilier et al.) **402**, 129
Methyl viologen
In situ electrochemical ESR studies of reactive radicals: the reductions of bromo-anthraquinone and methyl viologen (Webster et al.) **402**, 167
Catalysis of the electroreduction of hydrogen peroxide by nontronite clay coatings on glassy carbon electrodes (Zen et al.) **408**, 157
Methylviologen reduction
Electrochemistry of porous and crystalline silicon electrodes in methylviologen solutions (Kooij et al.) **406**, 139
Micellar
Micellar halide and energy transfer effects in electrochemiluminescence (Rypka, Lasovský) **416**, 41
Micellar solutions
Electrochemical behaviour of certain biomimetic copper(II) complexes in aqueous and aqueous micellar solutions (Sivagnanam, Palaniandavar) **410**, 43
Microband electrode
The multigrid method, MGD1: an efficient and stable approach to electrochemical modelling. The simulation of double electrode problems (Alden, Compton) **415**, 1
Microband electrode problems
A comparison of finite difference algorithms for the simulation of microband electrode problems with and without convective flow (Alden, Compton) **402**, 1
Microcellular foam
Oxygen reduction on a new electrocatalyst based on highly porous carbonized polyacrylonitrile microcellular foam with very low platinum loading (Ye et al.) **415**, 115
Microcrystalline solids
Simultaneous electrochemical and quartz crystal microbalance studies of non-conducting microcrystalline particles of *trans*-$Cr(CO)_2(dpe)_2$ and *trans*-$[Cr(CO)_2(dpe)_2]^+$ (dpe = $Ph_2PCH_2CH_2PPh_2$) attached to gold electrodes (Shaw et al.) **404**, 227
Microelectrode
The electrochemical oxidation of dibenzo(c,e)-1,2-diselenine to its cation radical. A voltammetric study in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **401**, 183
Steady state voltammetry at microelectrodes for the hydrogen evolution from strong and weak acids under pseudo-first and second order kinetic conditions (Daniele et al.) **404**, 105
Electrically heated cylindrical microelectrodes. The reduction of dissolved oxygen on Pt (Zerihun, Gründler) **404**, 243
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
Formation in situ of electrodeposited fulleride film on a microelectrode (Cheng et al.) **408**, 101
Catalytic oxidation of dopamine at a microdisk platinum electrode modified by electrodeposition of nickel hexacyanoferrate and Nafion® (Zhou et al.) **408**, 219
Finite analytic numerical method — a new numerical simulation method for electrochemical problems (Jin et al.) **411**, 19
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate (Agüí et al.) **414**, 141
Electrically heated cylindrical microelectrodes. Determination of lead on Pt by cyclic voltammetry and cathodic stripping analysis (Zerihun, Gründler) **415**, 85
A study of the effect of ultrasound on mass transport to a microelectrode (Birkin, Silva-Martinez) **416**, 127
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35
SPE composite microdisk electrodes used in organic electrosynthesis (Jiang et al.) **417**, 89
Study of the flow dependence of microelectrode and semi-microelectrode voltammetric signals (Kubiak, Strozik) **417**, 95
Microgravimetry
Quartz crystal microbalance study of the growth of indium hexacyanoferrate films during electrodeposition and coagulation (Czirók et al.) **405**, 205

Microperoxidase-11
Electrocatalytic reduction of organic peroxides in organic solvents by microperoxidase-11 immobilized as a monolayer on a gold electrode (Moore et al.) **417**, 189
Microporous membrane filter
Lipid bilayer formation in a microporous membrane filter monitored by ac impedance analysis and purple membrane photoresponses (Ikematsu et al.) **403**, 61
Micro-ring electrode
Application of the finite analytical numerical method. Part 3. Digital simulation of charge transfer to a micro-ring electrode interface (Jin et al.) **417**, 45
Migration
Migrational chronoamperometry of uncharged substrates. Influence of electron transfer rate (Hyk et al.) **415**, 13
Mild steel
Electrodeposition of protective polyaniline films on mild steel (Camalet et al.) **416**, 179
Minimum energy structures
A theoretical study on the stability of different submonolayers or a monolayer of lead adsorbed on Au(100) (Rojas) **405**, 33
Mixed solvent
Polarographic study of mercury complexes with some recently synthesized benzo-substituted macrocyclic diamides in binary acetonitrile + water mixtures (Ganjali et al.) **405**, 177
Mixed-valence centers
Determination of mixed-valence redox centers and dynamics of charge propagation in a bulk redox-conducting solid: phospho-12-tungstic acid single crystal (Kulesza, Karwowska) **401**, 201
Mixed-valence state
Redox interaction in mixed-valence trinuclear ring complexes by means of quantum chemical approach (Chen, Aoki) **402**, 189
Interaction over three redox centers at conjugated oligomeric ferrocenes with $N = 2$ to 6 nuclei (Aoki et al.) **416**, 151
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation (Aoki) **419**, 33
Mobility
The collective mobility of protons and deuterons in mixtures of light and heavy water (Sluyters, van Duijneveldt) **413**, 37
Modelling
A theoretical expression for the effect of *IR* drop on the current response in a potential step experiment (Åberg, Sharp) **403**, 31
Modelling probe beam deflection experiments in binary bathing electrolytes (Mathias) **407**, 115
On a new theoretical approach to electrified interfaces (Stafiej, Badiali) **409**, 73
Modified coulostatic
Extension of fast transient techniques to the non-linear region (Kaplevatsky et al.) **407**, 51
Modified electrodes
In-situ surface-enhanced Raman spectroscopic study of gold electrodes modified with nickel tetraazamacrocyclic complexes (Bukowska et al.) **403**, 47
Electrocatalytic oxidation of cysteine by molybdenum(V) phthalocyanine complexes (Mafatle, Nyokong) **408**, 213
Electrochemistry of *cis*-diaquo ruthenium(II) complexes with substituted 2,2′-bipyridine ligands in a non-coordinating solvent. Application to the elaboration of corresponding functionalized polypyrrole films (Collomb-Dunand-Sauthier et al.) **410**, 21
Electrochemistry of cast films of ferredoxin and lipid bilayers on electrodes (Nassar et al.) **416**, 183
Electrocatalytic oxidation of thiosulfate by metal hexacyanoferrate film modified electrodes (Chen) **417**, 145
Use of Nafion® coated carbon disk microelectrodes in solution without and with different concentrations of supporting electrolyte (Daniele et al.) **418**, 29
Modified monolayer electrodes
Modified monolayer electrodes for electrochemical and piezoelectric analysis of substrate–receptor interactions: novel immunosensor electrodes (Cohen et al.) **417**, 65
Modified Pt electrodes
Self-assembly of methylene blue at single-crystal platinum electrodes modified by sulphur adlayer (Clavilier et al.) **402**, 129
Modified silica gel
A new amperometric biosensor for fructose using a carbon paste electrode modified with silica gel coated with Meldola's Blue and fructose 5-dehydrogenase (Garcia et al.) **418**, 147
Molecular dynamics
Molecular dynamics of the dimerization of $NaB\phi_4$ in 1,2-dimethoxyethane and tetrahydrofuran (Xu et al.) **401**, 45
Molecular dynamics simulation
Electric potential near a charged metal surface in contact with aqueous electrolyte (Philpott, Glosli) **409**, 65
Molecular orbital calculations
Examination of reactivity of protonated and deprotonated 2,5-dimercapto-1,3,4-thiadiazole and its derivatives by electrochemical experiment and semiempirical MO calculation (Shouji et al.) **417**, 17
Molecular recognition
Molecular recognition based on (3-mercaptopropyl) trimethoxysilane modified gold electrodes (Che, Cabrera) **417**, 155
Molten carbonates
Water effect on oxygen reduction in molten $(Li + K)CO_3$ eutectic (Nishina et al.) **408**, 181
Behaviour of nickel species in molten $Li_2CO_3 + Na_2CO_3 + K_2CO_3$. Part 2. Electrochemical characterization under $P(CO_2) = 0.1$ atm + $P(O_2) = 0.9$ atm, $P(Ar) = 1$ atm and $P(O_2) = 1$ atm (Malinowska et al.) **417**, 135
Molybdenum
Electrocatalytic oxidation of cysteine by molybdenum(V) phthalocyanine complexes (Mafatle, Nyokong) **408**, 213
Molybdenum electrode
Kinetics of formation and properties of a barrier oxide film on molybdenum (Bojinov et al.) **411**, 37
Molybdotungstate heteropoly complex
Electrochemical behavior of the molybdotungstate heteropoly complex with neodymium, $K_{10}H_3[Nd(SiMo_7W_4O_{39})_2] \cdot xH_2O$ in aqueous solution (Cheng et al.) **407**, 97
Monensin
The ion selectivity of monensin incorporated phospholipid/alkanethiol bilayers (Li et al.) **414**, 17
Monolayer
Modification of glassy carbon and gold electrodes with DNA (Pang et al.) **403**, 183
Adsorption–desorption processes of redox-active osmium thiol monolayers (Bretz, Abruña) **408**, 199
Self-assembled monolayers on mercury surfaces (Muskal et al.) **409**, 131
Molecular recognition based on (3-mercaptopropyl) trimethoxysilane modified gold electrodes (Che, Cabrera) **417**, 155
Electrocatalytic reduction of organic peroxides in organic solvents by microperoxidase-11 immobilized as a monolayer on a gold electrode (Moore et al.) **417**, 189
Montmorillonite
Redox switching of interlayer spacing in montmorillonite clay (Ravichandran et al.) **406**, 227
Studies on employing tetrathiafulvalene as an electron shuttle incorporated in a montmorillonite-modified immobilization matrix for an enzyme electrode (Lei et al.) **419**, 93

Morphology of metal deposits
The morphology of different metals electrodeposited onto polyaniline films (Jović et al.) **408**, 149
n-$MoSe_2$
The scanning microscope for semiconductor characterization (SMSC): comparative study of the influence of surface defects on the photoelectrochemical behavior of n-WSe_2 and n-$MoSe_2$ layered compounds (Chaparro et al.) **411**, 79
n-$MoSe_2$ single crystal electrode
The scanning microscope for semiconductor characterization (SMSC): study of the influence of surface morphology on the photoelectrochemical behavior of an n-$MoSe_2$ single crystal electrode by photocurrent and electrolyte electroreflectance imaging (Martínez Chaparro et al.) **418**, 175
MPS
Molecular recognition based on (3-mercaptopropyl) trimethoxysilane modified gold electrodes (Che, Cabrera) **417**, 155
Multidimensional upwinding method
The multi-dimensional upwinding method as a new simulation tool for the analysis of multi-ion electrolytes controlled by diffusion, convection and migration. Part 1. Steady state analysis of a parallel plane flow channel (Bortels et al.) **404**, 15
Numerical steady state analysis of current density distributions in axisymmetrical systems for multi-ion electrolytes: application to the rotating disc electrode (Van Den Bossche et al.) **411**, 129
Multigrid method
The multigrid method, MGD1: an efficient and stable approach to electrochemical modelling. The simulation of double electrode problems (Alden, Compton) **415**, 1
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes (Bidwell et al.) **417**, 119
Multiredox centres
A new approach to one-way electron transfer using multiredox centres organised in Langmuir–Blodgett films (Goldenberg et al.) **408**, 173
Multisteady states
Bifurcation analysis for the Volmer–Heyrovsky mechanism (Berthier et al.) **402**, 29
Multistep mechanisms
Electrochemical impedance of multistep mechanisms: mechanisms with diffusing species (Harrington) **403**, 11

NAD^+ electrochemical reduction
Direct electrochemistry of *Rhodococcus opacus* hydrogenase for the catalysis of NAD^+ reduction (Gros et al.) **405**, 189
NADH
Oxidation kinetics of NADH by heteropolyanions (Keita et al.) **404**, 271
Electrochemical oxidation of dihydronicotinadmide adenine dinucleotide (NADH) on single crystal gold electrodes (Xing et al.) **406**, 83
Nafion®
In-situ resistance measurements of Nafion® 117 membranes in polymer electrolyte fuel cells (Büchi, Scherer) **404**, 37
Severe inhibition of the diffusion and electroactivity of $Cu(bpy)_2^{2+}$ complexes incorporated in Nafion® coatings on electrodes (Rong, Anson) **404**, 173
Photoelectrochemistry at transparent SnO_2 electrodes: supersensitization in Nafion® films by mono- and dinuclear ruthenium(II) complexes with hydroquinone (Tan-Sien-Hee, Mesmaeker) **406**, 147
Catalytic oxidation of dopamine at a microdisk platinum electrode modified by electrodeposition of nickel hexacyanoferrate and Nafion® (Zhou et al.) **408**, 219
Determination of charge transfer distance by potential-step chronoamperospectrometry in a Nafion® film containing $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **412**, 159
Studies on ion-exchange membranes. Part 1. Effect of humidity on the conductivity of Nafion® (Anantaraman, Gardner) **414**, 115
Electrochemical behavior of cysteine at a Nafion®|cobalt(II) modified electrode (Sugawara et al.) **414**, 253
Effects of hydration on the resistances and electrochemical responses of Nafion® coatings on electrodes (Shi, Anson) **415**, 41
A reagentless biosensor highly sensitive to hydrogen peroxide based on new methylene blue N dispersed in Nafion® gel as the electron shuttle (Liu et al.) **417**, 59
Hydrogen oxidation on partially immersed Nafion®-coated electrodes (Inaba et al.) **417**, 105
Use of Nafion® coated carbon disk microelectrodes in solution without and with different concentrations of supporting electrolyte (Daniele et al.) **418**, 29
Nanostructured materials
From monolayers to nanostructured materials: an organic chemist's view of self-assembly (Bethell et al.) **409**, 137
1,4-Naphthoquinone
Electrochemical study of intramolecular charge transfer complexes derived from 1,4-naphthoquinone. Part 2. Electro-oxidation of 2-substituted 3-arylamino-1,4-naphthoquinone autocomplexes (Turovska et al.) **414**, 221
Catalysis of dioxygen reduction to hydrogen peroxide at the surface of carbon paste electrodes modified by 1,4-naphthoquinone and some of its derivatives (Golabi, Raoof) **416**, 75
Neodymium
Electrochemical behavior of the molybdotungstate heteropoly complex with neodymium, $K_{10}H_3[Nd(SiMo_7W_4O_{39})_2]\cdot xH_2O$ in aqueous solution (Cheng et al.) **407**, 97
Network model
Simulation and interpretation of electrochemical impedances using the network method (Horno et al.) **402**, 73
A network approach to simulation of electrical properties of symmetric electrochemical cells (Moya et al.) **413**, 1
A network approach to the simulation of electrical properties of asymmetric electrochemical cells (Moya et al.) **413**, 9
Neurotransmitters
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Neutral species
Changes in the population of neutral species and charge carriers during electrochemical oxidation of polypyrrole (Fermín et al.) **401**, 207
Neutron reflection
Neutron reflection studies of poly(phenol) films (Roser et al.) **411**, 153
New methylene blue N
A reagentless biosensor highly sensitive to hydrogen peroxide based on new methylene blue N dispersed in Nafion® gel as the electron shuttle (Liu et al.) **417**, 59
Nickel
New electropolymerized nickel porphyrin films. Application to the detection of nitric oxide in aqueous solution (Trévin et al.) **408**, 261
Nickel-catalyzed electrochemical homocoupling of alkenyl halides: rates and mechanisms (Cannes et al.) **412**, 85
Detection of CO desorbing from the Ni electrode surface by DEMS (Zinola et al.) **415**, 165
Nickel dimethylglyoxime complex
The adsorption of nickel dimethylglyoxime complex on mercury (Ramirez et al.) **407**, 219
Nickel electrodes
Surface Raman spectra of pyridine and hydrogen on bare platinum and nickel electrodes (Ren et al.) **415**, 175

Nickel hexacyanoferrate
XPS study and electrochemical behaviour of the nickel hexacyanoferrate film electrode upon treatment in alkaline solutions (Cataldi et al.) **417**, 89
Nickel–hydrogen battery
Kinetics of the hydrogen evolution reaction in stoichiometric and non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries (Iwakura et al.) **411**, 109
Nickel oxide
Optical, spectroelectrochemical and structural properties of sol–gel derived Ni-oxide electrochromic film (Šurca et al.) **408**, 83
Behaviour of nickel species in molten $Li_2CO_3 + Na_2CO_3 + K_2CO_3$. Part 2. Electrochemical characterization under $P(CO_2) = 0.1$ atm + $P(O_2) = 0.9$ atm, $P(Ar) = 1$ atm and $P(O_2) = 1$ atm (Malinowska et al.) **417**, 135
Nickel salen
Catalytic reduction of α,ω-dihaloalkanes with nickel(I) salen as a homogeneous-phase and polymer-bound mediator (Dahm, Peters) **406**, 119
Electrochemical and spectroscopic characterization of anodically formed nickel salen polymer films on glassy carbon, platinum, and optically transparent tin oxide electrodes in acetonitrile containing tetramethylammonium tetrafluoroborate (Dahm et al.) **410**, 163
$NiCo_2O_4$
Enhancement of surface areas of Co_3O_4 and $NiCo_2O_4$ electrocatalysts prepared by spray pyrolysis (Nkeng et al.) **402**, 81
$[Ni(CRH)]^{2+}$
Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 (Bujno et al.) **407**, 131
Ni–Fe hexacyanoferrates
Solid state electrochemical studies of mixed nickel–iron hexacyanoferrates with the help of abrasive stripping voltammetry (Jayarama Reddy et al.) **403**, 209
The formation of bilayered nickel–iron, cadmium–iron and cadmium–silver hexacyanoferrates by an electrochemically driven insertion–substitution mechanism (Dostal et al.) **415**, 133
NiOEP
A spectroelectrochemical cell for measurements in highly purified solvents (Geskes, Heinze) **418**, 167
Ni-tetraazamacrocyclic complexes
In-situ surface-enhanced Raman spectroscopic study of gold electrodes modified with nickel tetraazamacrocyclic complexes (Bukowska et al.) **403**, 47
Nitrate
Electrochemical study of diamond thin films in neutral and basic solutions of nitrate (Bouamrane et al.) **405**, 95
Nitric oxide
Electrocatalytic reduction of nitrite by copper complexes of 1,10-phenanthroline and 2,2′ : 6′,2″-terpyridine (Fung, Wong) **401**, 263
New electropolymerized nickel porphyrin films. Application to the detection of nitric oxide in aqueous solution (Trévin et al.) **408**, 261
Nitrite
Electrocatalytic reduction of nitrite by copper complexes of 1,10-phenanthroline and 2,2′ : 6′,2″-terpyridine (Fung, Wong) **401**, 263
Nitrobenzene
Voltammetry in the presence of ultrasound: surface and solution processes in the sonovoltammetric reduction of nitrobenzene at glassy carbon and gold electrodes (Marken et al.) **414**, 95
The influence of copper adlayer structure on the electroreduction of nitrobenzene at ordered Au(111) as studied by cyclic voltammetry combined with solution flushing tactics (Chang et al.) **415**, 169
SPE composite microdisk electrodes used in organic electrosynthesis (Jiang et al.) **417**, 89
Nitrobenzoyl
The electrochemical cleavage of the nitrobenzoyl group from butyl nitrobenzoates in N,N-dimethylformamide (Alves Jorge, Stradiotto) **415**, 27
Nitromethane reduction
Impedance voltammetric analysis of a consecutive E–C–E mechanism with two diffusing intermediates with application to the reduction of nitromethane (Prieto et al.) **405**, 1
Nitrous oxide
Electrocatalysis for N_2O reduction on metal electrodes (Kudo, Mine) **408**, 267
Non-Cottrellian behaviour
Numerical simulation of the time-dependent current to membrane-covered oxygen sensors. Part IV. Experimental verification that the switch-on transient is non-Cottrellian for microdisc electrodes (Sutton et al.) **408**, 21
Non-ideal electrolyte solution
Diffuse layer near the zero charge point in the case of non-ideal electrolyte solutions (Grafov, Damaskin) **416**, 25
Non-linear behavior of model
Analysis of parameters relative to weak adsorption from voltammetric data (Wu et al.) **407**, 45
Non-linearity
Discontinuous impedance near a saddle-node bifurcation (Berthier et al.) **410**, 247
Non-linear region
Extension of fast transient techniques to the non-linear region (Kaplevatsky et al.) **407**, 51
Non-steady-state chronoamperometry
A study of the dependence of ferrocene diffusion on electrolyte concentration and size in a polymer medium using non-steady-state chronoamperometry (Dong, Zhou) **403**, 117
Non-stoichiometric hydrogen storage alloy
Kinetics of the hydrogen evolution reaction in stoichiometric and non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries (Iwakura et al.) **411**, 109
Non-stoichiometric lead oxides
Abnormal photocurrent of the anodic film on lead in sulfuric acid solution (Wan et al.) **414**, 159
Nontronite
Catalysis of the electroreduction of hydrogen peroxide by nontronite clay coatings on glassy carbon electrodes (Zen et al.) **408**, 157
Normal pulse polarography
Non-ideality effect for self-diffusion coefficient of lead cryptate by normal pulse polarography (Lehmani et al.) **416**, 121
Nucleation
The role of pH and Cu(II) concentration in the electrodeposition of Cu(II) in NH_4Cl solutions (Nila, González) **401**, 171
Numerical calculations
Numerical steady state analysis of current density distributions in axisymmetrical systems for multi-ion electrolytes: application to the rotating disc electrode (Van Den Bossche et al.) **411**, 129
Numerical simulation
Finite analytic numerical method — a new numerical simulation method for electrochemical problems (Jin et al.) **411**, 19
Electroanalytical simulations. Part 16. Simulation of controlled current bulk electrolysis experiments by orthogonal collocation: general model and simple charge transfer mechanisms (Speiser) **413**, 67

Oblate hemispheroid microelectrode
Application of a finite analytic numerical method. Part 2. Digital simulation of charge transfer to an oblate hemispheroid microelectrode and experiment verification (Qian et al.) **414**, 1

Octacyanophthalocyanine
Photoelectrochemical oxidation of 2-mercaptoethanol at the surface of octacyanophthalocyanine thin film electrodes (Karmann et al.) **405**, 149
Octadecanethiol
Infrared–infrared sum-frequency generation from adsorbates on metal surfaces (Potterton, Bain) **409**, 109
2-Octanone
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 1. Simple ion transfers (Cheng, Schiffrin) **409**, 9
OH adsorption
Kinetic and mechanistic study of methanol oxidation on a Pt(111) surface in alkaline media (Tripković et al.) **418**, 9
OH^- anions
The influence of OH^- chemisorption on the catalytic properties of gold single crystal surfaces for oxygen reduction in alkaline solutions (Štrbac, Adžić) **403**, 169
Oligomer
The electrochemical properties of an oligomeric viologen film (Lieder, Schläpfer) **411**, 87
Electro-oxidative oligomerization of 1,5-diaminonaphthalene in acetonitrile medium (Abdel Azzem et al.) **417**, 163
Oligomeric ferrocene
Interaction over three redox centers at conjugated oligomeric ferrocenes with $N = 2$ to 6 nuclei (Aoki et al.) **416**, 151
Oligothiophene
Electrochemical oxidative coupling of cyano-substituted oligothiophenes (Demanze et al.) **414**, 61
One-way electron transfer
A new approach to one-way electron transfer using multiredox centres organised in Langmuir–Blodgett films (Goldenberg et al.) **408**, 173
Optical absorption
A quantitative study of gravity-induced convection in two-dimensional parallel electrodeposition cells (Chazalviel et al.) **407**, 61
Optical properties
Optical characterization of bismuth reversible electrodeposition (Córdoba de Torresi, Carlos) **414**, 11
Optical second harmonic generation
In situ optical second harmonic generation studies of electrochemical deposition of tellurium on polycrystalline gold electrodes (Yagi et al.) **401**, 95
Optical spectrum
Cyclic voltammetry and spectroelectrochemical studies of cation radical and dication adsorption behavior for 7,7′-diphenyl-7,7′-diapocarotene (Gao et al.) **411**, 51
O_2 reduction
The cathodic reduction of oxygen on n-type UO_2 in dilute alkaline aqueous solution (Shoesmith et al.) **406**, 69
Organic acid dopants
Electrochemical, electrochromic and photoelectrochemical behavior of a highly soluble polyaniline derivative: poly(*o*-methoxyaniline) doped with functionalized organic acids (Gazotti, Jr. et al.) **415**, 107
Organic adlayers
On-line mass spectrometric studies on the interaction between organic adlayers on platinum. Part 1. Consecutive adsorption of formic acid and propargyl alcohol (Pastor et al.) **404**, 77
The surface structure of Au(111) in the presence of organic adlayers: a combined electrochemical and surface X-ray scattering study (Wandlowski et al.) **409**, 155
Organic electrosynthesis
SPE composite microdisk electrodes used in organic electrosynthesis (Jiang et al.) **417**, 89
Organic–inorganic hybrid gels
Modified electrodes from organic–inorganic hybrid gels formed by hydrolysis–polycondensation of some trimethoxysilylferrocenes (Audebert et al.) **413**, 89
Organic ligands
Voltammetry of labile heterogeneous complexes with low diffusion coefficients (Pinheiro et al.) **402**, 47
Organic peroxides
Electrocatalytic reduction of organic peroxides in organic solvents by microperoxidase-11 immobilized as a monolayer on a gold electrode (Moore et al.) **417**, 189
Organic polymer electrode
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Organic solvents
Electrocatalytic reduction of organic peroxides in organic solvents by microperoxidase-11 immobilized as a monolayer on a gold electrode (Moore et al.) **417**, 189
Organic substrates
A case of the indirect role of traces of water in the electroreduction of organic substrates (Arévalo et al.) **418**, 47
Organomercury compounds
Surface redox reactions of organomercury compounds: evidence for an interconnected one-electron ladder scheme in the reduction of mercurated uridine-5′-triphosphate (Wagner, Chambers) **408**, 243
Organometallic-containing screen-printed carbon electrodes
Efficacy of organometallic-containing screen-printed carbon strips as catalysts for the oxidation of hydrogen peroxide: a voltammetric and X-ray photoelectron spectroscopic investigation (Gilmartin et al.) **401**, 127
Orientation
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study (Brolo, Irish) **414**, 183
Orthogonal collocation
Electroanalytical simulations. Part 16. Simulation of controlled current bulk electrolysis experiments by orthogonal collocation: general model and simple charge transfer mechanisms (Speiser) **413**, 67
Oscillations
Spatio-temporal pattern formation during the reduction of peroxodisulfate in the bistable and oscillatory regime: a surface plasmon microscopy study (Flätgen et al.) **409**, 183
Osmium
Unusual twin adsorption waves in voltammetry of trimetallic clusters of Os and Ru undergoing redox-induced reorientation of the alkyne ligand (Pospíšil et al.) **412**, 147
Effects of hydration on the resistances and electrochemical responses of Nafion® coatings on electrodes (Shi, Anson) **415**, 41
Osmium thiol complexes
Adsorption–desorption processes of redox-active osmium thiol monolayers (Bretz, Abruña) **408**, 199
Osteryoung square wave voltammetry
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Overlap integral
Redox interaction in mixed-valence trinuclear ring complexes by means of quantum chemical approach (Chen, Aoki) **402**, 189
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation (Aoki) **419**, 33
Overpotential deposition
Underpotential–overpotential transition in a silver overlayer on platinum. Part 2. Reversible 2D–3D rearrangement (Vaskevich et al.) **412**, 117
Oxidase enzyme
H_2O_2 from an oxidase enzyme can be detected cathodically using metal microparticles dispersed in a polymeric film electrode (Somasundrum et al.) **407**, 247
Oxidation
Limiting current increase of oxidation of ferrocyanide anions in water and electrolyte solutions during freezing (Tanaka, Hasebe) **401**, 163

Adsorption and oxidation of thiophene-3-methanol on platinum electrodes studied by electrochemical and IR spectroscopic methods (Pohjakallio et al.) **401**, 191
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part 3. Croconic acid oxidation on Pt(111) surfaces in acid medium (Carbó et al.) **404**, 163
Photoelectrochemical oxidation of 2-mercaptoethanol at the surface of octacyanophthalocyanine thin film electrodes (Karmann et al.) **405**, 149
Electrocatalytic oxidation of ethylene glycol in 0.5 M H_2SO_4 and 0.5 M NaOH solutions at a bimetallic deposited electrode (Ureta-Zañartu et al.) **405**, 159
Electrochemical oxidation of dihydronicotinadmide adenine dinucleotide (NADH) on single crystal gold electrodes (Xing et al.) **406**, 83
Electrocatalytic activity of N,N′,N″,N‴-tetramethyl-tetra-3,4-pyridoporphyrazinocobalt(II) adsorbed on a graphite electrode towards the oxidation of hydrazine and hydroxylamine (Jiujun Zhang et al.) **406**, 203
Mixed methanol oxidation/oxygen reduction currents on a carbon supported Pt catalyst (Kauranen, Skou) **408**, 189
Electrochemical oxidation of thiourea studied by use of in situ FTIR spectroscopy (Yan et al.) **408**, 225
Anodic oxidation of thioureido derivatives of biogenic amines at a glassy carbon electrode in an aqueous medium (González Lomba et al.) **410**, 87
Electrocatalytic oxidation of aliphatic diols on platinum. Part 4. A kinetic study by means of chromatographic analyses during prolonged electrolyses (Hilmi et al.) **410**, 101
Influence of the geometry of the hanging meniscus contact on the hydrogen oxidation reaction on a Pt(111) electrode in sulphuric acid (Herrero et al.) **410**, 125
Double electropolymer modified platinum electrode to follow the kinetic process H_2O_2 + ascorbic acid. Influence of the reaction on amperometric biosensor applications (Losito, Zambonin) **410**, 181
Effects of chirality during electrochemical oxidation of 2,3 butanediol stereoisomers (Kuhn, Anson) **410**, 243
Electrochemical oxidation of carotenoids containing donor/acceptor substituents (Jeevarajan, Kispert) **411**, 57
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
CO adsorption and oxidation on Pt(111) electrodes modified by irreversibly adsorbed selenium and tellurium (Herrero et al.) **412**, 165
Electrochemical oxidative coupling of cyano-substituted oligothiophenes (Demanze et al.) **414**, 61
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate (Agüí et al.) **414**, 141
Electrochemical oxidation of deca-n-propylcyclopentasilane $[(n\text{-}Pr)_2Si]_5$, dodecamethylcyclohexasilane $(Me_2Si)_6$ and tetradecaethylcycloheptasilane $(Et_2Si)_7$ (Becker et al.) **417**, 77
Electrocatalytic oxidation of thiosulfate by metal hexacyanoferrate film modified electrodes (Chen) **417**, 145
Electrogeneration and solubilities of oxidized poly(2,5-di-(-2-thienyl)-thiophene) (Carrasco et al.) **418**, 115

Oxidation kinetics
Kinetics of methanol oxidation on carbon-supported Pt and Pt + Ru catalysts (Kauranen et al.) **404**, 1
Oxidation kinetics of NADH by heteropolyanions (Keita et al.) **404**, 271

Oxides
The electrochemical dissolution of iron(III) and chromium(III) oxides and ferrites under conditions of abrasive stripping voltammetry (Grygar) **405**, 117

Oxidized iridium
A comparative voltammetric study of the Ir|H_2SO_4 and Ir|$HClO_4$ aqueous interfaces (Fonseca et al.) **415**, 89

Oxygen
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part I: Effect of temperature and alkali carbonate mixture (Reeve, Tseung) **403**, 69
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part II: Effect of $SrCO_3$, $BaCO_3$ and SnO_2 additives (Reeve, Tseung) **403**, 85
The influence of OH^- chemisorption on the catalytic properties of gold single crystal surfaces for oxygen reduction in alkaline solutions (Štrbac, Adžić) **403**, 169
An in-situ Raman study of the effect of the support for adsorbed iridium-chelates in catalysing oxygen reduction (Bouwkamp-Wijnoltz et al.) **406**, 195
Mixed methanol oxidation/oxygen reduction currents on a carbon supported Pt catalyst (Kauranen, Skou) **408**, 189

Oxygenation
Electrocatalytic oxygenation of alkenes by a sterically hindered water-soluble iron porphyrin in aqueous solutions (Lee, Su) **414**, 69

Oxygen reduction
Electrically heated cylindrical microelectrodes. The reduction of dissolved oxygen on Pt (Zerihun, Gründler) **404**, 243
Water effect on oxygen reduction in molten (Li + K)CO_3 eutectic (Nishina et al.) **408**, 181
Catalytic pathways for the electroreduction of O_2 at graphite electrodes on which a macrocyclic cobalt complex is adsorbed (Kang et al.) **413**, 165
Oxygen reduction on a new electrocatalyst based on highly porous carbonized polyacrylonitrile microcellular foam with very low platinum loading (Ye et al.) **415**, 115
Influence of carbon surface pre-oxidation on the properties of silver + carbon electrocatalysts (Yang, Zhou) **415**, 143

Oxygen sensors
Numerical simulation of the time-dependent current to membrane-covered oxygen sensors. Part IV. Experimental verification that the switch-on transient is non-Cottrellian for microdisc electrodes (Sutton et al.) **408**, 21

Palladium
Analysis of the factors determining the sensitivity of a miniaturized glucose biosensor made by codeposition of palladium and glucose oxidase onto an 8 μm carbon fiber (Sakslund et al.) **402**, 149
The insertion/extraction of deuterium (hydrogen) at Pd sheet electrodes in $D_2O(H_2O)$ + LiOD(LiOH) electrolyte (Mengoli et al.) **403**, 143
Kinetics of the deuterium and hydrogen evolution reactions at palladium in alkaline solution (Green, Britz) **412**, 59
An investigation of the hydrogen absorption reaction into, and the hydrogen evolution reaction from, a Pd foil electrode (Yang, Pyun) **414**, 127

Palladium–hydrogen
The effect of ultrasound on the electrochemical loading of hydrogen in palladium (Wark et al.) **418**, 199

Parametric analysis
Analysis of parameters relative to weak adsorption from voltammetric data (Wu et al.) **407**, 45

Paraquat
Square wave voltammetric determination of paraquat and diquat in aqueous solution (Walcarius, Lamberts) **406**, 59

Passivation
The influence of some sulphur-containing anions on the anodic behaviour of zinc in an alkaline medium (Abd El Rehim et al.) **401**, 113

Photoelectrochemical imaging of the etching and passivation of silicon in aqueous KOH (Hutton et al.) **418**, 153
Passivity
Electrochemical and X-ray photoelectron spectroscopy studies of passive film on tin in citrate buffer solution (Šeruga et al.) **407**, 83
Pattern formation
Spatio-temporal pattern formation during the reduction of peroxodisulfate in the bistable and oscillatory regime: a surface plasmon microscopy study (Flätgen et al.) **409**, 183
Pb
Mechanism of lead dioxide electrodeposition (Velichenko et al.) **405**, 127
PbO films
Structure, morphology and photoelectrochemical responses of anodic PbO films formed on Pb electrodes in various concentrations of alkaline solution (Montaser et al.) **419**, 47
$PbO_n + SnO_n$ oxide films
Photoelectrochemical studies of oxide film of $PbO_n + SnO_n$ obtained by potentiodynamic anodisation of Pb + Sn alloy electrode in alkaline medium (Mukhopadhyay et al.) **401**, 139
Pd membrane cathode
Surface hydrogen processes studied by isotope exchange reactions on a Pd membrane cathode (Yoshitake et al.) **401**, 81
PEMFC
Hydrogen oxidation on partially immersed Nafion®-coated electrodes (Inaba et al.) **417**, 105
Pentafluoronitrobenzene
Voltammetry under high mass transport conditions. The application of the high speed channel electrode to the reduction of pentafluoronitrobenzene (Coles et al.) **411**, 121
Perchloric acid
The pzc of Au(111) and Pt(111) in a perchloric acid solution: an ex situ approach to the immersion technique (Hamm et al.) **414**, 85
Perfluoroalkyl dihalides
Electro-organic chemistry of fullerenes. Part 1. Indirect cathodic reduction of *vic*-dihalides and perfluoroalkyl halides using C_{60} as mediator. Cyclic voltammetric study and preparative-scale electrolysis (Fuchigami et al.) **411**, 115
Permeability
Channel mimetic sensing membranes for alkali metal cations based on oriented monolayers of calixarene esters (Yagi et al.) **401**, 65
Peroxodisulphate reduction
Electrocatalytic reduction of peroxodisulfate anion on Au(111) in acidic aqueous solutions (Samec et al.) **409**, 165
Pesticides
Square wave voltammetric determination of paraquat and diquat in aqueous solution (Walcarius, Lamberts) **406**, 59
pH
The effect of pH on the charge transport at redox polymer-modified electrodes: an a.c. impedance study applied to poly(*o*-aminophenol) film electrodes (Rodríguez Nieto, Tucceri) **416**, 1
pH control
Control of the electrochemical reduction of horminone by pH imposition in acetonitrile (Ortiz et al.) **411**, 103
pH effect
Study of pH effect on the relaxation phenomenon of polyaniline by electrochemistry and XPS (Fraoua et al.) **418**, 109
Phase composition
Chemical and phase compositions of zinc + nickel alloys determined by stripping techniques (Elkhatabi et al.) **404**, 45
Phase transitions
Appropriate and inappropriate statistical mechanical treatments for phase transitions at electrified interfaces (Nikitas) **408**, 1
Phenanthroline
On the mechanism of oxidative electropolymerization and film formation for phenanthroline-containing complexes of ruthenium (Zhang et al.) **414**, 23
Phenol
ESR-electrochemistry in-situ studies on chemically modified electrodes (He et al.) **405**, 217
Electrochemical immobilization of horseradish peroxidase on an electro-activated glassy carbon electrode (Zhang et al.) **419**, 85
Phenothiazine dyes
Electrochemistry and photoelectrochemistry of phenothiazine dye–β-cyclodextrin inclusion complexes (Retna Raj, Ramaraj) **405**, 141
A new strategy for the construction of amperometric dehydrogenase electrodes based on laponite gel–methylene blue polymer as the host matrix (Cosnier, Le Lous) **406**, 243
Phenoxaselenine
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35
Phenoxathiine
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35
N-Phenylaza-15-crown-5
Electrochemical studies of *N*-phenylaza-15-crown-5 (Mortimer, Weightman) **418**, 1
2-Phenyl-1,2-benzisoselenazol-3(2H)-one
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
2-Phenyl-1,2-benzisothiazol-3(2H)-one
The electrochemical oxidation of 2-phenyl-1,2-benzisoselenazol-3(2H)-one and its derivatives. A study of the electrode process in dried acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **407**, 175
Phospholipid monolayers
Surface charge density measurements on mercury electrodes covered by phospholipid monolayers (Becucci et al.) **413**, 187
Phosphoric acid fuel cells
An advanced gas diffusion electrode for high performance phosphoric acid fuel cells (Hara et al.) **413**, 81
Phospho-12-tungstic acid
Determination of mixed-valence redox centers and dynamics of charge propagation in a bulk redox-conducting solid: phospho-12-tungstic acid single crystal (Kulesza, Karwowska) **401**, 201
Photoanodes
Metal/semiconductor electrocomposite photoelectrodes: behavior of Ni/TiO_2 photoanodes and comparison of photoactivity of anatase and rutile modifications (Zhou et al.) **402**, 221
Photoanodic dissolution
Chemical and electrochemical interaction of acidic H_2O_2 solutions with (100) InP (Theuwis et al.) **410**, 31
Photocatalytic oxidation
Formation of organic pigment films using photocatalytic reactions of tris(2,2′-bipyridine)ruthenium(II). Mechanistic study on negatively patterned film formation (Hoshino et al.) **406**, 175
Photocurrent
Abnormal photocurrent of the anodic film on lead in sulfuric acid solution (Wan et al.) **414**, 159
The scanning microscope for semiconductor characterization (SMSC): study of the influence of surface morphology on the photoelectrochemical behavior of an n-$MoSe_2$ single crystal electrode by photocurrent and electrolyte electroreflectance imaging (Martínez Chaparro et al.) **418**, 175
Photocurrent doubling
Chemical and electrochemical interaction of acidic H_2O_2 solutions with (100) InP (Theuwis et al.) **410**, 31
Photocurrent spectroscopy
Kinetics of formation and properties of a barrier oxide film on molybdenum (Bojinov et al.) **411**, 37

Photoeffect
Photoelectrochemical behaviour of C_{60} films in various oxidation states (Szűcs et al.) **419**, 39
Photoelectrochemical imaging
Photoelectrochemical imaging of the etching and passivation of silicon in aqueous KOH (Hutton et al.) **418**, 153
Photoelectrochemical microscopy (PEM)
In-situ study of the electrochemical deposition process of CdTe and $Hg_xCd_{1-x}Te$ using laser-scanning photoelectrochemical microscopy (You et al.) **405**, 233
Photoelectrochemical properties
Electrochemical, electrochromic and photoelectrochemical behavior of a highly soluble polyaniline derivative: poly(*o*-methoxyaniline) doped with functionalized organic acids (Gazotti, Jr. et al.) **415**, 107
Photoelectrochemical reduction
Photoelectrochemical reduction of carbon dioxide in aqueous solutions on p-GaP electrodes: an a.c. impedance study with phase-sensitive detection (Flaisher et al.) **402**, 97
Photoelectrochemistry
Photoelectrochemical studies of oxide film of $PbO_n + SnO_n$ obtained by potentiodynamic anodisation of Pb + Sn alloy electrode in alkaline medium (Mukhopadhyay et al.) **401**, 139
Electrochemistry and photoelectrochemistry of phenothiazine dye–β-cyclodextrin inclusion complexes (Retna Raj, Ramaraj) **405**, 141
Photoelectrochemical oxidation of 2-mercaptoethanol at the surface of octacyanophthalocyanine thin film electrodes (Karmann et al.) **405**, 149
Investigation of controlled periodic illumination effects on photo-oxidation processes at titanium dioxide films using rotating ring disk photoelectrochemistry (Foster et al.) **406**, 213
Photoelectrochemical kinetics on a copper electrode (Kublanovsky et al.) **415**, 161
The scanning microscope for semiconductor characterization (SMSC): study of the influence of surface morphology on the photoelectrochemical behavior of an n-$MoSe_2$ single crystal electrode by photocurrent and electrolyte electroreflectance imaging (Martínez Chaparro et al.) **418**, 175
Structure, morphology and photoelectrochemical responses of anodic PbO films formed on Pb electrodes in various concentrations of alkaline solution (Montaser et al.) **419**, 47
Photo-imaging
Electrochemical studies of a hexaarylbiimidazole (Oliver et al.) **403**, 153
Photoluminescence
Modelling of n-type CdTe photoluminescence variation with polarization: a probe of the shift of semiconductor band edges (Gérard et al.) **401**, 57
Etching and electrochemistry of silicon in acidic bromine solutions (Bressers et al.) **406**, 131
Photo-oxidation
Investigation of controlled periodic illumination effects on photo-oxidation processes at titanium dioxide films using rotating ring disk photoelectrochemistry (Foster et al.) **406**, 213
Photoselective etching
Etching and electrochemistry of silicon in acidic bromine solutions (Bressers et al.) **406**, 131
Photosensitization
Transient absorption spectroscopy of nanostructured semiconductor films at controlled potentials. An in situ spectroelectrochemical investigation of the photosensitization process (Bedja et al.) **401**, 237
pH-switchable electrodes
pH-switched electrochemistry of pyrroloquinoline quinone at Au electrodes modified by functionalized monolayers (Katz et al.) **408**, 107
Pigment Film formation
Formation of organic pigment films using photocatalytic reactions of tris(2,2′-bipyridine)ruthenium(II). Mechanistic study on negatively patterned film formation (Hoshino et al.) **406**, 175
Pillared clay
Redox switching of interlayer spacing in montmorillonite clay (Ravichandran et al.) **406**, 227
Electrochemistry of alumina pillared clay modified electrodes (Petridis et al.) **410**, 93
Pitting
The influence of some sulphur-containing anions on the anodic behaviour of zinc in an alkaline medium (Abd El Rehim et al.) **401**, 113
Plasmin
Electrochemical assay and properties of plasmin adsorbed onto a carbon paste electrode (Longchamp et al.) **412**, 31
Platinized electrode
A novel approach to platinized platinum electrodes: specific adsorption as a partition between the solution phase and the electrodeposited platinum black layer (Horányi) **417**, 185
Platinum
Spectroscopic investigations on the adsorption of trifluoracetate at Pt(100), Pt(110) and Pt(111) (Pastor et al.) **404**, 61
On-line mass spectrometric studies on the interaction between organic adlayers on platinum. Part 1. Consecutive adsorption of formic acid and propargyl alcohol (Pastor et al.) **404**, 77
Steady state voltammetry at microelectrodes for the hydrogen evolution from strong and weak acids under pseudo-first and second order kinetic conditions (Daniele et al.) **404**, 105
Electrocatalytic oxidation of carbon monoxide at lower potentials on platinum-based alloys incorporated in polyaniline (Napporn et al.) **408**, 141
Mixed methanol oxidation/oxygen reduction currents on a carbon supported Pt catalyst (Kauranen, Skou) **408**, 189
Vibrational properties of CN^- adsorbed on platinum and silver: ab initio MCSCF calculations compared with SFG experiments (Tadjeddine et al.) **408**, 237
UHV and electrochemical transfer studies on Pt(110)-(1×2): the influence of bismuth on hydrogen and oxygen adsorption, and the electro-oxidation of carbon monoxide (Hayden et al.) **409**, 51
Upd mechanisms of copper and thallium on a Pt(111) electrode studied by in-situ IRAS and EC-STM (Oda et al.) **409**, 95
Vibrational spectroscopy of the electrochemical interface by visible infrared sum frequency generation (Tadjeddine, Peremans) **409**, 115
Electrocatalytic oxidation of aliphatic diols on platinum. Part 4. A kinetic study by means of chromatographic analyses during prolonged electrolyses (Hilmi et al.) **410**, 101
Double electropolymer modified platinum electrode to follow the kinetic process H_2O_2 + ascorbic acid. Influence of the reaction on amperometric biosensor applications (Losito, Zambonin) **410**, 181
Evaluation of the effect of two-dimensional geometry of Pt single-crystal faces on the kinetics of upd of H using impedance spectroscopy (Morin et al.) **412**, 39
Underpotential–overpotential transition in a silver overlayer on platinum. Part 2. Reversible 2D–3D rearrangement (Vaskevich et al.) **412**, 117
CO adsorption and oxidation on Pt(111) electrodes modified by irreversibly adsorbed selenium and tellurium (Herrero et al.) **412**, 165
Electrically heated cylindrical microelectrodes. Determination of lead on Pt by cyclic voltammetry and cathodic stripping analysis (Zerihun, Gründler) **415**, 85
A study of the effect of ultrasound on mass transport to a microelectrode (Birkin, Silva-Martinez) **416**, 127
Platinum electrode
Comparison of electrosorption at activated polycrystalline and Pt(531) kinked platinum electrodes: surface voltammetry and charge displacement on potentiostatic CO adsorption (Clavilier et al.) **404**, 281
Study of sulphur adlayers on polyoriented platinum electrodes: influence on the electrocatalysis of the SO_2 oxidation reaction (Quijada et al.) **414**, 229

Surface Raman spectra of pyridine and hydrogen on bare platinum and nickel electrodes (Ren et al.) **415**, 175
Scanning electrochemical microscopy (SECM): study of the adsorption and desorption of hydrogen on platinum electrodes in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **418**, 99
Platinum microelectrode
Steady state voltammetry for reduction of cadmium at a Pt microelectrode in dimethylsulphoxide with and without supporting electrolyte (Daniele et al.) **407**, 149
Platinum|Nafion®|reticulated vitrous carbon
Carbon dioxide reduction on platinum|Nafion®|carbon electrodes (Min Huang, Faguy) **406**, 219
Poisoning
Carbon dioxide reduction on platinum|Nafion®|carbon electrodes (Min Huang, Faguy) **406**, 219
Polarization
Electrochemical and X-ray photoelectron spectroscopy studies of passive film on tin in citrate buffer solution (Šeruga et al.) **407**, 83
Polarization phenomena at the water|o-nitrophenyl octyl ether interface. Part 1. Evaluation of the standard Gibbs energies of ion transfer from the solubility and voltammetric measurements (Samec et al.) **409**, 1
Polarization modulation
Real-time polarization modulation infrared spectroscopy applied to the study of water and hydroxide ions at electrode surfaces (Faguy, Richmond) **410**, 109
Polarization resistance
The polarisation resistance, exchange current density and stoichiometric number for the hydrogen evolution reaction: theoretical aspects (Gennero de Chialvo, Chialvo) **415**, 97
Polarography
Electroreduction of thionicotinamide on mercury electrodes in aqueous solutions (Expósito et al.) **402**, 211
On the electroreduction of the anions of pyridine monocarboxylic acid *N*-oxides on mercury electrodes in basic solutions (Angulo, Rodríguez Mellado) **403**, 251
Polarographic study of mercury complexes with some recently synthesized benzo-substituted macrocyclic diamides in binary acetonitrile + water mixtures (Ganjali et al.) **405**, 177
Single and multiple pulse voltammetries at the static mercury drop electrode for reversible reactions with and without amalgam formation (Fatouros et al.) **405**, 197
The polarographic behavior of the corrosion inhibitor dibenzylsulfoxide (Mutombo et al.) **405**, 223
Comparison between polarographic and potentiometric speciation for cadmium/humic acid systems (Pinheiro et al.) **410**, 61
Theory of two $1e^-$ successive electrochemical surface reactions (E_{rev} E_{rev} or E_{rev} E_{irr}) associated with surface chemical reactions in polarography and cyclic voltammetry (Meunier-Prest, Laviron) **410**, 133
A contribution to the elucidation of the reduction mechanism of thioisonicotinamide on mercury electrodes (Ruiz Montoya, Rodríguez Mellado) **417**, 113
Polyacids
The electrochemical properties of oligomeric viologen films immobilised by polyacids (Lieder, Schläpfer) **416**, 89
Polyacrylate
Polypyrrole + polyacrylate composites: electrogeneration (Otero, González-Tejera) **410**, 69
Poly(acrylonitrile-co-butadiene)
Effect of poly(acrylonitrile-co-butadiene) on the charge transfer rate in polypyrrole film (Chae et al.) **412**, 103
Poly(5-aminoquinoline)
New quaternized aminoquinoline polymer films: electropolymerization and characterization (Abd El-Rahman, Schultze) **416**, 67
Polyaniline
The influence of defects in polyaniline structure on its electroactivity: optimization of 'self-doped' polyaniline synthesis (Karyakin et al.) **402**, 217
Polyaniline as an electrocatalytic material (Mandić, Duić) **403**, 133
Electro-oxidation of C1 molecules at Pt-based catalysts highly dispersed into a polymer matrix: effect of the method of preparation (Napporn et al.) **404**, 155
Electrocatalytic oxidation of carbon monoxide at lower potentials on platinum-based alloys incorporated in polyaniline (Napporn et al.) **408**, 141
Electrochemical and chemical synthesis of polyaniline on the surface of vacuum deposited polyaniline films (Nekrasov et al.) **412**, 133
The bioelectrochemical response of the polyaniline sarcosine oxidase electrode (Yang, Mu) **415**, 71
Electrodeposition of protective polyaniline films on mild steel (Camalet et al.) **416**, 179
Poly(3-bromothiophene)
Electrocatalytic deposition of poly(3-bromothiophene) (Zhao, Pickup) **404**, 55
Polycondensation
Modified electrodes from organic–inorganic hybrid gels formed by hydrolysis–polycondensation of some trimethoxysilylferrocenes (Audebert et al.) **413**, 89
Polycrystalline gold electrodes
In situ optical second harmonic generation studies of electrochemical deposition of tellurium on polycrystalline gold electrodes (Yagi et al.) **401**, 95
Infrared spectroscopic observation of water at a polycrystalline gold electrode|aqueous halide solution interface (Kitamura et al.) **412**, 183
Polycrystalline platinum
Electrochemical studies of the adsorption of aniline on a smooth polycrystalline platinum electrode (Fıçıcıoğlu et al.) **408**, 231
Poly(3,4-dimethoxypyrrole) tosylate
Highly conductive free-standing films by electrochemical polymerisation of 3,4-dimethoxypyrrole (Merz, Graf) **412**, 11
Poly(2,5-di-(-2-thienyl)-thiophene)
Electrochemical behaviour of poly(2,5-di-(-2-thienyl)-thiophene): properties of the reduced polymer (Brillas et al.) **418**, 123
Polyelectrolyte
A study of the dependence of ferrocene diffusion on electrolyte concentration and size in a polymer medium using non-steady-state chronoamperometry (Dong, Zhou) **403**, 117
Polyethylene oxide
FTIR characterization of PEO + $LiN(CF_3SO_2)_2$ electrolytes (Wen et al.) **408**, 113
Polyfuran
Difuryl polyenes as precursors of highly conducting electrogenerated conjugated polymers (Benahmed-Gasmi et al.) **406**, 231
Polymer battery
Examination of the cleavage and formation of the disulfide bond in poly[dithio-2,5-(1,3,4-thiadiazole)] by redox reaction (Shouji, Oyama) **410**, 229
Polymer chain length
A study of the dependence of ferrocene diffusion on chain length in polymer electrolytes (Zhou, Dong) **414**, 121
Polymer coated electrodes
Ion-exchange voltammetry of tris(2,2′-bipyridyl) ruthenium(II), iron(II), osmium(II) and tris(2,2′-bipyrazyl) ruthenium(II) in acetonitrile solutions at poly(ester-sulphonate) coated electrodes (Hanzlik et al.) **404**, 89
Polymer composites
Polypyrrole + polyacrylate composites: electrogeneration (Otero, González-Tejera) **410**, 69

Polymer electrolyte
A study of the dependence of ferrocene diffusion on chain length in polymer electrolytes (Zhou, Dong) **414**, 121
Polymer electrolyte fuel cell
In-situ resistance measurements of Nafion® 117 membranes in polymer electrolyte fuel cells (Büchi, Scherer) **404**, 37
Theory of water management at the anode side of polymer electrolyte fuel cell membranes (Okada et al.) **413**, 49
Polymer film
Electropolymerization of iron phenanthrolines and voltammetric response for pH and application on electrocatalytic sulfite oxidation (Chen) **401**, 147
Electrochemical formation of cationic iridium(III)–hydrido complexes in solution and in polymeric films: their chemical, electrochemical and electrocatalytic activity in the hydrogen generation process (Caix et al.) **403**, 189
Electrocatalytic deposition of poly(3-bromothiophene) (Zhao, Pickup) **404**, 55
Xanthine and hypoxanthine sensors based on xanthine oxidase immobilized in poly(mercapto-p-benzoquinone) film (Arai et al.) **410**, 173
Neutron reflection studies of poly(phenol) films (Roser et al.) **411**, 153
New quaternized aminoquinoline polymer films: electropolymerization and characterization (Abd El-Rahman, Schultze) **416**, 67
Polymeric materials
Electrochemical and spectroscopic characterization of anodically formed nickel salen polymer films on glassy carbon, platinum, and optically transparent tin oxide electrodes in acetonitrile containing tetramethylammonium tetrafluoroborate (Dahm et al.) **410**, 163
Polymerization
Dispersion of crystallites of the metal substrate during the electropolymerization of 2-hydroxy-3-aminophenazine (HAPh) on Au: effect of Au crystallites on the kinetics and mechanism of charge-transfer reactions between the polymer and redox species in electrolyte (Kelaidopoulou et al.) **404**, 113
Polymerization mechanism
Electrochemical behaviour of nitroindoles: oxidative electropolymerization and reduction of the nitro group of polymerized and non-polymerized 4-nitro and 5-nitroindole (Kokkinidis, Kelaidopoulou) **414**, 197
In situ FTIR-ATR spectroscopic investigations on the polymerization process and the redox behavior of poly(thienylpyrrole) thin film electrodes in aqueous and non-aqueous solutions. Part 1. Characterization of the polymerization process in acetonitrile containing different supporting salts (Ping, Nauer) **416**, 157
Polymer-modified electrodes
Polymer-modified electrodes with pendant $[Rh^{III}(C_5Me_5)(L)Cl]^+$-complexes formed by γ-irradiation cross-linking (Höfer et al.) **402**, 115
Poly(3-methylthiophene)
H_2O_2 from an oxidase enzyme can be detected cathodically using metal microparticles dispersed in a polymeric film electrode (Somasundrum et al.) **407**, 247
Dynamic impedance measurements on a thin-film poly-3-methylthiophene electrode: memory effects and space charge formation (Semenikhin et al.) **408**, 67
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate (Agüí et al.) **414**, 141
Post-polymerization electrochemical functionalization of a conducting polymer: anodic cyanation of poly(*p*-dimethoxybenzene) (Fabre, Simonet) **416**, 187
Poly(nitroindole)
Electrochemical behaviour of nitroindoles: oxidative electropolymerization and reduction of the nitro group of polymerized and non-polymerized 4-nitro and 5-nitroindole (Kokkinidis, Kelaidopoulou) **414**, 197
Poly(*N*-vinylcarbazole)
Electrochemical activity of poly(*N*-vinylcarbazole) films in acetonitrile solution and in acetonitrile + water mixtures. Correlation between spectroelectrochemical and EPR results (Skompska, Kudelski) **403**, 125
Poly(*o*-aminophenol)
The effect of pH on the charge transport at redox polymer-modified electrodes: an a.c. impedance study applied to poly(*o*-aminophenol) film electrodes (Rodríguez Nieto, Tucceri) **416**, 1
Poly(3-octylthiophene)
Reversible chemical doping of self-assembled poly(3-octylthiophene) monolayers on gold electrodes (Gao, Siow) **412**, 179
Poly(*o*-phenylenediamine)
Comparative study of anion-involvement in redox transformations of poly(*o*-phenylene-diamine) (PPD) films by a coupled electrochemical and radiometric technique (Martinusz et al.) **404**, 145
Ion pairing between dissolved poly(*o*-phenylenediamine) and halogenide ions (Yano, Nagaoka) **410**, 213
Spectroelectrochemical studies of poly-*o*-phenylenediamine. Part 1. In situ resonance Raman spectroscopy (Wu et al.) **417**, 53
Polyorientation
Study of sulphur adlayers on polyoriented platinum electrodes: influence on the electrocatalysis of the SO_2 oxidation reaction (Quijada et al.) **414**, 229
Poly(*o*-toluidine)
Effect of temperature changes in the range 293 to 208 K on the in situ impedance of poly-*o*-toluidine (Florit) **408**, 257
IR study of the first redox couple of poly(*o*-toluidine). Anion involvement and potential dependence in strongly acidic solutions (Andrade et al.) **415**, 153
IR response of poly(*o*-toluidine): spectral modifications upon redox state change (Andrade et al.) **419**, 15
Poly(*p*-dimethoxybenzene)
Post-polymerization electrochemical functionalization of a conducting polymer: anodic cyanation of poly(*p*-dimethoxybenzene) (Fabre, Simonet) **416**, 187
Poly(phenol)
Neutron reflection studies of poly(phenol) films (Roser et al.) **411**, 153
Polyphenol oxidase
A kinetic model for the electroenzymatic processes involved in polyphenol-oxidase-based amperometric catechol sensors (Desprez, Labbé) **415**, 191
Poly(*p*-phenylene)
Electrochemical doping and dedoping of vacuum deposited poly(p-phenylene) thin films as studied by in situ spectrocyclic voltammetry (Miyashita, Kaneko) **403**, 53
Polypyrrole
Changes in the population of neutral species and charge carriers during electrochemical oxidation of polypyrrole (Fermín et al.) **401**, 207
Electrochemical and electrocatalytic properties of polypyrrole film doped with heteropolyanions (Wang, Li) **408**, 77
Polypyrrole + polyacrylate composites: electrogeneration (Otero, González-Tejera) **410**, 69
Effect of poly(acrylonitrile-co-butadiene) on the charge transfer rate in polypyrrole film (Chae et al.) **412**, 103
Influence of synthesis conditions on polypyrrole–poly(styrenesulphonate) composite electroactivity (Otero, Sansiñena) **412**, 109
Nature of ion sensitivity of polypyrrole electrodes (Tamm et al.) **414**, 149
Thermally enhanced conformational relaxation during electrochemical oxidation of polypyrrole (Otero, Grande) **414**, 171

Polypyrrole film
Dispersion of the interface of a conducting insulating zone temporarily generated in a polypyrrole film (Tezuka et al.) **402**, 161
Analysis of the long-term potential stability of an all-solid-state potassium-selective electrode with electroactive polypyrrole film (Momma et al.) **407**, 91
Polypyrroles
Complexing properties of poly[3-(aza crown ether)pyrroles] to cobalt^{2+} and their catalytic properties towards oxygen reduction (Korri Youssoufi et al.) **406**, 187
Polyruthenocene
Electrochemical synthesis and redox properties of a polyruthenocene electrode film (Shimura et al.) **403**, 219
Poly(styrenesulphonate)
Influence of synthesis conditions on polypyrrole–poly(styrenesulphonate) composite electroactivity (Otero, Sansiñena) **412**, 109
Polysulfide oxidation
Electrochemical and spectroelectrochemical study of the oxidation of S_4^{2-} and S_6^{2-} ions in liquid ammonia (Levillain et al.) **405**, 85
Poly[(tetraethyldisilanylene)oligo(2,5-thienylene)] derivatives
Electrochemical anion doping of poly[(tetraethyldisilanylene)oligo(2,5-thienylene)] derivatives and their p-type semiconducting properties (Kunugi et al.) **414**, 135
Poly(thienylpyrrole)
In situ FTIR-ATR spectroscopic investigations on the polymerization process and the redox behavior of poly(thienylpyrrole) thin film electrodes in aqueous and non-aqueous solutions. Part 1. Characterization of the polymerization process in acetonitrile containing different supporting salts (Ping, Nauer) **416**, 157
Poly(thiophene-3-methanol)
In situ FTIR studies on the redox properties of poly(thiophene-3-methanol) in PF_6^- and ClO_4^- electrolytes (Pohjakallio et al.) **406**, 165
Poly[3-(ω-4-pyridylalkyl)thiophenes]
Electrochemical properties of poly[3-(ω-4-pyridylalkyl)thiophenes] (Wang, Keene) **405**, 59
Polyvinylferrocene
Dynamic quartz crystal impedance measurements of polyvinylferrocene film deposition (Bandey et al.) **410**, 219
Poly(4-vinylpyridine)
Factors affecting selective electrocatalytic CO_2 reduction with cobalt phthalocyanine incorporated in a polyvinylpyridine membrane coated on a graphite electrode (Abe et al.) **412**, 125
Porosity of polyaniline film
The morphology of different metals electrodeposited onto polyaniline films (Jović et al.) **408**, 149
Porous electrode
Oxygen reduction on a new electrocatalyst based on highly porous carbonized polyacrylonitrile microcellular foam with very low platinum loading (Ye et al.) **415**, 115
Porous films
Transport phenomena inside the pores involved in the kinetics and mechanism of growth of porous anodic Al_2O_3 films on aluminium (Patermarakis) **404**, 69
Porous membranes
Scanning electrochemical microscopy: amperometric probing of diffusional ion fluxes through porous membranes and human dentine (Nugues, Denuault) **408**, 125
Porous silicon
Etching and electrochemistry of silicon in acidic bromine solutions (Bressers et al.) **406**, 131
Electrochemistry of porous and crystalline silicon electrodes in methylviologen solutions (Kooij et al.) **406**, 139
Porphyrin
New electropolymerized nickel porphyrin films. Application to the detection of nitric oxide in aqueous solution (Trévin et al.) **408**, 261
Potassium
Electrochemical cation recognition by novel 2,2′-bipyridine-grafted calix[4]arenequinones (Bettega et al.) **406**, 247
Potassium ethyl xanthate
Some experiments regarding the corrosion inhibition of copper by benzotriazole and potassium ethyl xanthate (Souto et al.) **411**, 161
Potential dependence
Stepped-polarographies of Nernstian systems with potential-dependent reactant adsorption (López-Tenés et al.) **413**, 43
Potential distribution
The multi-dimensional upwinding method as a new simulation tool for the analysis of multi-ion electrolytes controlled by diffusion, convection and migration. Part 1. Steady state analysis of a parallel plane flow channel (Bortels et al.) **404**, 15
Potential of zero charge
Adsorption of water at Pt(111) electrode in $HClO_4$ solutions. The potential of zero charge (Iwasita, Xia) **411**, 95
A new method for rapid determination of the potential of zero charge for gold|solution interfaces (Chen et al.) **414**, 53
The pzc of Au(111) and Pt(111) in a perchloric acid solution: an ex situ approach to the immersion technique (Hamm et al.) **414**, 85
Potential range expansion
Elimination voltammetry. Experimental verification and extension of theoretical results (Trnková, Dračka) **413**, 123
Potential step
A theoretical expression for the effect of *IR* drop on the current response in a potential step experiment (Åberg, Sharp) **403**, 31
Potential step transients
Channel microband electrodes: a complete working surface for potential step transients (Bidwell et al.) **414**, 247
Potentiodynamics
The influence of some sulphur-containing anions on the anodic behaviour of zinc in an alkaline medium (Abd El Rehim et al.) **401**, 113
Photoelectrochemical studies of oxide film of $PbO_n + SnO_n$ obtained by potentiodynamic anodisation of Pb + Sn alloy electrode in alkaline medium (Mukhopadhyay et al.) **401**, 139
Potentiometry
Comparison between polarographic and potentiometric speciation for cadmium/humic acid systems (Pinheiro et al.) **410**, 61
PPy/CuHCF modified electrode film
Probe beam deflection study of cupric hexacyanoferrate colloid doped polypyrrole film modified electrode in different electrolytes (Liu et al.) **407**, 243
Preceding chemical reaction
The hanging meniscus rotating disk (HMRD). Part 3. Application to a charge transfer preceded by a chemical reaction in equilibrium (Villullas, López Teijelo) **418**, 159
Probe beam deflection
Modelling probe beam deflection experiments in binary bathing electrolytes (Mathias) **407**, 115
Probe beam deflection study of cupric hexacyanoferrate colloid doped polypyrrole film modified electrode in different electrolytes (Liu et al.) **407**, 243
Product selectivity
Compared selectivities of redox-catalyzed and direct electrochemical processes. Part 2. Reactions in which product selection involves competition between dimerization and deactivation followed by further reduction (or oxidation) (Savéant et al.) **402**, 195
2-Propanol
Adsorption of Cl^- and Br^- ions on the (111) plane of a bismuth single crystal from solutions in 2-propanol (Väärtnõu et al.) **407**, 227
Propargyl alcohol
On-line mass spectrometric studies on the interaction between organic adlayers on platinum. Part 1. Consecutive adsorption of formic acid and propargyl alcohol (Pastor et al.) **404**, 77

Propene
Electro-oxidation of propene on gold in acid solution studied by DEMS and FTIRS (Schmidt, Pastor) **401**, 155
Properties
Optical, spectroelectrochemical and structural properties of sol–gel derived Ni-oxide electrochromic film (Šurca et al.) **408**, 83
Propylene carbonate
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Propylene carbonate electrolyte
Simultaneous microgravimetric and optical reflectivity studies of lithium underpotential deposition on Au(111) from propylene carbonate electrolytes (Mo et al.) **409**, 87
Studies on electrochemical oxidation of non-aqueous electrolyte on the $LiCoO_2$ thin film electrode (Kanamura et al.) **419**, 77
Proteins
The chronopotentiometric reduction of proteins adsorbed on mercury (Honeychurch, Ridd) **418**, 185
Protonation
Examination of reactivity of protonated and deprotonated 2,5-dimercapto-1,3,4-thiadiazole and its derivatives by electrochemical experiment and semiempirical MO calculation (Shouji et al.) **417**, 17
Spectroelectrochemical studies of poly-*o*-phenylenediamine. Part 1. In situ resonance Raman spectroscopy (Wu et al.) **417**, 53
Protons
The collective mobility of protons and deuterons in mixtures of light and heavy water (Sluyters, van Duijneveldt) **413**, 37
Prussian blue
Lattice contractions and expansions accompanying the electrochemical conversions of Prussian blue and the reversible and irreversible insertion of rubidium and thallium ions (Dostal et al.) **406**, 155
Pseudomonas
Bacterial chemo-attractant properties of metal ions from dissolving electrode surfaces (De Sánchez, Schiffrin) **403**, 39
Pt
Electrically heated cylindrical microelectrodes. The reduction of dissolved oxygen on Pt (Zerihun, Gründler) **404**, 243
The complex nature of hydrous oxide film behaviour on platinum (Burke, Buckley) **405**, 101
Pt(111)
Infrared spectroscopic study of electric double layers on Pt(111) under electrode reactions in a sulfuric acid solution (Shingaya et al.) **409**, 103
Adsorption of water at Pt(111) electrode in $HClO_4$ solutions. The potential of zero charge (Iwasita, Xia) **411**, 95
The pzc of Au(111) and Pt(111) in a perchloric acid solution: an ex situ approach to the immersion technique (Hamm et al.) **414**, 85
Pt-based catalysts
Electro-oxidation of C1 molecules at Pt-based catalysts highly dispersed into a polymer matrix: effect of the method of preparation (Napporn et al.) **404**, 155
Pt catalysts
Kinetics of methanol oxidation on carbon-supported Pt and Pt + Ru catalysts (Kauranen et al.) **404**, 1
Pt(111) electrode
Infrared spectroscopic analysis of anions adsorbed from bisulfate-containing solutions on Pt(111) electrodes (Faguy et al.) **407**, 209
Influence of the geometry of the hanging meniscus contact on the hydrogen oxidation reaction on a Pt(111) electrode in sulphuric acid (Herrero et al.) **410**, 125
Kinetic and mechanistic study of methanol oxidation on a Pt(111) surface in alkaline media (Tripković et al.) **418**, 9
Pthalocyanines
Photoelectrochemical oxidation of 2-mercaptoethanol at the surface of octacyanophthalocyanine thin film electrodes (Karmann et al.) **405**, 149
PTM films
Adsorption and oxidation of thiophene-3-methanol on platinum electrodes studied by electrochemical and IR spectroscopic methods (Pohjakallio et al.) **401**, 191
Pt + Ru catalyst
The electrochemical oxidation of methanol on platinum and platinum + ruthenium particulate electrodes studied by in-situ FTIR spectroscopy and electrochemical mass spectrometry (Munk et al.) **401**, 215
Kinetics of methanol oxidation on carbon-supported Pt and Pt + Ru catalysts (Kauranen et al.) **404**, 1
Pt single crystal
CO_2 reduction on Pt(S)-[*n*(111) × (111)] single crystal electrodes affected by the adsorption of sulfuric acid anion (Hoshi et al.) **416**, 61
Pt(S)-[*n*(111) × (111)]
CO_2 reduction on Pt(S)-[*n*(111) × (111)] single crystal electrodes affected by the adsorption of sulfuric acid anion (Hoshi et al.) **416**, 61
Pulse duration
Double potential step chronoamperometry at spherical electrodes (HMDE and DME) for long pulse durations (Galvez) **413**, 15
Pulse electrolysis stopped flow
Solvent effect on the ion pair formation between 2,3,5,6-tetrachloro-1,4-benzoquinone anion radical and Mg^{2+} measured using a pulse electrolysis stopped flow method (Oyama et al.) **401**, 243
Pulse radiolysis
Oxidation of caffeic acid and related hydroxycinnamic acids (Hapiot et al.) **405**, 169
Purple membrane photoresponses
Lipid bilayer formation in a microporous membrane filter monitored by ac impedance analysis and purple membrane photoresponses (Ikematsu et al.) **403**, 61
PVF film
Dynamic quartz crystal impedance measurements of polyvinylferrocene film deposition (Bandey et al.) **410**, 219
Pyrazine
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study (Brolo, Irish) **414**, 183
Pyridine
Electrocapillary curves of polycrystalline gold in aqueous solutions of pyridine (Efimov, Heusler) **414**, 75
Pyridine adsorption
Surface Raman spectra of pyridine and hydrogen on bare platinum and nickel electrodes (Ren et al.) **415**, 175
Pyridine-4-aldoxime
A contribution to the electrode reaction of oximes: a study of the intermediate imine on the electroreduction of pyridine-4-aldoxime (Roman et al.) **410**, 15
Pyridine monocarboxylic acid *N*-oxides
On the electroreduction of the anions of pyridine monocarboxylic acid *N*-oxides on mercury electrodes in basic solutions (Angulo, Rodríguez Mellado) **403**, 251
4-Pyridoxic acid
Electrochemical reduction of the final product of vitamin B-6 catabolism: a spectroscopic characterization of the reduced products of 4-pyridoxic acid (Pineda et al.) **403**, 101
Pyrrole
Electrochemical studies of the oxidation of sterically hindered pyrroles and thiophenes (Audebert et al.) **407**, 169
Pyrroloquinoline quinone (PQQ)
pH-switched electrochemistry of pyrroloquinoline quinone at Au electrodes modified by functionalized monolayers (Katz et al.) **408**, 107
Pzc
The role of the metal in determining electrosorption valency in the case of strong molecular adsorption at the electrode|solution interface (Calvente et al.) **401**, 231

Study of pH effect on the relaxation phenomenon of polyaniline by electrochemistry and XPS (Fraoua et al.) **418**, 109

Quantitative analysis
Quantitative analysis of a mixture with reversible electrode processes by cyclic voltammetry and linear sweep voltammetry (Zhao et al.) **402**, 11

Quantum chemical resonance
Analysis of long-ranged mixed-valence states at linear polynuclear metal-complexes under electrochemical equilibrium by means of resonance of π-conjugation (Aoki) **419**, 33

Quantum chemistry
Quantum chemical approach to the Gibbs energy of ion transfer between two immiscible liquids (Osakai, Ebina) **412**, 1

Quartz crystal impedance
Dynamic quartz crystal impedance measurements of polyvinylferrocene film deposition (Bandey et al.) **410**, 219

Quartz crystal microbalance
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Evaluation of the hydration numbers of lanthanide ions in electrodeposited cobalt and manganese oxide films using the quartz crystal microbalance (Matsumoto et al.) **403**, 203
Cathodic electropolymerization of methacrylonitrile studied in situ by quartz crystal microbalance, cyclic voltammetry, and impedance spectroscopy (Tanguy et al.) **417**, 175

Quasi-reversible reaction
Theory and application of cyclic voltammetry at a hemispherical microelectrode for a quasi-reversible reaction (Diao, Zhang) **410**, 155

Quaternary ammonium
Effect of alkali-metal and some quaternary-ammonium cations on the anodic dissolution of p-Si in fluoride media (Hassan et al.) **407**, 105

Quinone
Solvent effect on the ion pair formation between 2,3,5,6-tetrachloro-1,4-benzoquinone anion radical and Mg^{2+} measured using a pulse electrolysis stopped flow method (Oyama et al.) **401**, 243

Radical anions
Dicyanomethylene derivatives of squaric acid: electrochemical behaviour and ESR investigation (Farnia et al.) **404**, 261

Radiotracer
Study of the equilibrium underpotential deposition of copper and the accompanying anion adsorption on rhodized electrodes in the course of cyclic voltammetric measurements (Horányi, Wasberg) **413**, 161
The harmony of EQCM and radiotracer sorption results obtained in the course of voltammetric study of a rhodized electrode (Wasberg et al.) **418**, 195

Radiotracer adsorption
A novel approach to platinized platinum electrodes: specific adsorption as a partition between the solution phase and the electrodeposited platinum black layer (Horányi) **417**, 185

Raman spectroscopy
Simultaneous STM and Raman measurements on electrochemical interfaces (Tian et al.) **401**, 247
An in-situ Raman study of the effect of the support for adsorbed iridium-chelates in catalysing oxygen reduction (Bouwkamp-Wijnoltz et al.) **406**, 195
Surface Raman spectra of pyridine and hydrogen on bare platinum and nickel electrodes (Ren et al.) **415**, 175
UV–vis–NIR and Raman spectroelectrochemical studies on viologen cation radicals: evidence for the presence of various types of aggregate species (Lee et al.) **416**, 139

Randomly oriented graphite electrode
Randomly oriented graphite electrode. Part 1. Effect of electrochemical pretreatment on the electrochemical behavior and chemical composition of the electrode (Regisser et al.) **415**, 47

Random microelectrode array
Excimer laser-induced electrochemical activity in carbon ink films (Osborne et al.) **417**, 5

Rare earth
Kinetics of the hydrogen evolution reaction in stoichiometric and non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries (Iwakura et al.) **411**, 109

Rate constant
The distribution of standard rate constants for electron transfer between thiol-modified gold electrodes and adsorbed cytochrome *c* (Nahir, Bowden) **410**, 9
A new simple voltammetric analysis of the kinetics of homogeneous reactions following the EC mechanism: oxidation of Cu(I) by hydrogen peroxide (Kontturi et al.) **418**, 131

Reactant adsorption
The theory of impedance and demodulation voltammetry for electrode reactions complicated by both activation polarization and reactant adsorption, and their combined application to Tl^+ reduction at the DME. Part 2 (Blankenborg et al.) **401**, 3

Reaction kinetics
On the potential dependence of the preceding chemical step in the Cd(II) reduction from aqueous KF solutions: a DMμE study (Baars et al.) **404**, 151

Reaction mechanism
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 1. Problem parameters and initial conditions (Bieniasz) **406**, 33
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 2. Governing equations in one-dimensional geometry (Bieniasz) **406**, 45
The cathodic reduction of oxygen on n-type UO_2 in dilute alkaline aqueous solution (Shoesmith et al.) **406**, 69
Electrochemical study of 2,5-dimercapto-1,3,4-thiadiazole in acetonitrile (Picart, Geniès) **408**, 53
Voltammetry under high mass transport conditions. The application of the high speed channel electrode to the reduction of pentafluoronitrobenzene (Coles et al.) **411**, 121
Kinetic and mechanistic study of methanol oxidation on a Pt(111) surface in alkaline media (Tripković et al.) **418**, 9

Reaction rate
CO_2 reduction on Pt(S)-[n(111)$\times$(111)] single crystal electrodes affected by the adsorption of sulfuric acid anion (Hoshi et al.) **416**, 61

Reactivity
A study by impedance spectroscopy of the reactivity of freshly polished galena electrodes: oxidation and interaction with ethylxanthate (Pauporté, Schuhmann) **404**, 123
Electrochemical oxidative coupling of cyano-substituted oligothiophenes (Demanze et al.) **414**, 61
Examination of reactivity of protonated and deprotonated 2,5-dimercapto-1,3,4-thiadiazole and its derivatives by electrochemical experiment and semiempirical MO calculation (Shouji et al.) **417**, 17

Real time study
In situ and real time study of an electrode process by differential X-ray diffraction. Part 1. Ag underpotential deposition on Au(111) (Chabala et al.) **412**, 67
In situ and real time study of an electrode process by differential X-ray diffraction. Part 2. Cu underpotential deposition on Au(111) (Chabala et al.) **412**, 77

Receptors
N,N′-dimethyl-2,7-diazapyrenium: a redox-dependent receptor for aromatic carboxylates (Lilienthal et al.) **414**, 107
Recessed gold microelectrode
Fabrication of a mediated glucose oxidase recessed microelectrode for the amperometric determination of glucose (McRipley, Linsenmeier) **414**, 235
Redox
Redox cationic or procationic labeled drugs detected at a perfluorosulfonated ionomer film-coated electrode (Limoges et al.) **402**, 175
Redox activity
Polymer-modified electrodes with pendant $[Rh^{III}(C_5Me_5)(L)Cl]^+$-complexes formed by γ-irradiation cross-linking (Höfer et al.) **402**, 115
Redox-catalysed processes
Compared selectivities of redox-catalyzed and direct electrochemical processes. Part 2. Reactions in which product selection involves competition between dimerization and deactivation followed by further reduction (or oxidation) (Savéant et al.) **402**, 195
Redox frustration
Redox interaction in mixed-valence trinuclear ring complexes by means of quantum chemical approach (Chen, Aoki) **402**, 189
Redox-induced isomerization
Unusual twin adsorption waves in voltammetry of trimetallic clusters of Os and Ru undergoing redox-induced reorientation of the alkyne ligand (Pospíšil et al.) **412**, 147
Redox interaction
Interaction over three redox centers at conjugated oligomeric ferrocenes with $N = 2$ to 6 nuclei (Aoki et al.) **416**, 151
Redox ionophore
A barium selective ferrocene ionophore exhibiting remarkable electrochemical recognition behaviour (Moutet et al.) **415**, 187
Redox polymer
Preparation and characterization of a novel redox polymer based on salicyl-*N*-phenylene-1,4-diamine (Davis et al.) **403**, 213
Redox polymer-modified electrodes
The effect of pH on the charge transport at redox polymer-modified electrodes: an a.c. impedance study applied to poly(*o*-aminophenol) film electrodes (Rodríguez Nieto, Tucceri) **416**, 1
Redox potential
Cyclic voltammetry of polyethylene stabilized hydrogen molybdenum bronzes (Endres, Schwitzgebel) **415**, 23
Electrochemistry of hexacoordinate tetra(aryl)porphyrinatosilicon(IV) complexes (Lorenz et al.) **415**, 179
Voltammetric behavior and electronic molecular structures of several azulenylketones (Saitoh et al.) **418**, 139
Redox properties
In situ FTIR studies on the redox properties of poly(thiophene-3-methanol) in PF_6^- and ClO_4^- electrolytes (Pohjakallio et al.) **406**, 165
Electrochemical properties of the 2-mercaptohydroquinone monolayer on a gold electrode. Effect of solution pH, adsorption time and concentration of the modifying solution (Sato et al.) **409**, 145
Redox reaction
Charge transport in frozen tetraalkylammonium fluoride hydrates containing a 1:1 mixture of $K_3Fe(CN)_6$ and $K_4Fe(CN)_6$ (Opallo) **411**, 145
Impedance of the interface: electrode|frozen electrolyte containing redox active ions (Opallo) **418**, 91
Redox reaction of disulphide
Examination of the cleavage and formation of the disulfide bond in poly[dithio-2,5-(1,3,4-thiadiazole)] by redox reaction (Shouji, Oyama) **410**, 229
Redox state
IR response of poly(*o*-toluidine): spectral modifications upon redox state change (Andrade et al.) **419**, 15
Redox states of PoPD
Spectroelectrochemical studies of poly-*o*-phenylenediamine. Part 1. In situ resonance Raman spectroscopy (Wu et al.) **417**, 53
Redox transformation
Comparative study of anion-involvement in redox transformations of poly(*o*-phenylene-diamine) (PPD) films by a coupled electrochemical and radiometric technique (Martinusz et al.) **404**, 145
"Reduced carbon dioxide"
Carbon dioxide reduction on platinum|Nafion®|carbon electrodes (Min Huang, Faguy) **406**, 219
Reduced polymers
Electrochemical behaviour of poly(2,5-di-(-2-thienyl)-thiophene): properties of the reduced polymer (Brillas et al.) **418**, 123
Reducibility
Reducibility of the carbon–fluorine bond in the trifluoromethyl group (Combellas et al.) **407**, 195
Reduction
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part 1: Effect of temperature and alkali carbonate mixture (Reeve, Tseung) **403**, 69
Factors affecting the dissolution and reduction of oxygen in molten carbonate electrolytes. Part II: Effect of $SrCO_3$, $BaCO_3$ and SnO_2 additives (Reeve, Tseung) **403**, 85
The influence of OH^- chemisorption on the catalytic properties of gold single crystal surfaces for oxygen reduction in alkaline solutions (Štrbac, Adžić) **403**, 169
An in-situ Raman study of the effect of the support for adsorbed iridium-chelates in catalysing oxygen reduction (Bouwkamp-Wijnoltz et al.) **406**, 195
H_2O_2 from an oxidase enzyme can be detected cathodically using metal microparticles dispersed in a polymeric film electrode (Somasundrum et al.) **407**, 247
Mixed methanol oxidation/oxygen reduction currents on a carbon supported Pt catalyst (Kauranen, Skou) **408**, 189
Temperature dependence of the transfer coefficient. The reduction of iodate in alkaline media (Kirowa-Eisner et al.) **410**, 189
Isotope and surface preparation effects on alkaline dioxygen reduction at carbon electrodes (Xu et al.) **410**, 235
Involvement of lactones in the formation of 6-hydroxydopa and 6-hydroxyhydrocaffeic acid during oxidation of dopa and hydrocaffeic acid (Li et al.) **412**, 19
The reduction of styrene at microelectrodes in toluene + *N*,*N*-dimethylformamide mixtures (Geraldo et al.) **418**, 41
Reduction mechanism
Electroreduction of thionicotinamide on mercury electrodes in aqueous solutions (Expósito et al.) **402**, 211
On the electroreduction of the anions of pyridine monocarboxylic acid *N*-oxides on mercury electrodes in basic solutions (Angulo, Rodríguez Mellado) **403**, 251
Electrochemical behaviour and micromolar determination of the antineoplastic agent 5-azacytidine and its mixtures with the nucleoside cytidine (Marín et al.) **407**, 189
The reduction mechanism of the C=O group. Part 2. The electrochemical reduction of *p*-diacetylbenzene in aqueous medium (Meunier-Prest et al.) **410**, 145
In situ spectroelectrochemistry of 2,5-diphenyl-1,3,4-oxadiazole (Kress et al.) **414**, 31
Electrochemical behaviour of nitroindoles: oxidative electropolymerization and reduction of the nitro group of polymerized and non-polymerized 4-nitro and 5-nitroindole (Kokkinidis, Kelaidopoulou) **414**, 197
A contribution to the elucidation of the reduction mechanism of thioisonicotinamide on mercury electrodes (Ruiz Montoya, Rodríguez Mellado) **417**, 113

Reduction of CO_2
CO_2 reduction on Pt(S)-[n(111) × (111)] single crystal electrodes affected by the adsorption of sulfuric acid anion (Hoshi et al.) **416**, 61
Reduction of peroxodisulfate
Spatio-temporal pattern formation during the reduction of peroxodisulfate in the bistable and oscillatory regime: a surface plasmon microscopy study (Flätgen et al.) **409**, 183
Reductive cleavage
Estimation of bond energy in radical anions of arylmethyl halides as the controlling factor of stepwise versus concerted reductive cleavage (Jaworski) **407**, 237
Resistance
In-situ resistance measurements of Nafion® 117 membranes in polymer electrolyte fuel cells (Büchi, Scherer) **404**, 37
Measurement of uncompensated resistance and double layer capacitance during the course of a dynamic measurement: correction for *IR* drop and charging currents in arbitrary voltammetric techniques (Åberg) **419**, 99
Reversible doping
Anodic oxidation of 9,9-dimethyl-2-phenylfluorene: towards sequential poly(fluorene-phenylene). Comparison with polymers obtained in mixtures of oligophenylene and 9,9-dimethylfluorene (Rault-Berthelot et al.) **402**, 203
Reversible electrode processes
Quantitative analysis of a mixture with reversible electrode processes by cyclic voltammetry and linear sweep voltammetry (Zhao et al.) **402**, 11
Reversible reaction
Investigations on cyclic reciprocal derivative chronopotentiometry. Part 1. Theory for a reversible reaction (Bi, Yu) **405**, 51
Rh microparticles
H_2O_2 from an oxidase enzyme can be detected cathodically using metal microparticles dispersed in a polymeric film electrode (Somasundrum et al.) **407**, 247
Rhodium
Study of the equilibrium underpotential deposition of copper and the accompanying anion adsorption on rhodized electrodes in the course of cyclic voltammetric measurements (Horányi, Wasberg) **413**, 161
Rhodium complexes
Polymer-modified electrodes with pendant $[Rh^{III}(C_5Me_5)(L)Cl]^+$-complexes formed by γ-irradiation cross-linking (Höfer et al.) **402**, 115
Rhodized electrode
Comparative radiotracer study of the adsorption of Cl^-, HSO_4^- (SO_4^{2-}) and $H_2PO_4^-$ anions on rhodized electrodes (Horányi, Wasberg) **404**, 291
The harmony of EQCM and radiotracer sorption results obtained in the course of voltammetric study of a rhodized electrode (Wasberg et al.) **418**, 195
Rhodococcus opacus hydrogenase
Direct electrochemistry of *Rhodococcus opacus* hydrogenase for the catalysis of NAD^+ reduction (Gros et al.) **405**, 189
Ring complex
Redox interaction in mixed-valence trinuclear ring complexes by means of quantum chemical approach (Chen, Aoki) **402**, 189
Rotating disc electrode
Catalytic oxidation of dopamine at a microdisk platinum electrode modified by electrodeposition of nickel hexacyanoferrate and Nafion® (Zhou et al.) **408**, 219
Numerical steady state analysis of current density distributions in axisymmetrical systems for multi-ion electrolytes: application to the rotating disc electrode (Van Den Bossche et al.) **411**, 129
Voltammetric cell with additional internal circulation of electrolyte (Tur'yan et al.) **412**, 175
A stability criterion for accurate simulation of electrochemical diffusion–kinetic phenomena at the rotating disk electrode and implications for simulation of diffusion–migration and other problems (Feldberg et al.) **413**, 25
Rotating-disc glassy carbon electrode
Voltammetric studies of electrochemical pretreatment of rotating-disc glassy carbon electrodes in phosphate buffer (Dai, Shiu) **419**, 7
Rotating ring–disc electrode
Rotating ring–disk electrode analysis of CO_2 reduction electrocatalyzed by a cobalt tetramethylpyridoporphyrazine on the disk and detected as CO on a platinum ring (Zhang et al.) **403**, 93
Rubidium ions
Lattice contractions and expansions accompanying the electrochemical conversions of Prussian blue and the reversible and irreversible insertion of rubidium and thallium ions (Dostal et al.) **406**, 155
$Ru(bpy)_3^{2+}$ complex
Determination of charge transfer distance by potential-step chronoamperospectrometry in a Nafion® film containing $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **412**, 159
Ruthenium complexes
Synthesis and electrochemical properties of poly[3-{ω-[4-(2,2′-bipyridyl)]alkyl}thiophenes], P{B(n)T}, and of poly[Ru(II){B(n)T}$_3^{2+}$] (Wang, Keene) **405**, 71
Voltammetric and XPS investigations of polynuclear ruthenium-containing cyanometallate film electrodes (Cataldi et al.) **406**, 91
Photoelectrochemistry at transparent SnO_2 electrodes: supersensitization in Nafion® films by mono- and dinuclear ruthenium(II) complexes with hydroquinone (Tan-Sien-Hee, Mesmaeker) **406**, 147
Electrochemical polymerisation studies of aza-15-crown-5 vinyl-2,2′-bipyridine ruthenium(II) complexes (Beer et al.) **408**, 61
Unusual twin adsorption waves in voltammetry of trimetallic clusters of Os and Ru undergoing redox-induced reorientation of the alkyne ligand (Pospíšil et al.) **412**, 147
On the mechanism of oxidative electropolymerization and film formation for phenanthroline-containing complexes of ruthenium (Zhang et al.) **414**, 23
RVC modified with lead
Electrochemical behavior of lead deposited on reticulated vitreous carbon (Czerwiński, Żelazowska) **410**, 55

Salicyl-*N*-phenylene-1,4-diamine
Preparation and characterization of a novel redox polymer based on salicyl-*N*-phenylene-1,4-diamine (Davis et al.) **403**, 213
Sarcosine oxidase
The bioelectrochemical response of the polyaniline sarcosine oxidase electrode (Yang, Mu) **415**, 71
Saturated solution
Electrochemical behaviour of isomers of a tetraazamacrocyclic Ni(II) complex in solutions saturated with argon, CO and CO_2 (Bujno et al.) **407**, 131
Scanning electrochemical microscopy
Scanning electrochemical microscopy: amperometric probing of diffusional ion fluxes through porous membranes and human dentine (Nugues, Denuault) **408**, 125
Scanning electrochemical microscope
A novel approach for studying charge transfer across an interface of two immiscible solutions using the scanning electrochemical microscope (SECM) (Selzer, Mandler) **409**, 15
Scanning electrochemical microscopy (SECM): study of the adsorption and desorption of hydrogen on platinum electrodes in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **418**, 99
Scanning microscope
The scanning microscope for semiconductor characterization (SMSC): study of the influence of surface morphology on the photo-

electrochemical behavior of an n-$MoSe_2$ single crystal electrode by photocurrent and electrolyte electroreflectance imaging (Martínez Chaparro et al.) **418**, 175
Scanning microscope for semiconductor characterization
The scanning microscope for semiconductor characterization (SMSC): comparative study of the influence of surface defects on the photoelectrochemical behavior of n-WSe_2 and n-$MoSe_2$ layered compounds (Chaparro et al.) **411**, 79
Scanning tunnelling microscopy
Simultaneous STM and Raman measurements on electrochemical interfaces (Tian et al.) **401**, 247
Underpotential deposition of mercury on Au(111) investigated by in situ scanning tunnelling microscopy (Inukai et al.) **403**, 159
Structure and stability of cytosine adlayers on Au(111): an in-situ STM study (Wandlowski et al.) **404**, 215
Water structure at the graphite(0001) surface by STM measurements (Nagy) **409**, 19
Screen printed electrodes
Excimer laser-induced electrochemical activity in carbon ink films (Osborne et al.) **417**, 5
Se
Cathodic electrodeposition of Se on Ti electrodes (Cattarin et al.) **415**, 123
SECM
Scanning electrochemical microscopy (SECM): study of the adsorption and desorption of hydrogen on platinum electrodes in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **418**, 99
Second hydration shell
The interfacial structure around ferric and ferrous ions in aqueous solution: the nature of the second hydration shell (Degrève, Quintale, Jr.) **409**, 25
Second-order dynamic behaviour
A model of the anodic oxidation of metals in concentrated solutions: second-order dynamics at the anodic film|solution interface (Bojinov) **405**, 15
Selectivity
Zeolite-modified carbon paste electrode for selective monitoring of dopamine (Wang, Walcarius) **407**, 183
The ion selectivity of monensin incorporated phospholipid/alkanethiol bilayers (Li et al.) **414**, 17
Selenanthrene
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35
Selenium
Electrodeposition of indium selenide In_2Se_3 (Massaccesi et al.) **412**, 95
CO adsorption and oxidation on Pt(111) electrodes modified by irreversibly adsorbed selenium and tellurium (Herrero et al.) **412**, 165
Self-assembled monolayers
Charge-selectivity of the monolayer modified gold electrode for the electrochemical oxidation of catechol derivatives (Takehara et al.) **404**, 181
The ion selectivity of monensin incorporated phospholipid/alkanethiol bilayers (Li et al.) **414**, 17
Direct electron transfer to cytochrome c oxidase in self-assembled monolayers on gold electrodes (Li et al.) **416**, 97
Supported phospholipid membranes: comparison among different deposition methods for a phospholipid monolayer (Ding et al.) **416**, 105
Self-assembly
Self-assembly of methylene blue at single-crystal platinum electrodes modified by sulphur adlayer (Clavilier et al.) **402**, 129
Reversible chemical doping of self-assembled poly(3-octylthiophene) monolayers on gold electrodes (Gao, Siow) **412**, 179
Self-diffusion coefficient
Non-ideality effect for self-diffusion coefficient of lead cryptate by normal pulse polarography (Lehmani et al.) **416**, 121
Self-doping
The influence of defects in polyaniline structure on its electroactivity: optimization of 'self-doped' polyaniline synthesis (Karyakin et al.) **402**, 217
Self-inhibition
Self-inhibition in catalytic processes: cyclic voltammetry (Bhugun, Savéant) **408**, 5
Semiconductor
Investigation of controlled periodic illumination effects on photooxidation processes at titanium dioxide films using rotating ring disk photoelectrochemistry (Foster et al.) **406**, 213
Photoelectrochemical behaviour of C_{60} films in various oxidation states (Szűcs et al.) **419**, 39
Semi-empirical calculations
A theoretical study on the stability of different submonolayers or a monolayer of lead adsorbed on Au(100) (Rojas) **405**, 33
Semi-integral methods
Determination of rate constants of electrode reactions by methods of semi-integral electrochemistry applied to chronoamperometric and chronocoulometric curves (González-Morín et al.) **411**, 1
Semi-microelectrodes
Study of the flow dependence of microelectrode and semi-microelectrode voltammetric signals (Kubiak, Strozik) **417**, 95
Sensitivity
Analysis of the factors determining the sensitivity of a miniaturized glucose biosensor made by codeposition of palladium and glucose oxidase onto an 8 μm carbon fiber (Sakslund et al.) **402**, 149
ESR-electrochemical cells: a comparative study (Webster et al.) **404**, 303
SeO_2
Cathodic electrodeposition of Se on Ti electrodes (Cattarin et al.) **415**, 123
SERS
A SERS study of SO_4^{2-}/Cl^- ion adsorption at a copper electrode in-situ (Brown, Hope) **405**, 211
Confirmation of thiourea/chloride ion co-adsorption at a copper electrode by in-situ SERS spectroscopy (Brown, Hope) **413**, 153
Non-resonant SERS study of the adsorption of cytochrome c on a silver electrode (Niaura et al.) **416**, 167
Shear stress
The Green function method for calculating characteristics of a small strip-shaped shear stress probe (Geshev) **410**, 1
Short-pulse chronocoulometry
Determination of mixed-valence redox centers and dynamics of charge propagation in a bulk redox-conducting solid: phospho-12-tungstic acid single crystal (Kulesza, Karwowska) **401**, 201
p-Si
Effect of alkali-metal and some quaternary-ammonium cations on the anodic dissolution of p-Si in fluoride media (Hassan et al.) **407**, 105
Photoelectrochemical imaging of the etching and passivation of silicon in aqueous KOH (Hutton et al.) **418**, 153
Signal processing
Differentiation, semidifferentiation and semi-integration of a digital signals based on Fourier transformations (Yu, Zhang) **403**, 1
Silasesquioxane
Organosilasesquioxane–laponite clay sols: a versatile approach for electrode surface modification (Coche-Guérente et al.) **401**, 253
Silicon porphyrin complexes
Electrochemistry of hexacoordinate tetra(aryl)porphyrinatosilicon(IV) complexes (Lorenz et al.) **415**, 179
Silver
Electrodeposition study on ultramicroelectrodes. Part 2. Different growth modes in Ag crystallization (Duo et al.) **404**, 99
Vibrational properties of CN^- adsorbed on platinum and silver: ab initio MCSCF calculations compared with SFG experiments (Tadjeddine et al.) **408**, 237

Infrared–infrared sum-frequency generation from adsorbates on metal surfaces (Potterton, Bain) **409**, 109
Underpotential–overpotential transition in a silver overlayer on platinum. Part 2. Reversible 2D–3D rearrangement (Vaskevich et al.) **412**, 117
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study (Brolo, Irish) **414**, 183
Silver electrode
Interaction of thiourea with silver electrodes (Szklarczyk et al.) **405**, 111
Influence of carbon surface pre-oxidation on the properties of silver + carbon electrocatalysts (Yang, Zhou) **415**, 143
Application of time-resolved EQCM to the study of the mechanism of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) **416**, 53
Non-resonant SERS study of the adsorption of cytochrome c on a silver electrode (Niaura et al.) **416**, 167
Silver single nucleus
Experimental strategies for continuous measurements of *I–t* transients of a silver single nucleus on carbon microelectrodes (Mao et al.) **416**, 145
Simulation
A comparison of finite difference algorithms for the simulation of microband electrode problems with and without convective flow (Alden, Compton) **402**, 1
Steady state voltammetry at microelectrodes for the hydrogen evolution from strong and weak acids under pseudo-first and second order kinetic conditions (Daniele et al.) **404**, 105
The three-dimensional simulation of short-time diffusion-controlled voltammetry at the walls of a hollow cube (Myland, Oldham) **405**, 39
Chronoamperometry of uncharged species in the presence of a very low concentration of supporting electrolyte. A simulation (Jaworski et al.) **407**, 75
A network approach to simulation of electrical properties of symmetric electrochemical cells (Moya et al.) **413**, 1
The multigrid method, MGD1: an efficient and stable approach to electrochemical modelling. The simulation of double electrode problems (Alden, Compton) **415**, 1
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes (Bidwell et al.) **417**, 119
Simulation algorithm
A stability criterion for accurate simulation of electrochemical diffusion–kinetic phenomena at the rotating disk electrode and implications for simulation of diffusion–migration and other problems (Feldberg et al.) **413**, 25
Single crystal
Determination of mixed-valence redox centers and dynamics of charge propagation in a bulk redox-conducting solid: phospho-12-tungstic acid single crystal (Kulesza, Karwowska) **401**, 201
Vibrational spectroscopy of the electrochemical interface by visible infrared sum frequency generation (Tadjeddine, Peremans) **409**, 115
Evaluation of the effect of two-dimensional geometry of Pt single-crystal faces on the kinetics of upd of H using impedance spectroscopy (Morin et al.) **412**, 39
Single-crystal surfaces
Impedance studies of reconstructed and non-reconstructed gold single crystal surfaces (Eberhardt et al.) **419**, 23
Single ion activity coefficients
Diffuse layer near the zero charge point in the case of non-ideal electrolyte solutions (Grafov, Damaskin) **416**, 25
Si/SiO_2
Impedance analysis of Si/SiO_2 heterostructures grafted with antibodies: approach for immunosensor development (Maupas et al.) **406**, 53
Small probe
The Green function method for calculating characteristics of a small strip-shaped shear stress probe (Geshev) **410**, 1
SMDE
General analytical solution for a reversible *i–t* response to a triple potential step at an SMDE in the absence/presence of amalgamation (Molina et al.) **408**, 33
SnO_2
Transient absorption spectroscopy of nanostructured semiconductor films at controlled potentials. An in situ spectroelectrochemical investigation of the photosensitization process (Bedja et al.) **401**, 237
SnO_2 electrode
Photoelectrochemistry at transparent SnO_2 electrodes: supersensitization in Nafion® films by mono- and dinuclear ruthenium(II) complexes with hydroquinone (Tan-Sien-Hee, Mesmaeker) **406**, 147
Sodium ions
Ionic surface diffusion coefficients using an electrostatic patchy charge model (Cohen, Radke) **405**, 23
Sodium tetraphenylborate
Molecular dynamics of the dimerization of $NaB\phi_4$ in 1,2-dimethoxyethane and tetrahydrofuran (Xu et al.) **401**, 45
Sol–gel
Spectroelectrochemical and structural properties of electrochromic Co(Al)-oxide and Co(Al,Si)-oxide films prepared by the sol–gel route (Švegl et al.) **418**, 53
Sol–gel process
Optical, spectroelectrochemical and structural properties of sol–gel derived Ni-oxide electrochromic film (Šurca et al.) **408**, 83
Solid electrolytes
Conductivity of stoichiometric $(CH_3)_4NOH$ clathrate hydrates (Borkowska et al.) **406**, 109
Charge transport in frozen tetraalkylammonium fluoride hydrates containing a 1:1 mixture of $K_3Fe(CN)_6$ and $K_4Fe(CN)_6$ (Opallo) **411**, 145
Solid|liquid interface
A channel flow cell with downstream impedance spectroscopy detection: theory and applications (Tam et al.) **407**, 23
Solid polymer electrolyte
SPE composite microdisk electrodes used in organic electrosynthesis (Jiang et al.) **417**, 89
Solid state electrochemistry
Solid state electrochemical studies of mixed nickel–iron hexacyanoferrates with the help of abrasive stripping voltammetry (Jayarama Reddy et al.) **403**, 209
Solubility
Electrogeneration and solubilities of oxidized poly(2,5-di-(-2-thienyl)-thiophene) (Carrasco et al.) **418**, 115
Solution flushing
The influence of copper adlayer structure on the electroreduction of nitrobenzene at ordered Au(111) as studied by cyclic voltammetry combined with solution flushing tactics (Chang et al.) **415**, 169
Solution phase
Practical and theoretical evaluation of an alternative geometry enzyme electrode (Gooding, Hall) **417**, 25
Sonoelectrochemistry
Voltammetry in the presence of ultrasound: the limit of acoustic streaming induced diffusion layer thinning and the effect of solvent viscosity (Marken et al.) **415**, 55
Sonotrode
Voltammetry in the presence of ultrasound: the limit of acoustic streaming induced diffusion layer thinning and the effect of solvent viscosity (Marken et al.) **415**, 55
Sonovoltammetry
Voltammetry in the presence of ultrasound: surface and solution processes in the sonovoltammetric reduction of nitrobenzene at glassy carbon and gold electrodes (Marken et al.) **414**, 95
Voltammetry in the presence of ultrasound: the limit of acoustic streaming induced diffusion layer thinning and the effect of solvent viscosity (Marken et al.) **415**, 55

Speciation
Comparison between polarographic and potentiometric speciation for cadmium/humic acid systems (Pinheiro et al.) **410**, 61
Specific adsorption
A comparative voltammetric study of the Ir|H_2SO_4 and Ir|$HClO_4$ aqueous interfaces (Fonseca et al.) **415**, 89
Spectroelectrochemistry
Transient absorption spectroscopy of nanostructured semiconductor films at controlled potentials. An in situ spectroelectrochemical investigation of the photosensitization process (Bedja et al.) **401**, 237
Electrochemical activity of poly(*N*-vinylcarbazole) films in acetonitrile solution and in acetonitrile + water mixtures. Correlation between spectroelectrochemical and EPR results (Skompska, Kudelski) **403**, 125
Electrochemical and spectroelectrochemical study of the oxidation of S_4^{2-} and S_6^{2-} ions in liquid ammonia (Levillain et al.) **405**, 85
A preliminary in situ ESR investigation of the structure of the iron electrode|1 M NaOH electrolyte interface (Beden et al.) **405**, 241
Spectroelectrochemical study on monomer/dimer equilibria of methylalkylviologen cation radicals with and without α-cyclodextrin (Lee et al.) **407**, 161
Electrochemical and spectroscopic characterization of anodically formed nickel salen polymer films on glassy carbon, platinum, and optically transparent tin oxide electrodes in acetonitrile containing tetramethylammonium tetrafluoroborate (Dahm et al.) **410**, 163
In situ UV–vis ESR spectroelectrochemistry (Petr et al.) **412**, 153
In situ spectroelectrochemistry of 2,5-diphenyl-1,3,4-oxadiazole (Kress et al.) **414**, 31
The direct electrochemistry of cytochrome c in the presence of various amino acids (Huang et al.) **416**, 31
Spectroelectrochemical and structural properties of electrochromic Co(Al)-oxide and Co(Al,Si)-oxide films prepared by the sol–gel route (Švegl et al.) **418**, 53
A spectroelectrochemical cell for measurements in highly purified solvents (Geskes, Heinze) **418**, 167
Spectroscopic studies
Electrochemical and spectroscopic studies of the mechanism of monolayer and multilayer adsorption of an insoluble surfactant at the Au(111)|electrolyte interface (Bizzotto, Lipkowski) **409**, 33
Specular reflectance spectroscopy
Electrochemistry of cast films of ferredoxin and lipid bilayers on electrodes (Nassar et al.) **416**, 183
Spherical diffusion
Electrochemical nucleation on disc-shaped ultramicroelectrodes: theoretical aspects (Correia et al.) **407**, 37
Spherical electrode
Determination of rate constants of electrode reactions by methods of semi-integral electrochemistry applied to chronoamperometric and chronocoulometric curves (González-Morín et al.) **411**, 1
Double potential step chronoamperometry at spherical electrodes (HMDE and DME) for long pulse durations (Galvez) **413**, 15
Spray pyrolysis
Enhancement of surface areas of Co_3O_4 and $NiCo_2O_4$ electrocatalysts prepared by spray pyrolysis (Nkeng et al.) **402**, 81
Square wave voltammetry
Square wave voltammetric determination of paraquat and diquat in aqueous solution (Walcarius, Lamberts) **406**, 59
Study of CE mechanisms by square wave voltammetry: Cd(II) + nitrilotriacetic acid and Cd(II) + aspartic acid systems (Correia dos Santos et al.) **413**, 97
Electrochemistry of C_{82}: relationship to metallofullerene electrochemistry (Burbank et al.) **417**, 1
Squaric acid
Dicyanomethylene derivatives of squaric acid: electrochemical behaviour and ESR investigation (Farnia et al.) **404**, 261
Stability
Bifurcation analysis for the Volmer–Heyrovsky mechanism (Berthier et al.) **402**, 29
Fullerene film electrodes in aqueous solutions. Part 2. Effects of doping cations (Szűcs et al.) **402**, 137
Stability study and categorization of electrochemical oscillators by impedance spectroscopy (Koper) **409**, 175
Staircase cyclic voltammetry
Complex electrochemistry of flavodoxin at carbon-based electrodes: results from a combination of direct electron transfer, flavin-mediated electron transfer and comproportionation (Heering, Hagen) **404**, 249
Static mercury drop electrode
Single and multiple pulse voltammetries at the static mercury drop electrode for reversible reactions with and without amalgam formation (Fatouros et al.) **405**, 197
Statistical mechanical treatments
Appropriate and inappropriate statistical mechanical treatments for phase transitions at electrified interfaces (Nikitas) **408**, 1
Stepped polarography
Stepped-polarographies of Nernstian systems with potential-dependent reactant adsorption (López-Tenés et al.) **413**, 43
Steric hindrance
Electrocatalytic oxygenation of alkenes by a sterically hindered water-soluble iron porphyrin in aqueous solutions (Lee, Su) **414**, 69
Steric interactions
Charge transport processes in electrochemically deposited poly(pyrrole) and poly(*N*-methylpyrrole) thin films (Kim et al.) **416**, 113
STM
Layer-by-layer anodic dissolution of sulfur-modified Ni(100) electrodes: in situ scanning tunneling microscopy (Ando et al.) **412**, 139
Multiphase electrocrystallization in the thallium oxide system: simultaneous nucleation on sites of different nature (Tsirlina et al.) **414**, 41
Stoichiometric number
The polarisation resistance, exchange current density and stoichiometric number for the hydrogen evolution reaction: theoretical aspects (Gennero de Chialvo, Chialvo) **415**, 97
Stripping technique
Chemical and phase compositions of zinc + nickel alloys determined by stripping techniques (Elkhatabi et al.) **404**, 45
Strongly implicit procedure
Channel microband electrodes: a complete working surface for potential step transients (Bidwell et al.) **414**, 247
Hydrodynamic voltammetry with channel microband electrodes: the simulation of voltammetric waveshapes (Bidwell et al.) **417**, 119
Structural defects
The influence of defects in polyaniline structure on its electroactivity: optimization of 'self-doped' polyaniline synthesis (Karyakin et al.) **402**, 217
Structural properties
Spectroelectrochemical and structural properties of electrochromic Co(Al)-oxide and Co(Al,Si)-oxide films prepared by the sol–gel route (Švegl et al.) **418**, 53
Structure
Water structure at the graphite(0001) surface by STM measurements (Nagy) **409**, 19
Examination of reactivity of protonated and deprotonated 2,5-dimercapto-1,3,4-thiadiazole and its derivatives by electrochemical experiment and semiempirical MO calculation (Shouji et al.) **417**, 17
Styrene
The reduction of styrene at microelectrodes in toluene + *N*,*N*-dimethylformamide mixtures (Geraldo et al.) **418**, 41
Substituted spinels
Effect of partial Ga^{3+} substitution for Mn^{3+} in $LiMn_2O_4$ on its behaviour as a cathode for Li cells (Pistoia et al.) **410**, 115

Substrate–receptor interaction
Modified monolayer electrodes for electrochemical and piezoelectric analysis of substrate–receptor interactions: novel immunosensor electrodes (Cohen et al.) **417**, 65
Sulphate
Electrocatalytic reaction, catalytic autoxidation, and supported catalytic autoxidation of sulfur oxoanions by FeTSPP and Mn(4-TMPyP) (Chen) **407**, 123
Confirmation of thiourea/chloride ion co-adsorption at a copper electrode by in-situ SERS spectroscopy (Brown, Hope) **413**, 153
Sulphated zirconia
Sulfate-modified zirconia catalysts: the role of surface electrification on the features of the sulfate adsorption process (Ardizzone, Grassi) **417**, 193
Sulphite
Electrocatalytic reaction, catalytic autoxidation, and supported catalytic autoxidation of sulfur oxoanions by FeTSPP and Mn(4-TMPyP) (Chen) **407**, 123
Sulphur
Self-assembly of methylene blue at single-crystal platinum electrodes modified by sulphur adlayer (Clavilier et al.) **402**, 129
Study of sulphur adlayers on polyoriented platinum electrodes: influence on the electrocatalysis of the SO_2 oxidation reaction (Quijada et al.) **414**, 229
Sulphur adsorption
The electrocatalytic reactions of oxidation and evolution of hydrogen on iridium electrodes modified by sulphur adsorption (Lamy-Pitara, Barbier) **416**, 47
Sulphur dioxide
Study of sulphur adlayers on polyoriented platinum electrodes: influence on the electrocatalysis of the SO_2 oxidation reaction (Quijada et al.) **414**, 229
Sulphuric acid
Atomic structure of bare *p*-GaAs(100) and electrodeposited Cu on *p*-GaAs(100) surfaces in H_2SO_4 solutions: an AFM study (Koinuma, Uosaki) **409**, 45
Influence of the geometry of the hanging meniscus contact on the hydrogen oxidation reaction on a Pt(111) electrode in sulphuric acid (Herrero et al.) **410**, 125
Sulphur-modified electrodes
Layer-by-layer anodic dissolution of sulfur-modified Ni(100) electrodes: in situ scanning tunneling microscopy (Ando et al.) **412**, 139
Sum-frequency generation
Vibrational spectroscopy of the electrochemical interface by visible infrared sum frequency generation (Tadjeddine, Peremans) **409**, 115
Sum-frequency spectroscopy
Infrared–infrared sum-frequency generation from adsorbates on metal surfaces (Potterton, Bain) **409**, 109
Supermeniscus
Hydrogen oxidation on partially immersed Nafion®-coated electrodes (Inaba et al.) **417**, 105
Supported phospholipid membranes
The ion selectivity of monensin incorporated phospholipid/alkanethiol bilayers (Li et al.) **414**, 17
Supported phospholipid membranes: comparison among different deposition methods for a phospholipid monolayer (Ding et al.) **416**, 105
Supporting electrolyte
Steady state voltammetry for reduction of cadmium at a Pt microelectrode in dimethylsulphoxide with and without supporting electrolyte (Daniele et al.) **407**, 149
Surface charge
Kinetics of formation and properties of a barrier oxide film on molybdenum (Bojinov et al.) **411**, 37
Surface charge density
Surface charge density measurements on mercury electrodes covered by phospholipid monolayers (Becucci et al.) **413**, 187
Surface chemical reactions
Theory of two $1e^-$ successive electrochemical surface reactions (E_{rev} E_{rev} or E_{rev} E_{irr}) associated with surface chemical reactions in polarography and cyclic voltammetry (Meunier-Prest, Laviron) **410**, 133
Surface chemistry
Chloride adsorption at the Au(111) electrode surface (Shi, Lipkowski) **403**, 225
On-line mass spectrometric studies on the interaction between organic adlayers on platinum. Part 1. Consecutive adsorption of formic acid and propargyl alcohol (Pastor et al.) **404**, 77
Surface defects
The scanning microscope for semiconductor characterization (SMSC): comparative study of the influence of surface defects on the photoelectrochemical behavior of n-WSe_2 and n-$MoSe_2$ layered compounds (Chaparro et al.) **411**, 79
Surface diffusion
Ionic surface diffusion coefficients using an electrostatic patchy charge model (Cohen, Radke) **405**, 23
Surface enhanced Raman scattering
In-situ surface-enhanced Raman spectroscopic study of gold electrodes modified with nickel tetraazamacrocyclic complexes (Bukowska et al.) **403**, 47
The adsorption and orientation of pyrazine on silver electrodes: a surface enhanced Raman scattering study (Brolo, Irish) **414**, 183
Surface excess
The chronopotentiometric reduction of proteins adsorbed on mercury (Honeychurch, Ridd) **418**, 185
Surface group characterization
Voltammetric metal titration of particle dispersions (Wonders, Van Leeuwen) **401**, 103
Surface hydrogen processes
Surface hydrogen processes studied by isotope exchange reactions on a Pd membrane cathode (Yoshitake et al.) **401**, 81
Surface morphology
Analysis of the factors determining the sensitivity of a miniaturized glucose biosensor made by codeposition of palladium and glucose oxidase onto an 8 μm carbon fiber (Sakslund et al.) **402**, 149
The scanning microscope for semiconductor characterization (SMSC): study of the influence of surface morphology on the photoelectrochemical behavior of an n-$MoSe_2$ single crystal electrode by photocurrent and electrolyte electroreflectance imaging (Martínez Chaparro et al.) **418**, 175
Surface oxide
Application of time-resolved EQCM to the study of the mechanism of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) **416**, 53
Surface plasmon microscopy
Spatio-temporal pattern formation during the reduction of peroxodisulfate in the bistable and oscillatory regime: a surface plasmon microscopy study (Flätgen et al.) **409**, 183
Surface preparation
Isotope and surface preparation effects on alkaline dioxygen reduction at carbon electrodes (Xu et al.) **410**, 235
Surface reactions
Interaction of thiourea with silver electrodes (Szklarczyk et al.) **405**, 111
Surface redox reaction
Surface redox reactions of organomercury compounds: evidence for an interconnected one-electron ladder scheme in the reduction of mercurated uridine-5′-triphosphate (Wagner, Chambers) **408**, 243

Surface roughness
Enhancement of surface areas of Co_3O_4 and $NiCo_2O_4$ electrocatalysts prepared by spray pyrolysis (Nkeng et al.) **402**, 81
Surfaces
Self-assembled monolayers on mercury surfaces (Muskal et al.) **409**, 131
Surface second harmonic generation
Surface second harmonic study of anion adsorption at the mercury|electrolyte interface (Tamburello-Luca et al.) **409**, 123
Surface stress
Apparent thermodynamic inconsistencies in surface stress measurements of copper underpotential deposition on Au(111) electrodes (Haiss, Sass) **410**, 119
Surface structure
Self-assembly of methylene blue at single-crystal platinum electrodes modified by sulphur adlayer (Clavilier et al.) **402**, 129
A model for the surface structure of liquid mercury (Leiva, Schmickler) **404**, 309
Influence of the surface structure of cadmium electrodes on the electric double layer parameters in aqueous surface-inactive electrolyte solutions (Lust et al.) **413**, 111
Surfactant
Formation of organic pigment films using photocatalytic reactions of tris(2,2′-bipyridine)ruthenium(II). Mechanistic study on negatively patterned film formation (Hoshino et al.) **406**, 175
Electrochemical investigations of a novel ferrocene surfactant (Jacob et al.) **416**, 83
Symmetric electrochemical cells
A network approach to simulation of electrical properties of symmetric electrochemical cells (Moya et al.) **413**, 1
Synthesis
Influence of synthesis conditions on polypyrrole–poly(styrenesulphonate) composite electroactivity (Otero, Sansiñena) **412**, 109

Tellurium
In situ optical second harmonic generation studies of electrochemical deposition of tellurium on polycrystalline gold electrodes (Yagi et al.) **401**, 95
CO adsorption and oxidation on Pt(111) electrodes modified by irreversibly adsorbed selenium and tellurium (Herrero et al.) **412**, 165
Temperature
Effect of temperature changes in the range 293 to 208 K on the in situ impedance of poly-*o*-toluidine (Florit) **408**, 257
A study of the dependence of ferrocene diffusion on chain length in polymer electrolytes (Zhou, Dong) **414**, 121
Temperature dependence
The temperature dependence of the transfer of an iodide ion (Pecina et al.) **405**, 239
Temperature dependence of the transfer coefficient. The reduction of iodate in alkaline media (Kirowa-Eisner et al.) **410**, 189
Tetraalkylammonium cations
Electrochemical reduction of tetraalkylammonium tetrafluoroborates at carbon cathodes in dimethylformamide (Dahm, Peters) **402**, 91
Tetra(aryl)porphyrinatosilicon(IV)
Electrochemistry of hexacoordinate tetra(aryl)porphyrinatosilicon(IV) complexes (Lorenz et al.) **415**, 179
Tetradecaethylcycloheptasilane
Electrochemical oxidation of deca-n-propylcyclopentasilane $[(n\text{-}Pr)_2Si]_5$, dodecamethylcyclohexasilane $(Me_2Si)_6$ and tetradecaethylcycloheptasilane $(Et_2Si)_7$ (Becker et al.) **417**, 77
Tetrahydrofuran
Molecular dynamics of the dimerization of $NaB\phi_4$ in 1,2-dimethoxyethane and tetrahydrofuran (Xu et al.) **401**, 45
Tetrathiafulvalene
Studies on employing tetrathiafulvalene as an electron shuttle incorporated in a montmorillonite-modified immobilization matrix for an enzyme electrode (Lei et al.) **419**, 93
Tetrathienyl derivatives
Electrochemical polymerization of the tetrathienyl derivatives of the carbon group elements (Visy et al.) **401**, 119
Thallium
Upd mechanisms of copper and thallium on a Pt(111) electrode studied by in-situ IRAS and EC-STM (Oda et al.) **409**, 95
Thallium compounds
Electrosynthesis and electrochemical behaviour of unusual solid thallium-based phases: thallium peroxide, thallium(I)–thallium(III) mixed oxide, thallium cuprate, and thallium oxyfluoride (Tsirlina, Petrii) **401**, 33
Thallium ions
Lattice contractions and expansions accompanying the electrochemical conversions of Prussian blue and the reversible and irreversible insertion of rubidium and thallium ions (Dostal et al.) **406**, 155
Thallium oxide
Multiphase electrocrystallization in the thallium oxide system: simultaneous nucleation on sites of different nature (Tsirlina et al.) **414**, 41
Thallium vanadium sulphide
Intercalation of monovalent cations in a quasi one-dimensional metal chalcogenide: a voltammetric study on $Tl_xV_6S_8$ single-crystal electrodes (Engelhard et al.) **415**, 79
Theory
Theory of the EC′ electrode process in double potential step techniques (Galvez) **401**, 21
Theory of two $1e^-$ successive electrochemical surface reactions (E_{rev} E_{rev} or E_{rev} E_{irr}) associated with surface chemical reactions in polarography and cyclic voltammetry (Meunier-Prest, Laviron) **410**, 133
Double potential step chronoamperometry at spherical electrodes (HMDE and DME) for long pulse durations (Galvez) **413**, 15
Thermal liquid junction potential
Estimation of the thermal liquid junction potential of an external pressure balanced reference electrode (Lvov, Macdonald) **403**, 25
Thiadiazoles
Examination of the cleavage and formation of the disulfide bond in poly[dithio-2,5-(1,3,4-thiadiazole)] by redox reaction (Shouji, Oyama) **410**, 229
Thick films
A comparative voltammetric study of the $Ir|H_2SO_4$ and $Ir|HClO_4$ aqueous interfaces (Fonseca et al.) **415**, 89
Thickness shear mode sensor
A new method for rapid determination of the potential of zero charge for gold|solution interfaces (Chen et al.) **414**, 53
Thin films
Electrochemical doping and dedoping of vacuum deposited poly(p-phenylene) thin films as studied by in situ spectrocyclic voltammetry (Miyashita, Kaneko) **403**, 53
Simultaneous electrochemical and quartz crystal microbalance studies of non-conducting microcrystalline particles of *trans*-$Cr(CO)_2(dpe)_2$ and *trans*-$[Cr(CO)_2(dpe)_2]^+$ ($dpe = Ph_2PCH_2CH_2PPh_2$) attached to gold electrodes (Shaw et al.) **404**, 227
Electrochemical study of diamond thin films in neutral and basic solutions of nitrate (Bouamrane et al.) **405**, 95
Photoelectrochemical oxidation of 2-mercaptoethanol at the surface of octacyanophthalocyanine thin film electrodes (Karmann et al.) **405**, 149
Investigation of controlled periodic illumination effects on photooxidation processes at titanium dioxide films using rotating ring disk photoelectrochemistry (Foster et al.) **406**, 213

Electrochromic behavior of electrodeposited tungsten oxide thin films (Yao et al.) **406**, 223
FTIR characterization of PEO + $LiN(CF_3SO_2)_2$ electrolytes (Wen et al.) **408**, 113
From monolayers to nanostructured materials: an organic chemist's view of self-assembly (Bethell et al.) **409**, 137
A comparative voltammetric study of the Ir|H_2SO_4 and Ir|$HClO_4$ aqueous interfaces (Fonseca et al.) **415**, 89
Electrodeposition of protective polyaniline films on mild steel (Camalet et al.) **416**, 179
Electrodeposition of In + As thin film alloys and their conversion to $InAs_xP_{1-x}$ by PH_3 treatment (Dalchiele et al.) **418**, 83

Thin-layer voltammetry
Electrochemical and spectroscopic characterization of anodically formed nickel salen polymer films on glassy carbon, platinum, and optically transparent tin oxide electrodes in acetonitrile containing tetramethylammonium tetrafluoroborate (Dahm et al.) **410**, 163

Thiocyanate
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21

Thioisonicotinamide
A contribution to the elucidation of the reduction mechanism of thioisonicotinamide on mercury electrodes (Ruiz Montoya, Rodríguez Mellado) **417**, 113

Thiol-modified gold electrode
Determination of the electrode kinetic parameters of a species immobilized on electrodes using the electroreflectance (ER) voltammogram (Feng et al.) **408**, 15
The distribution of standard rate constants for electron transfer between thiol-modified gold electrodes and adsorbed cytochrome *c* (Nahir, Bowden) **410**, 9

Thiols
From monolayers to nanostructured materials: an organic chemist's view of self-assembly (Bethell et al.) **409**, 137
Examination of the cleavage and formation of the disulfide bond in poly[dithio-2,5-(1,3,4-thiadiazole)] by redox reaction (Shouji, Oyama) **410**, 229

Thionicotinamide
Electroreduction of thionicotinamide on mercury electrodes in aqueous solutions (Expósito et al.) **402**, 211

Thiophene
Electrochemical studies of the oxidation of sterically hindered pyrroles and thiophenes (Audebert et al.) **407**, 169

Thioselenanthrene
The electrochemical oxidation of thioselenanthrene in acetonitrile at conventional electrodes and microelectrodes (Müller et al.) **417**, 35

Thiosulphate
Electrocatalytic oxidation of thiosulfate by metal hexacyanoferrate film modified electrodes (Chen) **417**, 145

Thiourea
Interaction of thiourea with silver electrodes (Szklarczyk et al.) **405**, 111
Electrochemical oxidation of thiourea studied by use of in situ FTIR spectroscopy (Yan et al.) **408**, 225
Confirmation of thiourea/chloride ion co-adsorption at a copper electrode by in-situ SERS spectroscopy (Brown, Hope) **413**, 153
The catalytic action of adsorbed thiocyanate ions and thiourea in the electron transfer from glassy carbon to solid copper(I) selenide and copper(I) sulfide particles (Lange et al.) **418**, 21

Thioureido
Anodic oxidation of thioureido derivatives of biogenic amines at a glassy carbon electrode in an aqueous medium (González Lomba et al.) **410**, 87

Ti
Cathodic electrodeposition of Se on Ti electrodes (Cattarin et al.) **415**, 123

Time-resolved EQCM
Application of time-resolved EQCM to the study of the mechanism of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) **416**, 53

Tin
Electrochemical and X-ray photoelectron spectroscopy studies of passive film on tin in citrate buffer solution (Šeruga et al.) **407**, 83

Titanium dioxide
Investigation of controlled periodic illumination effects on photooxidation processes at titanium dioxide films using rotating ring disk photoelectrochemistry (Foster et al.) **406**, 213

Toluene + DMF
The reduction of styrene at microelectrodes in toluene + *N*,*N*-dimethylformamide mixtures (Geraldo et al.) **418**, 41

Trace water
A case of the indirect role of traces of water in the electroreduction of organic substrates (Arévalo et al.) **418**, 47

Transfer coefficient
Temperature dependence of the transfer coefficient. The reduction of iodate in alkaline media (Kirowa-Eisner et al.) **410**, 189

Transfer studies
UHV and electrochemical transfer studies on Pt(110)-(1 × 2): the influence of bismuth on hydrogen and oxygen adsorption, and the electro-oxidation of carbon monoxide (Hayden et al.) **409**, 51

Transient absorption spectroscopy
Transient absorption spectroscopy of nanostructured semiconductor films at controlled potentials. An in situ spectroelectrochemical investigation of the photosensitization process (Bedja et al.) **401**, 237

Transient current characteristics
Numerical simulation of the time-dependent current to membrane-covered oxygen sensors. Part IV. Experimental verification that the switch-on transient is non-Cottrellian for microdisc electrodes (Sutton et al.) **408**, 21

Transient methods
A method-oriented approach to the formulation of algorithms for electrochemical kinetic simulations. Part 2. Extension to kinetic problems characterized by the simultaneous presence of bulk and interfacial species (Bieniasz) **404**, 195
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 1. Problem parameters and initial conditions (Bieniasz) **406**, 33
Automatic derivation of the governing equations that describe a transient electrochemical experiment, given a reaction mechanism of arbitrary complexity. Part 2. Governing equations in one-dimensional geometry (Bieniasz) **406**, 45

Transients
Extension of fast transient techniques to the non-linear region (Kaplevatsky et al.) **407**, 51

Transmission electron microscope
Crystallographic habit of gold particles grown on electrodes in acidic solutions at different electrode potentials (Lu et al.) **406**, 101

Transport analysis
Transport phenomena inside the pores involved in the kinetics and mechanism of growth of porous anodic Al_2O_3 films on aluminium (Patermarakis) **404**, 69

Transport equation
Theory of water management at the anode side of polymer electrolyte fuel cell membranes (Okada et al.) **413**, 49

Transport phenomena
The multigrid method, MGD1: an efficient and stable approach to electrochemical modelling. The simulation of double electrode problems (Alden, Compton) **415**, 1

Trifluoracetate
Spectroscopic investigations on the adsorption of trifluoracetate at Pt(100), Pt(110) and Pt(111) (Pastor et al.) **404**, 61

Trifluoromethyl
Reducibility of the carbon–fluorine bond in the trifluoromethyl group (Combellas et al.) **407**, 195
Trimethoxysilylferrocenes
Modified electrodes from organic–inorganic hybrid gels formed by hydrolysis–polycondensation of some trimethoxysilylferrocenes (Audebert et al.) **413**, 89
Triple potential step chronoamperometry
General analytical solution for a reversible i–t response to a triple potential step at an SMDE in the absence/presence of amalgamation (Molina et al.) **408**, 33
Tris-bipyrazyl complexes
Ion-exchange voltammetry of tris(2,2′-bipyridyl) ruthenium(II), iron(II), osmium(II) and tris(2,2′-bipyrazyl) ruthenium(II) in acetonitrile solutions at poly(ester-sulphonate) coated electrodes (Hanzlik et al.) **404**, 89
Tris-bipyridyl complexes
Ion-exchange voltammetry of tris(2,2′-bipyridyl) ruthenium(II), iron(II), osmium(II) and tris(2,2′-bipyrazyl) ruthenium(II) in acetonitrile solutions at poly(ester-sulphonate) coated electrodes (Hanzlik et al.) **404**, 89
Tubular band electrode
Diffusion current at the tubular band electrode by the integral equation method (Engblom et al.) **406**, 23
Tungsten oxide
Electrochromic behavior of electrodeposited tungsten oxide thin films (Yao et al.) **406**, 223
Two-phase electrochemistry
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 1. Simple ion transfers (Cheng, Schiffrin) **409**, 9
p-Type semiconductors
Electrochemical anion doping of poly[(tetraethyldisilanylene)oligo(2,5-thienylene)] derivatives and their p-type semiconducting properties (Kunugi et al.) **414**, 135

UHV
Electrochemistry in UHV: generation of lithium from all-solid-state cells (Roy, Bruce) **415**, 33
Ultramicroelectrodes
Electrodeposition study on ultramicroelectrodes. Part 2. Different growth modes in Ag crystallization (Duo et al.) **404**, 99
Electrochemical nucleation on disc-shaped ultramicroelectrodes: theoretical aspects (Correia et al.) **407**, 37
Ultrasound
Voltammetry in the presence of ultrasound: surface and solution processes in the sonovoltammetric reduction of nitrobenzene at glassy carbon and gold electrodes (Marken et al.) **414**, 95
Voltammetry in the presence of ultrasound: the limit of acoustic streaming induced diffusion layer thinning and the effect of solvent viscosity (Marken et al.) **415**, 55
A study of the effect of ultrasound on mass transport to a microelectrode (Birkin, Silva-Martinez) **416**, 127
The effect of ultrasound on the electrochemical loading of hydrogen in palladium (Wark et al.) **418**, 199
Uncharged species
Chronoamperometry of uncharged species in the presence of a very low concentration of supporting electrolyte. A simulation (Jaworski et al.) **407**, 75
Underpotential deposition
Time-resolved in situ and real time study of an electrode process by differential X-ray diffraction: Ag underpotential deposition on Au(111) (Chabala, Rayment) **401**, 257
Underpotential deposition of mercury on Au(111) investigated by in situ scanning tunnelling microscopy (Inukai et al.) **403**, 159
A theoretical study on the stability of different submonolayers or a monolayer of lead adsorbed on Au(100) (Rojas) **405**, 33
Upd mechanisms of copper and thallium on a Pt(111) electrode studied by in-situ IRAS and EC-STM (Oda et al.) **409**, 95
Evaluation of the effect of two-dimensional geometry of Pt single-crystal faces on the kinetics of upd of H using impedance spectroscopy (Morin et al.) **412**, 39
In situ and real time study of an electrode process by differential X-ray diffraction. Part 1. Ag underpotential deposition on Au(111) (Chabala et al.) **412**, 67
In situ and real time study of an electrode process by differential X-ray diffraction. Part 2. Cu underpotential deposition on Au(111) (Chabala et al.) **412**, 77
Underpotential–overpotential transition in a silver overlayer on platinum. Part 2. Reversible 2D–3D rearrangement (Vaskevich et al.) **412**, 117
Study of the equilibrium underpotential deposition of copper and the accompanying anion adsorption on rhodized electrodes in the course of cyclic voltammetric measurements (Horányi, Wasberg) **413**, 161
Electrochemical behaviour of nitroindoles: oxidative electropolymerization and reduction of the nitro group of polymerized and non-polymerized 4-nitro and 5-nitroindole (Kokkinidis, Kelaidopoulou) **414**, 197
Unimolecular fragmentation
Electrochemistry of electron transfer probes. Competition between ECE and DISP mechanisms in the reduction of α-aryloxyacetophenones (Andersen, Wayner) **412**, 53
Unoxidized iridium
A comparative voltammetric study of the $Ir|H_2SO_4$ and $Ir|HClO_4$ aqueous interfaces (Fonseca et al.) **415**, 89
UO_2
The cathodic reduction of oxygen on n-type UO_2 in dilute alkaline aqueous solution (Shoesmith et al.) **406**, 69
UV excimer photoablation
Excimer laser-induced electrochemical activity in carbon ink films (Osborne et al.) **417**, 5
UV–vis–NIR
UV–vis–NIR and Raman spectroelectrochemical studies on viologen cation radicals: evidence for the presence of various types of aggregate species (Lee et al.) **416**, 139
UV–vis spectroscopy
In situ UV–vis ESR spectroelectrochemistry (Petr et al.) **412**, 153

Vacuum deposition
Electrochemical and chemical synthesis of polyaniline on the surface of vacuum deposited polyaniline films (Nekrasov et al.) **412**, 133
Vanadium pentoxide xerogel
Electrochemical behaviour of spin-coated films of vanadium pentoxide xerogel in aqueous electrolyte. Electron transfer between vanadium centres in the gel layers and intercalated tris (2,2′-bipyridyl) metal cations (Whalen, Villemure) **411**, 43
Very low platinum loading
Oxygen reduction on a new electrocatalyst based on highly porous carbonized polyacrylonitrile microcellular foam with very low platinum loading (Ye et al.) **415**, 115
Vibrational properties
Vibrational properties of CN^- adsorbed on platinum and silver: ab initio MCSCF calculations compared with SFG experiments (Tadjeddine et al.) **408**, 237
Viologen cation radicals
UV–vis–NIR and Raman spectroelectrochemical studies on viologen cation radicals: evidence for the presence of various types of aggregate species (Lee et al.) **416**, 139

Viologen film
The electrochemical properties of an oligomeric viologen film (Lieder, Schläpfer) **411**, 87
Viologens
The electrochemical properties of oligomeric viologen films immobilised by polyacids (Lieder, Schläpfer) **416**, 89
Vitamin B6 catabolism
Electrochemical reduction of the final product of vitamin B-6 catabolism: a spectroscopic characterization of the reduced products of 4-pyridoxic acid (Pineda et al.) **403**, 101
Volmer–Heyrovsky mechanism
Bifurcation analysis for the Volmer–Heyrovsky mechanism (Berthier et al.) **402**, 29
Voltammetric cell
Voltammetric cell with additional internal circulation of electrolyte (Tur'yan et al.) **412**, 175
Voltammetric titration
Voltammetric metal titration of particle dispersions (Wonders, Van Leeuwen) **401**, 103
Voltammetry
Voltammetry of labile heterogeneous complexes with low diffusion coefficients (Pinheiro et al.) **402**, 47
Electroreduction of thionicotinamide on mercury electrodes in aqueous solutions (Expósito et al.) **402**, 211
On the electroreduction of the anions of pyridine monocarboxylic acid *N*-oxides on mercury electrodes in basic solutions (Angulo, Rodríguez Mellado) **403**, 251
Hydrodynamic voltammetry with channel microband electrodes: axial diffusion effects (Alden, Compton) **404**, 27
Ion-exchange voltammetry of tris(2,2′-bipyridyl) ruthenium(II), iron(II), osmium(II) and tris(2,2′-bipyrazyl) ruthenium(II) in acetonitrile solutions at poly(ester-sulphonate) coated electrodes (Hanzlik et al.) **404**, 89
Simultaneous electrochemical and quartz crystal microbalance studies of non-conducting microcrystalline particles of *trans*-$Cr(CO)_2(dpe)_2$ and *trans*-$[Cr(CO)_2(dpe)_2]^+$ (dpe = $Ph_2PCH_2CH_2PPh_2$) attached to gold electrodes (Shaw et al.) **404**, 227
Comparison of electrosorption at activated polycrystalline and Pt(531) kinked platinum electrodes: surface voltammetry and charge displacement on potentiostatic CO adsorption (Clavilier et al.) **404**, 281
The three-dimensional simulation of short-time diffusion-controlled voltammetry at the walls of a hollow cube (Myland, Oldham) **405**, 39
Anomalies of staircase voltammetric peaks obtained for the reduction of metal ions in the absence of supporting electrolyte (Donten, Stojek) **405**, 183
Single and multiple pulse voltammetries at the static mercury drop electrode for reversible reactions with and without amalgam formation (Fatouros et al.) **405**, 197
The voltammetric study of Au(100) electrode in the presence of alkyl sulphates (Skoluda) **406**, 235
Voltammetry of carbon dioxide. Part 2. Voltammetry in aqueous solutions on glassy carbon (Eggins et al.) **408**, 165
Electrochemical behaviour of certain biomimetic copper(II) complexes in aqueous and aqueous micellar solutions (Sivagnanam, Palaniandavar) **410**, 43
Unusual twin adsorption waves in voltammetry of trimetallic clusters of Os and Ru undergoing redox-induced reorientation of the alkyne ligand (Pospíšil et al.) **412**, 147
Study of the equilibrium underpotential deposition of copper and the accompanying anion adsorption on rhodized electrodes in the course of cyclic voltammetric measurements (Horányi, Wasberg) **413**, 161
Voltammetric behaviour of poly(3-methylthiophene)-coated cylindrical carbon fibre microelectrodes: electrochemical oxidation of the antioxidant propyl gallate (Agüí et al.) **414**, 141
Study of the flow dependence of microelectrode and semi-microelectrode voltammetric signals (Kubiak, Strozik) **417**, 95
A contribution to the elucidation of the reduction mechanism of thioisonicotinamide on mercury electrodes (Ruiz Montoya, Rodríguez Mellado) **417**, 113
The harmony of EQCM and radiotracer sorption results obtained in the course of voltammetric study of a rhodized electrode (Wasberg et al.) **418**, 195
Voltammetric studies of electrochemical pretreatment of rotating-disc glassy carbon electrodes in phosphate buffer (Dai, Shiu) **419**, 7
Measurement of uncompensated resistance and double layer capacitance during the course of a dynamic measurement: correction for *IR* drop and charging currents in arbitrary voltammetric techniques (Åberg) **419**, 99
Voltammogram
An extended hexagon model for Cu underpotential deposition on Au(111) (Legault et al.) **409**, 77
Volt-radiometric measurements
Comparative study of anion-involvement in redox transformations of poly(*o*-phenylene-diamine) (PPD) films by a coupled electrochemical and radiometric technique (Martinusz et al.) **404**, 145

Water
Water structure at the graphite(0001) surface by STM measurements (Nagy) **409**, 19
Adsorption of water at Pt(111) electrode in $HClO_4$ solutions. The potential of zero charge (Iwasita, Xia) **411**, 95
Infrared spectroscopic observation of water at a polycrystalline gold electrode|aqueous halide solution interface (Kitamura et al.) **412**, 183
Electrochemical quartz crystal microbalance study of adsorption of iodide on highly ordered Au(111) (Lei et al.) **413**, 131
Water content
Effects of hydration on the resistances and electrochemical responses of Nafion® coatings on electrodes (Shi, Anson) **415**, 41
Water effect
Water effect on oxygen reduction in molten $(Li + K)CO_3$ eutectic (Nishina et al.) **408**, 181
Water management
Theory of water management at the anode side of polymer electrolyte fuel cell membranes (Okada et al.) **413**, 49
Water|o-nitrophenyl octyl ether interface
Polarization phenomena at the water|o-nitrophenyl octyl ether interface. Part 1. Evaluation of the standard Gibbs energies of ion transfer from the solubility and voltammetric measurements (Samec et al.) **409**, 1
Water reduction
Behaviour of a fluorine-doped tin oxide electrode: a study by quartz crystal microbalance in propylene carbonate (Székely et al.) **401**, 89
Weak acid
Steady state voltammetry at microelectrodes for the hydrogen evolution from strong and weak acids under pseudo-first and second order kinetic conditions (Daniele et al.) **404**, 105
Weak adsorption
Analysis of parameters relative to weak adsorption from voltammetric data (Wu et al.) **407**, 45
Working surface
Channel microband electrodes: a complete working surface for potential step transients (Bidwell et al.) **414**, 247
n-WSe_2
The scanning microscope for semiconductor characterization (SMSC): comparative study of the influence of surface defects on the photoelectrochemical behavior of n-WSe_2 and n-$MoSe_2$ layered compounds (Chaparro et al.) **411**, 79

Xanthine
Xanthine and hypoxanthine sensors based on xanthine oxidase immobilized in poly(mercapto-p-benzoquinone) film (Arai et al.) **410**, 173
XPS
Voltammetric and XPS investigations of polynuclear ruthenium-containing cyanometallate film electrodes (Cataldi et al.) **406**, 91
Electrochemical and X-ray photoelectron spectroscopy studies of passive film on tin in citrate buffer solution (Šeruga et al.) **407**, 83
Electrochemistry and detection of some organic and biological molecules at conducting polymer electrodes. Part 3. Evidence of the electrocatalytic effect of the heteroatom of the poly(hetetroarylene) at the electrode/electrolyte interface (Atta et al.) **408**, 47
Some experiments regarding the corrosion inhibition of copper by benzotriazole and potassium ethyl xanthate (Souto et al.) **411**, 161
XPS study and electrochemical behaviour of the nickel hexacyanoferrate film electrode upon treatment in alkaline solutions (Cataldi et al.) **417**, 89
Study of pH effect on the relaxation phenomenon of polyaniline by electrochemistry and XPS (Fraoua et al.) **418**, 109
X-ray diffraction
Solid state electrochemical studies of mixed nickel–iron hexacyanoferrates with the help of abrasive stripping voltammetry (Jayarama Reddy et al.) **403**, 209
In situ and real time study of an electrode process by differential X-ray diffraction. Part 1. Ag underpotential deposition on Au(111) (Chabala et al.) **412**, 67
In situ and real time study of an electrode process by differential X-ray diffraction. Part 2. Cu underpotential deposition on Au(111) (Chabala et al.) **412**, 77
X-ray studies
The surface structure of Au(111) in the presence of organic adlayers: a combined electrochemical and surface X-ray scattering study (Wandlowski et al.) **409**, 155

Zeolite modified electrode
Zeolite containing oxidase-based carbon paste biosensors (Wang, Walcarius) **404**, 237
Zeolite-modified carbon paste electrode for selective monitoring of dopamine (Wang, Walcarius) **407**, 183
Zinc
The influence of some sulphur-containing anions on the anodic behaviour of zinc in an alkaline medium (Abd El Rehim et al.) **401**, 113
Electrode kinetics and the nature of the metal electrode. Part 2. The Zn(II)/Zn electrode reaction studied at dropping gallium and mercury (micro)electrodes (Van Venrooij et al.) **419**, 61
Zinc + nickel alloys
Chemical and phase compositions of zinc + nickel alloys determined by stripping techniques (Elkhatabi et al.) **404**, 45
Electrochemical oxidation of zinc + nickel alloys in ammonium baths (Elkhatabi et al.) **419**, 71
Zn^{2+}
Electrode kinetics and the nature of the metal electrode. Part 1. Zn^{2+} reduction from aqueous 1 M $NaClO_4$ solution at indium and thallium amalgams of varied composition (Koene et al.) **402**, 57
